From: John Faulkner, Skegness
Topic: 35847 Message: 36975

I will Günter. Thank you.

That four or five minutes is not an exaggeration. It has happened many times this season, but I doubt very much that the problem is at your end. I wondered if it is some quirk of the Chrome browser. A lot of the pages within FM List often refuse to load, i.e. the Worldwide Visual Logbook and I have to refresh several times to see the latest map update. I'm sure this cannot be a server issue at FM List as you'd be having frequent complaints from other people. But it would be useful to know if it is an interaction between Chrome and FM List and widespread the problem might be.

Thanks again.

John

36976. 2 x German UNIDs

Yahoo group: SkywavesDX (2015)
Date: 2015-07-10 02:38:42 UTC
From: John Faulkner, Skegness
Topic: 36976 Message: 36976

The recordings from the 21st June are never ending. I have now reached 16:37 UTC and some very short skip into Germany.

Firstly, I received full RDS D383 NDR_Kult from an unlisted NDR Kultur on 98.7. A new site?

Also I have a recording of a jingle ID, possibly related to the German talk which precedes it:
https://app.box.com/s/eezbmng27lbimno97sw0sg6kmdakrjut

I wondered if this was Radio Brocken. It doesn't sound quite right though. Maybe somebody recognises this.

Thanks

John

36978. Tropo central France

Yahoo group: SkywavesDX (2015)
Date: 2015-07-10 06:34:11 UTC
From: nick gilly
Topic: 14380 Message: 36978

Clermont-Ferrand, Lyon, Ussel and Aurillac all heard so far this morning. Possibly a very weak Carcassonne on 90.9 earlier on too. Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

From: Janpeter van Dijk
Topic: 36962 Message: 36981

Hi Franck,

> radio and listened yesterday not found on fmlist :

> 89.3 pi 3F44 koszalin

Indeed, RMF FM from Koszalin or Lublin. Both are in FMLIST

> 100.9 pi 1204

I don't know the skip at the time of this reception, but most likely this is ERA Sport from Parnitha (GRC)

> 96.9 pi skonto

tx Kuldiga (LVA)

> 93.9 pi CA45

This is the PI for Radiocentras (LTU), this is a UNID site.

73, Janpeter

Thanks Paul.

I do this and still no luck.

Thank you John.

Of course, I never thought to look under 'tropo' because the reception was E skip. I am SPEECHLESS! This is _*640 km*_ sporadic E reception!

Cheers

John

36984. Sporadic E Loggings for 9 July 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-10 08:18:05 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 36984

Hi All,

Another BIG Band II Es day yesterday, with the band being open for many hours. Highlight was the best opening I have ever seen towards the Balearic Islands. In fact there were two openings, a weaker one in the morning and a full blown one to the top of the band in the afternoon. Also, incredible enough, yesterday was the seventh (!) day this season with reception from Lybia.
It took a while, but I am starting to like this years Es.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Thursday 9 July 2015

36985. Skegness Files: 21-06-15 (Ultra-short skip - Germany)

Yahoo group: SkywavesDX (2015)
Date: 2015-07-10 09:14:59 UTC
From: John Faulkner, Skegness
Topic: 36985 Message: 36985

A couple of files from the 21st June.

These contain some exceptional short-Es into Germany and my shortest Es skip to date - 98.7 NDR Kultur, Hannover at 640 km. There were quite a few German stations I could not identify because they were below the RDS threshold, however, it seems certain who most of them are.

Other countries featured in these recordings include Poland, Czech Republic and Slovakia. Two stations will often be fighting for each frequency.

url]http://www.mediafire.com/download/mzqs1f47caiq4b4/2015-06-21a_1637_(Short_Skip_-_Germany).ape[/url]

[url]http://www.mediafire.com/download/i2k5m9vbw6cc4zz/2015-06-21b_1637_(Short_Skip_-_Germany).ape[/url]

As usual, you'll need to decompress the file with the Monkey's Audio tool. [url]http://www.monkeysaudio.com/[/url]

John

36986. Re: [SkywavesDX] Skegness Files: 21-06-15 (Ultra-short skip - Germany)

Yahoo group: SkywavesDX (2015)

I should have added that the first file contains the frequencies 87.5 to
93.3. The second file is 93.2 to 99.0.

Cheers

John

36987. Re: [SkywavesDX] Re: Band II Sporadic E Loggings for 18 June 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-10 10:23:45 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 36987

Hi Nick,

Congratulations on your positive Turkey ID's. I haven't had time yet to listen to your clips, but I will certainly do so.

I see that the subject of my e-mail is incorrect, it should have said loggings for 8 July. Anyhow, no, I still haven't figured out how I want to start doing recordings. This is quite stupid actually, suppose I am going to get the logging of a lifetime, I would want to keep it, don't I? But this has all to do with my aversion to everything that has to do with computers. I have no knowledge of it, or any feeling for it, so I always need to find someone to help me with those things. I am glad enough to have this Sony modification working, although it took months before it did.
But some day, I will get going with making recordings. Days like last Wednesday will push me in the right direction.

73, Janpeter

Wow stunning logs there Janpeter. This was indeed a fantastic opening, the first one where Turkey has come in for long enough to actually positively ID the stations. Some very interesting propagation with TUR being heard from the south coast to NW England. We need more days like this!

Did you record the UNID Arab stations? I would love to hear the clips if so.
Good DX.

Nick, Whitchurch, Hampshire.

On Thursday, 9 July 2015, 21:02, "Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX]" <SkywavesDX@...> wrote:

Hi All,

After several nailbiting hours at the office yesterday, I finally could start my own DX session around 5:30 pm local time. Contrary to many times before this season, the propagation did not soon fade away. On the contrary, the next almost five hours brought one of the best openings I have seen.

At the start, ID-ing was difficult. Band II was open into a wide area of Italy, with several stations on each frequency. Fading was very fast, signal distortion was high and both the MUF and the skip area were constantly moving. After one hour, things became more interesting with relatively short skip from France. In 30 minutes I heard more French stations in a single opening than ever before, only a few of them could be identified. Then out of nowhere came a station from Montenegro with full RDS on the side of the antenna. This was a prewarning of a majestic several hours to come. In which the skip was into South Eastern Europe, with constantly new countries popping up. During this period it was Band II E-skip as good as it gets. Short skip, long skip, suspected double hop, with North Africa in the mix at times. Absolutely fantastic stuff!

The 16 countries received during this session:
Albania
Algeria
Austria (it has been many years since this happened)
Bosnia Herzegovina
Bulgaria
France
Greece
Hungary
Croatia
Italy
Lybia (day number six this season)
Montenegro
Roumania
Serbia
Tunisia
Turkey

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

This was a very good opening apart from the Italian soup as it sent my band just twittering noise most of it.Anyway after Italy had dropped Balkans was very strong and the it happened my first Turkey reception first was Radyo Dolunay (Istanbul) on 108.0 then a bit later Damla FM with RDS on 87.5.
08/07/15 19:17 Radyo Dolunay Istanbul - Istanbul 2737 km 108.0

From: Jim Smith G0OFE
Topic: 36989 Message: 36989

Well.. what a day this was, one of the best of the year so far.

A lot of weak propagation throughout the morning to Italy and Tunisia, before Greece came in with a vengeance. After I had the Turkish logging, the path swung round to Italy before moving northwards again to Greece and ROU/SVK/HNG/CZE before fizzling out later.

Personal highlights were getting my first Turkish logging in my third year of trying, with another station on the same frequency trying its best to deny me.. just got enough time to compare with the stream, so that was in the can. 2 new countries in 2 days, not bad.

Later on, those to the north and east of me had a number of Turkish loggings, but didn't get the slightest sniff here. Had I not got the earlier logging, I would have been immensely frustrated! That's radio!

Logs and map:

Another fairly interesting day, with the band open off and on, from early morning until tea-time.

Opening to Tunisia lasted many hours - a number of DXers logged Libya, but that country continues to elude me this far west.

Hi All,

An odd Band II Es opening into Italy today. Which sneaked into the band out of nowhere, with the MUF shooting up to the 2 meter band. Very fascinating to watch this happening! Despite of the high MUF, signals were generally rather weak, making it difficult to ID anything.
And there was a side catch today from..... yes, Libya. Day number eight. Which makes this more frequent this season than in all my 42 previous DX years combined.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Thanks Janpeter. Turkey is normally very rare from here but July 8th was the 3rd opening to produce signals from that country, and of course, the best to date. Did Ruud pick up anything exotic? I wonder if he had anything similar?

As for recordings I record my DX onto CD-Rs using a CD recorder, which is easy to use, although it can be fussy with discs. The CD-Rs need to be finalised before they can be read by a CD player or the computer. The computer is needed to convert the PCM CD audio to MP3s for uploading to box. For this I use a free app called Audacity which is pretty easy to use.
Recording direct to MP3 would be even better for fast upload but the cheap one I bought from Amazon produced appalling audio quality. Good DX.

Nick, Whitchurch, Hampshire.

  Hi Nick,

Congratulations on your positive Turkey ID's. I haven't had time yet to listen to your clips, but I will certainly do so.

I see that the subject of my e-mail is incorrect, it should have said loggings for 8 July. Anyhow, no, I still haven't figured out how I want to start doing recordings. This is quite stupid actually, suppose I am going to get the logging of a lifetime, I would want to keep it, don't I? But this has all to do with my aversion to everything that has to do with computers. I have no knowledge of it, or any feeling for it, so I always need to find someone to help me with those things. I am glad enough to have this Sony modification working, although it took months before it did.
But some day, I will get going with making recordings. Days like last Wednesday will push me in the right direction.

73, Janpeter

 Wow stunning logs there Janpeter. This was indeed a fantastic opening, the first one where Turkey has come in for long enough to actually positively ID the stations. Some very interesting propagation with TUR being heard from the south coast to NW England. We need more days like this!

Did you record the UNID Arab stations? I would love to hear the clips if so. Good DX.

Nick, Whitchurch, Hampshire.

Hi All,

After several nailbiting hours at the office yesterday, I finally could start my own DX session around 5:30 pm local time. Contrary to many times before this season, the propagation did not soon fade away. On the contrary, the next almost five hours brought one of the best openings I have seen.

At the start, ID-ing was difficult. Band II was open into a wide area of Italy, with several stations on each frequency. Fading was very fast, signal distortion was high and both the MUF and the skip area were constantly moving. After one hour, things became more interesting with relatively short skip from France. In 30 minutes I heard more French stations in a single opening than ever before, only a few of them could be identified. Then out of nowhere came a station from Montenegro with full RDS on the side of the antenna. This was a prewarning of a majestic several hours to come. In which the skip was into South Eastern Europe, with constantly new countries popping up. During this period it was Band II E-skip as good as it gets. Short skip, long skip, suspected double hop, with North Africa in the mix at times. Absolutely fantastic stuff!

The 16 countries received during this session:
Albania
Algeria
Austria (it has been many years since this happened)
Bosnia Herzegovina
Bulgaria
France
Greece
Hungary
Croatia
Italy
Lybia (day number six this season)
Montenegro
Roumania
Serbia
Tunisia
Turkey

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi Nick,

Last year I was ready to start recording audio, which I actually did just to test it. This was by means of a tape deck connected to an amplifier hooked up to my Onkyo tuner. The tape deck has an USB cable to connect to a PC. So I was ready to go but then I decided to have my Sony XDR modified. This is now directly connected to the PC and therefore I have to rearrange things to be able to record again.
I guess it should be possible to connect the tape deck to take audio from the PC, but I am not sure if this would be the easiest way of doing things. I just need to take some time to think this over. I also have an e-mail from Jürgen Bartels explaining a few things on this topic.

It will work out, eventually.

Re. Ruud's exotic catches, I don't know exactly. I have seen some interesting loggings from him, but I do not recall seeing any 2 x Es. Maybe Ruud can answer, he is connected to this list.

73, Janpeter

Onderwerp: Re: [SkywavesDX] Re: Band II Sporadic E Loggings for 18 June 2015

Thanks Janpeter. Turkey is normally very rare from here but July 8th was the 3rd opening to produce signals from that country, and of course, the best to date. Did Ruud pick up anything exotic? I wonder if he had anything similar?

As for recordings I record my DX onto CD-Rs using a CD recorder, which is easy to use, although it can be fussy with discs. The CD-Rs need to be finalised before they can be read by a CD player or the computer. The computer is needed to convert the PCM CD audio to MP3s for uploading to box. For this I use a free app called Audacity which is pretty easy to use.

Recording direct to MP3 would be even better for fast upload but the cheap one I bought from Amazon produced appalling audio quality.
Good DX.

Nick, Whitchurch, Hampshire.

Hi Nick,

Congratulations on your positive Turkey ID's. I haven't had time yet to listen to your clips, but I will certainly do so.

I see that the subject of my e-mail is incorrect, it should have said loggings for 8 July. Anyhow, no, I still haven't figured out how I want to start doing recordings. This is quite stupid actually, suppose I am going to get the logging of a lifetime, I would want to keep it, don't I? But this has all to do with my aversion to everything that has to do with computers. I have no knowledge of it, or any feeling for it, so I always need to find someone to help me with those things. I am glad enough to have this Sony modification working, although it took months before it did.
But some day, I will get going with making recordings. Days like last Wednesday will push me in the right direction.

73, Janpeter

Onderwerp: Re: [SkywavesDX] Re: Band II Sporadic E Loggings for 18 June 2015

Wow stunning logs there Janpeter. This was indeed a fantastic opening, the first one where Turkey has come in for long enough to actually positively ID the stations. Some very interesting propagation with TUR being heard from the south coast to NW England. We need more days like this!

Did you record the UNID Arab stations? I would love to hear the clips if so.
Good DX.

Nick, Whitchurch, Hampshire.

On Thursday, 9 July 2015, 21:02, "Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX]" <SkywavesDX@...> wrote:

Hi All,

After several nailbiting hours at the office yesterday, I finally could start my own DX session around 5:30 pm local time. Contrary to many times before this season, the propagation did not soon fade away. On the contrary, the next almost five hours brought one of the best openings I have seen.

At the start, ID-ing was difficult. Band II was open into a wide area of Italy, with several stations on each frequency. Fading was very fast, signal distortion was high and both the MUF and the skip area were constantly moving. After one hour, things became more interesting with relatively short skip from France. In 30 minutes I heard more French stations in a single opening than ever before, only a few of them could be identified.

Then out of nowhere came a station from Montenegro with full RDS on the side of the antenna. This was a prewarning of a majestic several hours to come. In which the skip was into South Eastern Europe, with constantly new countries popping up. During this period it was Band II E-skip as good as it gets. Short skip, long skip, suspected double hop, with North Africa in the mix at times. Absolutely fantastic stuff!

The 16 countries received during this session:
Albania
Algeria
Austria (it has been many years since this happened)
Bosnia Herzegovina
Bulgaria
France
Greece
Hungary
Croatia
Italy
Lybia (day number six this season)
Montenegro
Roumania
Serbia
Tunisia
Turkey

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Yes Andy it sounds like Damla FM to me. This is my recording of it from July 8th:

https://app.box.com/s/cc6w2nqw4g8t9u3gyte0qtqytvi9xfcg

Good DX.

I am not 100% sure about Damla FM.
In the second recording the announcer says something about 1000 angels and
the messenger of god.
This does not match the format of Damla FM, which is a music station.
But there is religious unlisted and unidentified station, which I received
two weeks ago from Izmir.
regards
Kurt

Excellent! We must have received it at around the same time. I had the web stream running at the same time to confirm reception and then it RDSed at the peak in the middle of the recording. At that time any other Turkish frequencies were blocked by very strong signals from central Europe, although I did receive a couple of Turkish signals on 87.7 and 87.9 before the central European opening took off. Good DX.

Subject: Re: [SkywavesDX] Re: Band II Sporadic E Loggings for 18 June 2015

Hi Nick,

Last year I was ready to start recording audio, which I actually did just to test it. This was by means of a tape deck connected to an amplifier hooked up to my Onkyo tuner. The tape deck has an USB cable to connect to a PC. So I was ready to go but then I decided to have my Sony XDR modified. This is now directly connected to the PC and therefore I have to rearrange things to be able to record again.
I guess it should be possible to connect the tape deck to take audio from the PC, but I am not sure if this would be the easiest way of doing things. I just need to take some time to think this over. I also have an e-mail from Jürgen Bartels explaining a few things on this topic.

It will work out, eventually.

Re. Ruud's exotic catches, I don't know exactly. I have seen some interesting loggings from him, but I do not recall seeing any 2 x Es. Maybe Ruud can answer, he is connected to this list.

Onderwerp: Re: [SkywavesDX] Re: Band II Sporadic E Loggings for 18 June 2015

Thanks Janpeter. Turkey is normally very rare from here but July 8th was the 3rd opening to produce signals from that country, and of course, the best to date. Did Ruud pick up anything exotic? I wonder if he had anything similar?

As for recordings I record my DX onto CD-Rs using a CD recorder, which is easy to use, although it can be fussy with discs. The CD-Rs need to be finalised before they can be read by a CD player or the computer. The computer is needed to convert the PCM CD audio to MP3s for uploading to box. For this I use a free app called Audacity which is pretty easy to use.
Recording direct to MP3 would be even better for fast upload but the cheap one I bought from Amazon produced appalling audio quality. Good DX.

Nick, Whitchurch, Hampshire.

Hi Nick,

Congratulations on your positive Turkey ID's. I haven't had time yet to listen to your clips, but I will certainly do so.

I see that the subject of my e-mail is incorrect, it should have said loggings for 8 July. Anyhow, no, I still haven't figured out how I want to start doing recordings. This is quite stupid actually, suppose I am going to get the logging of a lifetime, I would want to keep it, don't I? But this has all to do with my aversion to everything that has to do with computers. I have no knowledge of it, or any feeling for it, so I always need to find someone to help me with those things. I am glad enough to have this Sony modification working, although it took months before it did.
But some day, I will get going with making recordings. Days like last Wednesday will push me in the right direction.

Wow stunning logs there Janpeter. This was indeed a fantastic opening, the first one where Turkey has come in for long enough to actually positively ID the stations. Some very interesting propagation with TUR being heard from the south coast to NW England. We need more days like this!

Did you record the UNID Arab stations? I would love to hear the clips if so. Good DX.

Hi All,

After several nailbiting hours at the office yesterday, I finally could start my own DX session around 5:30 pm local time. Contrary to many times before this season, the propagation did not soon fade away. On the contrary, the next almost five hours brought one of the best openings I have seen.

At the start, ID-ing was difficult. Band II was open into a wide area of Italy, with several stations on each frequency. Fading was very fast, signal distortion was high and both the MUF and the skip area were constantly moving. After one hour, things became more interesting with relatively short skip from France. In 30 minutes I heard more French stations in a single opening than ever before, only a few of them could be identified. Then out of nowhere came a station from Montenegro with full RDS on the side of the antenna. This was a prewarning of a majestic several hours to come. In which the skip was into South Eastern Europe, with constantly new countries popping up. During this period it was Band II E-skip as good as it gets. Short skip, long skip, suspected double hop, with North Africa in the mix at times. Absolutely fantastic stuff!

The 16 countries received during this session:
Albania
Algeria
Austria (it has been many years since this happened)
Bosnia Herzegovina
Bulgaria
France
Greece
Hungary
Croatia
Italy
Lybia (day number six this season)
Montenegro
Roumania
Serbia
Tunisia
Turkey

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

I am not 100% sure about Damla FM.
In the second recording the announcer says something about 1000 angels and the messenger of god.
This does not match the format of Damla FM, which is a music station.
But there is religious unlisted and unidentified station, which I received two weeks ago from Izmir.

Hi All

Is the following Turkish (DAMLA FM)?

http://www.apritch.myby.co.uk/temp/TURMAYBE1.wav
http://www.apritch.myby.co.uk/temp/TURMAYBE2.wav

Captured on 87.5 during the Turkish opening

The ID really sounds like Duru FM. This station registered more than 400
frequencies in locations all over Turkey mainly on 87.5.
The official registration was cancelled end of last year and I have removed
it from FMLIST at the beginning of this year.
There are many unlicensed stations all over Turkey, broadcasting
advertisements and hardly ever ID themselves.
I suppose this was one of these pirates you recorded.
Kurt

Thanks go to Kurt Zscherp in Istanbul as hehas confirmed that there is a second Turkish station on my 87.9 clip of Küpe FM and he has IDed it as Bizim FM (Sile), which would be from Sile/Bagarasi at 2606 km:
https://app.box.com/s/aj6k3au2sy163v62iomdtll5yx1b6m4c I wonder if the London pirate on 104.2 is a rebroadcast of this station?
 Good DX.

The frequency in Izmir is still licensed for Dost FM, but I could not ID the station during one week stay. Last year the station identified quite often.
This year there was only music and advertisements.
Originally Dost FM was a small local station owned by a newspaper in Selcuk (south of Izmir, ancient site of Ephesus) until 2013. In 2014 the station moved to Izmir.
Maybe the frequency is still operated by Dost FM (who make money from advertisement), but there is no "normal" programming.
Duru FM was never officially opened. I have not found anything reliable about the station in the web

Hello,

Received on this day several TUR radiostations from Istanbul area.
Among them I received on 90.70 mhz Radio Mehtab.
Anybody who knows the location.

Thanks in advance.

73's

John
Holland

Hi John,
I noted your log in the Visual Logbook. Radyo Mehtap does not list this frequency, but the frequency is officially registered for Edirne in the west of Turkey.
Check FMLIST, I added the frequency.
Kurt

37019. Band II Sporadic E Loggings for 11 July 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-11 18:40:31 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37019

Hi All,

A decent Band II Es opening seemed to be building with signals getting strong and the MUF moving towards the top of the band. Until someone hit a switch and everything was gone from one second to the next.
After all those years, Es keeps surprising me.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Saturday 11 July 2015

Yesterday, afternoon in Budapest I received a station from Morocco (or Western Sahara ?) with full RDS.

Freq.: 91.90 MHz
PI: 1003
PS: SNRT-AMZ

It can be SNRT Al Idaâ Al Amazighia, but at 91.90 in FMLIST I can find only SNRT Al Idaâ Al-Watania :-(

Can somebody help ?

Thank you, and
Good DX !

37022. More unids from the 21st June

Yahoo group: SkywavesDX (2015)
Date: 2015-07-12 19:40:07 UTC
From: John Faulkner, Skegness
Topic: 37022 Message: 37022

The 21st of June is throwing up some fantastic catches. Damla FM seems to be in there on 87.5, or something very similar, plus there are a few snippets of very brief but quite exotic sounding singing on a few other frequencies. But two recordings of interest:

I don't think there is anything to go on with these, but Arabic speaking stations appeared on 90.4 (probably Albania FM, which continues to try to catch me out) and another one on 91.2, which intrigued me. I am more interested in 91.2 as I cannot imagine who this could be with the conditions running in the direction of Moldova and Slovenia/Bosnia. Extending this path would take things into Egypt. The only Tunisian possible is a 1.2 kW Radio Tataouine which I don't believe I have seen logged. I'm sure other stations would have been coming through from Tunisia had this one been coming through. There aren't any station in Libya listed on 91.2 either and I'm sure it's safe to forget about Algeria at this time - 18:04 UTC.

https://app.box.com/s/rb5nimn70ongoghvn1fyveynyooravq4

There was an interesting music station on 92.5 at the same time. The language of the singer sounds quite Balkan to me, so I don't expect this to be anything out of the ordinary, but when the singing stops and the music continues, the quartertones make this sound unusual. I didn't think Balkan countries made use of quartertones in their music. I was asked what quartertones were the other day. Wikipedia explains: https://en.wikipedia.org/wiki/Arab_tone_system and the clip:

https://app.box.com/s/rb5nimn70ongoghvn1fyveynyooravq4

Cheers

John

Hi John. Both links are for 91.2.

It's definitely Arabic as I hear repeated uses of 'Bismillah' which means 'in the name of God', so Qur'anic programming. I'd post it to Real DX too as Tarek in Cairo could possibly help.

90.4 is worth posting as well if it definitely is Arabic.
 Good DX.

Hi Balazs,

This will have been Al Amazighia and will be one of many new stations taken into service in Morocco. Many others have been received by other DX-ers, without any information on the location. The few web sites available are all very much outdated unfortunately.

That's Windows for you. The correct link for 92.5 is:

https://app.box.com/s/aulajnztp7lhe76t5eahzsseboaqw8ha

Now I think about it, there weren't any other Albanian stations coming
in at this time. 90..4 sounds like this:

https://app.box.com/s/zaik773rwfwyg0qwtklwvmrgt0fj2fp1

I will post these to Real DX Nick.

Thanks for this.

John

From: hans.ostnell@...
Topic: 37030 Message: 37030

Hi group!

First message from me here. July 7th 2015, I eperienced a quite good ES opening from my QTH in Vardo to the Tatar region and the Kazan / Ulyanovsk region, south-east of Moscow. I've uploaded a file of a station that I heard on 66.68 MHz (or close to that frequency). File content is a station ID, Weather forecast and station jingle in the tatar language. I think this maybe could be Radio Ashkadar in Ufa, although it's a little bit too far east for te skip at that time - however, I don't find anything else that "fits" the language and frequency. At the same time, Tatar Radyosy in Ulyanovsk and Bolgar Rado in Kazan was strong other frequencies, both in the OIRT and western European FM band.

Anyone who can help me with this one?

Hello Victor!

Many, thanks! Yes, that was also what I beleived. Conditions this afternoon and evening was definetely in that direction from my QTH up here in the arctic.

Obviously not in the tatar language, but still similar - i guess.

Now, I have to try to get a QSL from this one, hihi!

Thanks again and 73!

Hello Jürgen!

No, I haven't experienced any Es-propagation from Iceland, Greenland or arctic Canada. However, I guess atr least Iceland should be possible with Aurora-E. Sporadic E is a rare phenomena up here, but one or two times every year the Es will reach also us up here.

The FM-band is not really that quiet, actually. I frequently hear "semi-local" stations from northern Finland, and also russian stations from the Murmansk Oblast. But, in a few years the norwegian FM-net will be closed (only DAB from 2017), and then the band will be pretty quiet - good for DX ;)

73!

Hi All,

Some increased troposcatter this evening, as well as a return of sporadic E. Which resulted in a stunning day number nine (9) this year with reception from Libya.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi Janpeter. I wonder if Libya are increasing the number of txes or are raising the powers? I had an Arabic OM on 88.3 at around 1730 UTC, and I'm pretty sure it wasn't Algeria, as the one on 88.3 is terribly over-modulated and distorted. The audio on this one was pretty clean. Too weak for RDS alas.
 Good DX.

Funny old day yesterday with several short openings spread right through the day, mostly to Italy and E Algeria/Tunisia. Did look for Libya, but foiled again!

Was pleased to log Belarus for the first time during the Polish opening, in my third season of trying.

This may have been Tunesia Nick. Like you say, the Algerian one is terribly overmodulated, the Tunesian one is slightly undermodulated and the Libyan one is modulated OK, although a bit strong.
My most reliable first check to see if the 88.3 MHz tx is Libya is to verify if the 90.1 MHz tx is also coming in. I am 99.9999% sure that these have the exact same location and power. They always come in simultaneously, with the same fading pattern, the same strength and modulation level. I think that the number of txs has significantly increased since the fall of the Gadaffi regime. At least that is the only plausible explanation for the number of times Libya is being received. In combination with conditions favoring a southeasterly direction this season. I still need to check this, but I may have been receiving Libya more often this year than any other country. 73, Janpeter

Hi,
All three received in S.E.Essex too. The R2 is certainly UT-1 with the logo https://en.wikipedia.org/wiki/Pershyi_Natsionalnyi#/media/File:Firstukraine.png top right. The R3 was weak here too, but strong enough to have been able to see any obvious logo/DOG but I could not see any.

Regards
Tom

Hi All,

A sizeable logbook for today. Which could have been much longer if I had not been out the whole afternoon. A variety of openings could be noted, into many different parts of Europe. The opening into Belarussia and Russia was interesting. With the skip area hardly moving and the MUF reaching Band II for a good part of the opening. The Bryansk oblast was in for a long period. Not many stations to be logged on Band II below 100 MHz though, there are hardly any.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

From: nick gilly
Topic: 35847 Message: 37050

Yes interesting conditions again at times this evening. Radio Msallata from Libya on 88.3 again, for >40 minutes between about 1655 and 1740 UTC. Plus Qur'anic prayers on 87.9 (not Radio Tebessa as I checked the stream) which I suspect was Tarhouna Local Radio. This was much weaker than Radio Msallata. The main opening, apart from Libya, produced signals from Tunisia, eastern Spain, Italy (mainly Sicily) and Malta.

Then briefly around 1915 UTC an UNID station on 87.9 from Turkey with a YL talking. I see that Turkey was being logged in Belgium and the Netherlands around the same time. Not long after that there was a brief burst from Croatia and Montenegro.
The Turkish station will have to wait until after I am back from holidays but I will upload it here next month.
Good DX.

Nick, Whitchurch, Hampshire.

On Thursday, 16 July 2015, 21:09, "Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX]" <SkywavesDX@...> wrote:

  Hi All,

A sizeable logbook for today. Which could have been much longer if I had not been out the whole afternoon. A variety of openings could be noted, into many different parts of Europe. The opening into Belarussia and Russia was interesting. With the skip area hardly moving and the MUF reaching Band II for a good part of the opening. The Bryansk oblast was in for a long period. Not many stations to be logged on Band II below 100 MHz though, there are hardly any.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

An interesting day yesterday, as I think we came close on several occasions to getting an opening on Band 2 - we finally had a 2 hour one in the early evening.

It was predominantly to the central Med, with Sicily, Malta, E Algeria/Tunisia, and finally, finally(!) Libya. The Arabic on 88.3 was not El Tarf, or Gafsa, so I sat and waited till finally the RDS came up.

Logs and map: http://www.fmlist.org/fm_logmap.php?datum=2015-07-16 <http://www.fmlist.org/fm_logmap.php?datum=2015-07-16&omid=2748> &omid=2748

Hi Nick,
Good to see that you are getting your fair share of the summer conditions. With regard to Libya, did you check for 90.1 MHz when 88.3 MHz was coming in? Or is this QRG blocked by a local station at your location.

73, Janpeter

Yes, I was struggling with this yesterday evening and it was only after 10 minutes that I remembered your suggestion to disconnect from dxmaps.
This web site has had a lot of problems lately. So maybe you should change the FMLIST default setting, being not posting logs on dxmaps.

Hi everybody,

some days ago I saw that Andrew received an unknown PI (53BF) on 90.6, during an Es opening to Italy.
It's Radio Bruno (Toscana) from Prato/Poggio Castiglione.

Some of the Radio Bruno Toscana txs, has switched their PI to 53BF a few days ago and just yesterday I've sent the list of them to Fabrizio Carnevalini to change data into Fmlist.

73's!

37062. R 2 Carrier/weak video - possible double hop Thu Jul 16 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-17 09:28:18 UTC
From: davebunyan@...
Topic: 37062 Message: 37062

Around 16:00 to 1620 I was getting three distinct carriers carriers on R2. They were giving weak video at best. The one that I would like a more positive confirmation for is the one I measured at 59.2484 MHz - and I don't like to quote better than 100Hz resolution.

The only offset anywhere close to that is Rossiya 1 from Stepnoye at 3918 km with a listed offset of 59.248698. I've logged it as tentative so it doesn't get lost in the notebook. Interestingly earlier on in the day I received Gluboyke at 1924km and Stepnoye is almost exactly twice the distance and on the same great circle path

So does anyone know of another R2 Tx that would fit that offset +/- 0.2KHz

The second puzzle was on R1 at 16:07 UTC - the poor to fair video suddenly showed a large "21:30" filling most of the screen. If it wasn't for the fact I specifically noted the time from the computer I would be tempted to think it was showing UTC +5:30. Did anyone else get R1 video at that time and could suggest what program it was. I suspect the time referred to something happening in the program being shown (maybe a film/drama). The offset on this transmission appeared to be zero i.e 47.9750

Rgds

David

It seems Gabriel has fixed only part of the problem, DXMAPS sometimes replies nicely again, but with other logs (randomly) there are long delays. John had alerted me last evening just in time, so I could do some live debugging. As a result, you will now always get a feedback from DXMAPS when the log has been posted, on the myFM page:

This page took 0.xx seconds to load. DB time: 0.xxx
DXMAPS return code: OK

If the DXMAPS return code remains empty, it is not good - most likely you will have experienced a 120 seconds timeout.
If there is a specific problem, a message will appear and you should alert me by direct email, cc Gabriel EA6VQ, ea6vq@....

Good DX!

Günter

Thanks Janpeter.
I did check 90.1 at one stage but I was just getting the Basingstoke relay of BBC Radio 2, which isn't overly strong. I should have tried more frequently I suppose. I will do if Msallata comes in again.

Good DX.

Hi Nick,
Good to see that you are getting your fair share of the summer conditions. With regard to Libya, did you check for 90.1 MHz when 88.3 MHz was coming in? Or is this QRG blocked by a local station at your location. 73, Janpeter

Onderwerp: Re: [SkywavesDX] Sporadic E Loggings for 16 July 2015

Yes interesting conditions again at times this evening. Radio Msallata from Libya on 88.3 again, for >40 minutes between about 1655 and 1740 UTC. Plus Qur'anic prayers on 87.9 (not Radio Tebessa as I checked the stream) which I suspect was Tarhouna Local Radio. This was much weaker than Radio Msallata. The main opening, apart from Libya, produced signals from Tunisia, eastern Spain, Italy (mainly Sicily) and Malta.

Then briefly around 1915 UTC an UNID station on 87.9 from Turkey with a YL talking. I see that Turkey was being logged in Belgium and the Netherlands around the same time. Not long after that there was a brief burst from Croatia and Montenegro.
The Turkish station will have to wait until after I am back from holidays but I will upload it here next month.

Good DX.

Nick, Whitchurch, Hampshire.

From: John Faulkner, Skegness
Topic: 37069 Message: 37069

It didn't last too long but TRT FM from Adana on 92.5 was in here at 1729 with RDS. Damla FM also on 87.5 with RDS. Not sure what others until I play back the recordings.

It might still be lurking.

Good DX!

John

37070. Re: [SkywavesDX] Double Hop Alert - Turkey

But who has B0FF PI on 87.5 with partial PS __at_FM_ (from memory - will have to check the recording)?

A 'Middle Eastern singing' station was mixing with Damla FM at the time. Might have been from this. As I say, I need to check my recordings, but TRT FM on 92.5 is 100%.

Thanks

John

Hi Kurt

Yes I do. I have several SDR files too. There were three (maybe four) stations on 87.5: Damla FM; the mystery B0FF; Kuzeyin Sesi Radyo Vatan from Cyprus.

I had to go out in the middle of this opening unfortunately, but I left the S2 recording. At 1842 there was a good opening into Istanbul with full PS names up to 93.3.

I iwll get a recording to you in the next few minutes. I need to check through the files.

Thanks

John

37078. Re: [SkywavesDX] Double Hop Alert - Turkey

Yahoo group: SkywavesDX (2015)
Date: 2015-07-17 20:55:32 UTC
From: John Faulkner, Skegness
Topic: 37069 Message: 37078

Only pop music was heard from the station with B0FF PI and __at_FM_ PS name, Kurt.

Here is a recording of 87.5.

https://app.box.com/s/f8pjlmq4dte6sftcbtqnvgahssp42eb4

The first part of the recording was made at 1730. Presumed Damla FM at this time but with an UNID language mixing.

The second part you hear a pop song "I'm begging you to rescue me". This was at 17:33. This is the station which had the PI code B0FF and a partial PS name of __at_FM_

The third recording - at 1803 Damla FM returns, not quite strong enough for RDS at this point, but it RDS'd several times over the next hour or so.

I don't know if this can be solved, but thank you for listening again.

John

Thanks to the heads up from Andy.W
I just got Pal FM on 87.5 @3409Km/2122 miles (Double Hop)
WOW!

Subject: Re: [SkywavesDX] Double Hop Alert - Turkey

But who has B0FF PI on 87.5 with partial PS __at_FM_ (from memory - will have to check the recording)?

A 'Middle Eastern singing' station was mixing with Damla FM at the time. Might have been from this. As I say, I need to check my recordings, but TRT FM on 92.5 is 100%.

Thanks

John

On 17/07/2015 18:47, 'John Faulkner, Skegness' john.faulkner@... [SkywavesDX] wrote:

It didn't last too long but TRT FM from Adana on 92.5 was in here at
1729 with RDS. Damla FM also on 87.5 with RDS. Not sure what others
until I play back the recordings.

It might still be lurking.

Good DX!

John

John,
I am not 100% sure, that the song at the beginning is turkish, the language sounds slavic to me. The second part also does not sound like a turkish station on this frequency to me. The third part could well be Damla FM. 100% turkish.
regards
Kurt

From: John Faulkner, Skegness
Topic: 37069 Message: 37081

Thank you Kurt.

Yes, the third part was 100% Damla FM. This RDS'd for a while.

I have several SDR files of this evening's Turkish reception, including RDS from TRT FM from Adana on 92.5. I had GOOD levels from Istanbul stations at 1843, every 200 kHz, between 87.5 and 93.3, virtually all with all with RDS. I will upload these files overnight.

I never expected I would ever hear Istanbul like this. Plus Adana and Lefkosa, Cyprus, this has been an amazing day in a season which has gone from one extreme to the other.

Some vocal and jingle IDs which I caught:

88.4 Lalegül FM, Istanbul 1843 17-07-14
https://app.box.com/s/x7xms0kqb8f6wh49ost8upkxpe5cvium
91.2 Radyo Slowtime, Istanbul 1843 17-07-15
https://app.box.com/s/6lo4is6eb2v64hgxi2fo2fqlfo5bv4nb
90.0 Radyo Viva, Istanbul 1843 17-07-15
https://app.box.com/s/4ztmgizpxmsev9bymi83sd67ryoi93t9
89.8 Show Radyo, Istanbul 1843 17-07-15
https://app.box.com/s/q6tw19lieowtzdxpc3xtupyp6qhvk3vm

Regards

John

Hi John,
Congratulations to your excellent recordings of Istanbul stations.
Unfortunately all these 103 frequencies are transmitted just at 7 km
distance from my QTH. No place for DX!
Since a long time I had a DX openig on 27.June during my holiday. I
received and recorded the stations with my Samsung GT-C3053 mobile phone
inside the hotel room, Additionally I used my Sangean ATS 909 to check PIs.
See:
http://www.fmlist.org/fm_logmap.php?datum=2015-06-27&omid=2209&band=ALL
regards
Kurt

37083. Re: [SkywavesDX] Double Hop Alert - Turkey

Yahoo group: SkywavesDX (2015)
Date: 2015-07-17 23:49:08 UTC
From: John Faulkner, Skegness
Topic: 37069 Message: 37083

Thanks Kurt.

Such a shame you have so many stations on your FM dial. But fantastic choice for 'ordinary' listeners.

This was the best Es opening I have had in Skegness. It is a pity I had to go out before it peaked, but I was able to leave the S2 recording.

Even while I was driving through town, I could hear Damla FM on the car radio.

I am still adding stations to the log:
http://www.fmlist.org/fm_logmap.php?datum=2015-07-17&omid=2149&band=ALL&target=ALL&rxin=ALL

As you will remember, I have never received Turkey on band 2 here, until this summer! Now I have received Turkey on six days. It is amazing how conditions can change. But I think I now have the 'formula' for receiving Turkey - every time this happens I have good reception of the Austria/Hungary border area. Many low power stations from Austria and Hungary were received this evening. This is a pattern I will look for in the future.

Just one more recirding for this evening .... 91.6 unid 1843 17-07-15 https://app.box.com/s/e4mgc2dwf4fsk0takjcwjxagc4p7ci2z Would this be Radyo Nur?

Best wishes.

John

37085. Re: [SkywavesDX] Double Hop Alert - Turkey

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 08:31:42 UTC
From: Kurt Zscherp
Topic: 37069 Message: 37085

Hi John,
91.6 unid 1843 is Radyo Nur. 100% identified because of the hum!. The have only religious talk, no music, no RDS and rarely an ID.
95.8 unid 1729 seems to be a religious station, but no suggestion
96.4 unid 1729 sounds like "Türkü music", no idea about the station
Kurt

37087. Sporadic E Loggings for 17 July 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 09:55:31 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37087

Hi All,

A fascinating sporadic E day yesterday, with the MUF reaching Band II pretty much around the clock. Several Es clouds were present, all of them at an unfavorable location to bring me a lot of DX.
For a short while the band went crazy. If you take a look at the four loggings on 89.9 MHz, these were all made within the time frame of two minutes. I was entering the first logging, when this tx disappeared and the next tx came through, then the third and then the fourth. All with big signals and full RDS. If I would have had an AirSpy, I may have been able to extract 50-100 loggings from the recording for these two minutes.

Who knows the site for the Radio LatteMiele station on 89.9 MHz? I have received it three times and it must be running several kW's. It has been active since last year.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

37088. FM Band 2 logs 17th July

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 10:05:37 UTC
From: Jim Smith G0OFE
Topic: 37088 Message: 37088

Another pretty good day of Es - I think July has been better than June so far.

Managed to get another monkey off my back with the reception of RNE Clasica on 87.7 from the Canaries, during the morning Portugal opening. First reception of Canaries in my third season of trying.

Sadly I was too far south to be able to partake in the wonderful evening opening to Turkey and Cyprus experienced by more northern UK stations.

Logs and map: http://www.fmlist.org/fm_logmap.php?datum=2015-07-17 <http://www.fmlist.org/fm_logmap.php?datum=2015-07-17&omid=2748> &omid=2748

==========

Jim, Bournemouth, Dorset. IO90BR.

Elad FDM-S2, Perseus/FM+ and Funcube Dongle SDR Recievers

8-element OP-DES for Band 2, 12-ele ZL Special for 2m, plus wideband vertical.

37089. Skegness SDR Files: 2015-07-17 (Turkey)

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 10:38:29 UTC
From: John Faulkner, Skegness
Topic: 37089 Message: 37089

Three Turkish files from the evening of July 17th.

The first file has Istanbul stations at fair to good levels between 87.5
and 93.3.
http://www.mediafire.com/download/9eel9wkobc9oi7b/2015-06-22_1843_(Turkey).ape

The second file has Istanbul stations up to the top of the band, but
only a few of them were strong enough for RDS on this one.
http://www.mediafire.com/download/60p2fhq9ol1kq5h/2015-07-17_1727_(Istanbul_-_TOB).ape

The third file captures the moment when Adana was received on 92.5.
http://www.mediafire.com/download/ra99nxlbli1803g/2015-07-17_1729_(Adana).ape

Also in these files you will hear low powered Hungarian and Austrian
stations, perhaps with occasional 'exotics' behind them.

As usual, you'll need to decompress the file with the Monkey's Audio
tool. http://www.monkeysaudio.com/

Good DX!

John

37090. Re: [SkywavesDX] Double Hop Alert - Turkey

From: John Faulkner, Skegness
Topic: 37069 Message: 37090

Thank you for listening again Kurt.

I discovered another Istanbul opening at 1727 where signals reached the top of the band.

My SDR files are almost uploaded. Links to follow shortly.

Best wishes.

John

37091. Re: [SkywavesDX] Skegness SDR Files: 2015-07-17 (Turkey)

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 12:16:30 UTC
From: John Faulkner, Skegness
Topic: 37089 Message: 37091

I am uploading the first file again as accidentally uploaded an older
file. The second two are correct.

One day I will get things right FIRST time. Maybe.

John

37092. Re: [SkywavesDX] Skegness SDR Files: 2015-07-17 (Turkey) AMENDED

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 13:42:01 UTC
From: John Faulkner, Skegness
Topic: 37089 Message: 37092

I have amended the first link. All three links now correct:

Three Turkish files from the evening of July 17th.

The first file has Istanbul stations at fair to good levels between 87.5
and 93.3.
http://www.mediafire.com/download/e98k9ung2rtdzfd/2015-07-17_1943_(Istanbul).ape
<http://www.mediafire.com/download/e98k9ung2rtdzfd/2015-07-17_1943_%28Istanbul%29.ape>

The second file has Istanbul stations up to the top of the band, but
only a few of them were strong enough for RDS on this one.
http://www.mediafire.com/download/60p2fhq9ol1kq5h/2015-07-17_1727_(Istanbul_-_TOB).ape
<http://www.mediafire.com/download/60p2fhq9ol1kq5h/2015-07-17_1727_%28Istanbul_-_TOB%29.ap
e>

The third file captures the moment when Adana was received on 92.5.
http://www.mediafire.com/download/ra99nxlbli1803g/2015-07-17_1729_(Adana).ape
<http://www.mediafire.com/download/ra99nxlbli1803g/2015-07-17_1729_%28Adana%29.ape>

Also in these files you will hear low powered Hungarian and Austrian
stations, perhaps with occasional 'exotics' behind them.

As usual, you'll need to decompress the file with the Monkey's Audio
tool.http://www.monkeysaudio.com/

Cheers

John

** Personal 'First'

Unquestionably, the best day of the season here so far and a
record-breaker in several ways.
*
**717 stations were received from 24 countries: *

Albania
Austria
Bosnia & Herzegovina
Bulgaria
Vatican
Czech Republic
Germany
Spain
France
Hungary

Croatia
Italy
Moldova
Macedonia
Montenegro
Morocco
Poland
Portugal
Romania
Serbia
Slovakia
Slovenia
Tunisia
Ukraine

I recorded my largest number of personal firsts today with 308 new stations and/or frequencies being received (excluding UNIDs). This was largely thanks to receiving different areas of Italy to the usual, but even so, I am amazed by how many previously unlogged stations came through. (I used to hate the Italian openings because of the uncertainty regarding determining the sites, but I love this now as this aspect is MUCH easier to work out with an SDR receiver.)

Most of the above just wouldn't have been possible were it not for the excellent Elad FDM-S2 SDR receiver.

* There were some super-short Es at 1637 when Germany came in, bringing me my shortest Es skip to date, with NDR Kultur from Hannover on 98.7 at just 640 km! The signal was good too with full RDS.

* At times, signals from Moldova and Romania were mixing with Spain, Italy and seemingly everywere else in the Balkans.

* A phenomenal number of flea powered signals came through.

Recordings:

I also got carried away with recordings since I heard lots of station identifications this time and some of the catches were quite rare. I couldn't resist getting them for my collection. Again, this is much easier to do with an SDR receiver, time permitting of course, and I am really enjoying taking a more leisurely approach with the recordings from this year's Es. It's really paying dividends. Here are a few:

37094. Sporadic E Loggings for 18 July 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-18 20:09:34 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37094

Hi All,

A wild Band II opening into Spain this evening. Difficult to catch ID's with very fast fading and signals being generally weak.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Wow John, amazing! I have never ever seen something like this. You can count on me going through your logbook carefully, but it is going to take a while :-)
And I will be buying an SDR for sure. First will be to test an AirSpy.

73, Janpeter

I know. It's completely ridiculous Janpeter. It takes things to new extremes, or 'heights', however you want to look at it. I have never known anything like this, but I knew this was coming. Not everybody favours SDR receivers as they are changing the way we DX. It's fun, but it's quite hard work when I am trying to juggle this with other things.

The SDR receiver transformed medium wave DXing for me. Now, new doors are opening on the FM band, but it is not possible to go through things quickly and I find that regrettable. You don't miss a thing with SDR recording - at least, not in the chosen bandwidth.

The 22nd is likely to have another large logbook as Italy was in control for much of the day. But I have been urged to take a look at the SDR files from yesterday evening, the 17th, 'striking while the iron is still hot' so to speak. I am hoping there may be some other exotic catches in those files.

Good luck with AirSpy. I will be very interested to read your review on this.

Cheers

John

YT User SkegnessDX makes an Istanbul bandscan in the UK via Es.
IQ WAV rec made in Elad SW2 software. Playback in SDR# (freq not displayed correctly, first station is on 87.5 MHz, then in 200kHz increments).

Confirmed Reijo, Debar/Stogovo to be precise.

One year ago I distributed the nation wide transmitter listing for this station. Apparently this has not been picked up by the FMLIST editor.

73, Janpeter

Hello,

the language is not Serbian, in first recording is mentioned "Varna", and it is in Bulgaria, it must be Bulgarian, the spoken numbers are similar to my language (Croatian) but with slight accent to Russian or Macedonian.. It's Bulgarian language.

Hope I helped.

I've finally got the native Elad software to work with RDS Spy.

An Elad FDM-S2 IQ WAV file of Es (SkegnessDX)
playback in
(i) FDM-SW2 (with RDS Spy)
(ii) SDR♯ /RDS Spy vis MPX plugin.

Comparison: FDM-SW2 (RDS Spy) versus SDR♯ (RDS Spy) https://youtu.be/CXvTd1s1WHQ

37106. Lebanon Received! Plus UNIDs

Yahoo group: SkywavesDX (2015)
Date: 2015-07-19 19:43:38 UTC
From: John Faulkner, Skegness
Topic: 37106 Message: 37106

This season is continuing to throw up some unexpected goodies.

I have given my 17-07-15 files precedence over older ones from last month and came across an Arabic station on 92.9 with a PI code of A292. I almost fell off my chair when I discovered it was Sawt el Mada from Aabey in Lebanon! This is listed with 48 kW and is 3512 km from Skegness.

92.9 Sawt el Mada, Aabey 1724 17-07-15
https://app.box.com/s/ciyrataqf43nlxve20gcke6bgejchsny

Some other interesting stations were received around this time. 87.8 is of particular interest. The other two are probably Balkan.

87.7 unid ID 1719 17-09-15
https://app.box.com/s/9mt9pzlutadn1s5igiwpz2jg6p5st52o
87.8 unid language 1719 17-07-15
https://app.box.com/s/cdq1ixtdvs9wx6auumfkkvnjkkx26r9a
89.0 unid ID 1717 17-07-15
https://app.box.com/s/8isz6mc1g2nd7az5erf7s1cx7t1koql4

Date: 2015-07-19 20:10:16 UTC
From: Janpeter van Dijk
Topic: 37097 Message: 37108

Hi All,

This is one of the most impressive DX video's I have ever seen. This is indeed like a local Istanbul bandscan. With the occasional BBC interference. Fascinating to see in the upper half on the left side, all stations reaching their maximum strength at the same time.
This is indeed DX-ing 2.0, a completely different ballgame.

Onderwerp: [SkywavesDX] Istanbul FM Bandscan made in the UK :)

YT User SkegnessDX makes an Istanbul bandscan in the UK via Es.

IQ WAV rec made in Elad SW2 software. Playback in SDR# (freq not displayed correctly, first station is on 87.5 MHz, then in 200kHz increments).

Hi John,

Once more congratulations! This time with Lebanon. I would suggest you now go for the triple hop stuff, double hop must be getting a bit boring for you :-)

The 89.0 MHz tx is Class FM from Hungary. The 87.8 MHz clip is interesting indeed. It is a Turkish sounding language, but not Turkish. Seems more towards the Azerbeidzjan region. There is also an intreguing German tx underneath, but that could have been tropo.

The 87.7 MHz might be more interesting than you think. It is either Turkish, or the same language as 87.8 MHz.

This is all I can make of it.

Wow. Congratulations again John! I said there might be some interesting stuff hidden in there.

If the language on 87.8 is not Turkish, then could it be Kurdish? This is spoken in eastern Turkey and northern Iraq and would possibly be more in line with the other reception than somewhere like Azerbaijan or similar.

Good DX
Nick, currently in Exeter, Devon

Well it shows it can happen, even here. The strength of the Istanbul
stations was completely unexpected. This was recorded by the S2. If only
I didn't have to go out. But I heard more than I could have dreamed of.

Thanks for Class FM. But Azerbaijan??? Surely not?

The German is Austria, confirmed with RDS later. Some surprising low
powered Austrians coming in at this time. Many more recordings to check.

Thanks Nick.

Now you're pushing it. ;O) I suppose it can happen. I am inclined to think anything can happen after this. I would never have believed it. I had almost given up on thinking double hop would grace the Skegness coastline.

Cheers

John

87.7 most likely Radyo 24 (radyo yirmidört) from Istanbul
87.8 religious station turkish mixed with arabic phrases and typical music,
most likely Bayram FM from Gebze (about 40km east of Istanbul)

37119. Re: [SkywavesDX] Lebanon Received! Plus UNIDs

Yahoo group: SkywavesDX (2015)
Date: 2015-07-19 21:53:48 UTC
From: John Faulkner, Skegness
Topic: 37106 Message: 37119

Thank you Kurt.

I hope you can find the mystery ID on 95.5.

I am now up to 1726 in my recordings from the 17th and I have found another batch of fair signal Istanbul stations between 98.8 and 104.5 MHz, plus a few other interesting stations.

Tonight, I will upload my Cyprus and Lebanon SDR files, plus this new batch of Istanbul catches.

This is crazy!

John

I just identified Radio Asya from Gebze on 101.7 - at the same time, so this seems very likely.

John

95.5: there is some kind of ID, "En baba radyosu, doksan besh nokta besh (,95.5). This phrase is often used with stations playing "arabesk" music. The only listed station in the southesat is Mesk FM from Adana. The yare playing that kind of music. I listened to their webstream for quite some time tonight, They announced their frequency quite often but never used the phrase "en baba radyosu".
That is my best guess
Kurt

87.8 Bayrak Radyo ist the first national radio (governmental) program in
the turkish part of Cyprus. Definitely NO RELIGIOUS station!
Regards

Thanks Ruud, Kurt & Gianni.

Logic says that Radio Bayram is probably the station on 87.8. Gebze was received on 101.7 at the time. I am tempted to log this as "presumed" but there's such a lot happening that I ought to wait until I catch a more definite ID from this.

Regarding 95.5:
I guess this one may get away, but I cannot be disappointed with all the other Turkish catches I have had - all 42 of them!

I will post links to these SDR files tomorrow.

Thank you all again.

Best wishes.

John

"Radyolari-miz-da" is no ID, but means "on our Radios" (Radyo-lari=Radios, miz=our, da=on - It is one word). From the type of music and presentation this must have bee Zemzem FM from Istanbul

Hi folks

This is my first post. Probably pretty small beer. But I am picking up a French station at 98.05 FM here in Slough. Aerial looking towards Wrotham.

The station appears to be playing a bit of jazz music and plenty of talk. Au Francais, naturellement.

Bon nuit, mon aimis.

Thank you Kurt.

Zemzem FM has already been identified with full RDS. I thought this was a different station.

I will slow down now :O) Time for bed.

Regards.

John

  This season is continuing to throw up some unexpected goodies.

I have given my 17-07-15 files precedence over older ones from last
month and came across an Arabic station on 92.9 with a PI code of A292.
I almost fell off my chair when I discovered it was Sawt el Mada from
Aabey in Lebanon! This is listed with 48 kW and is 3512 km from Skegness.

92.9 Sawt el Mada, Aabey 1724 17-07-15
https://app.box.com/s/ciyrataqf43nlxve20gcke6bgejchsny

Some other interesting stations were received around this time. 87.8 is
of particular interest. The other two are probably Balkan.

87.7 unid ID 1719 17-09-15

37139. Updated File Player for SDR# - "the holy grail of players"

Yahoo group: SkywavesDX (2015)
Date: 2015-07-20 11:43:07 UTC
From: davebunyan@...
Topic: 37139 Message: 37139

An updated version of the new file player appeared two days ago on rtl-sdr.ru
фантастический

It's THE must have file player - it has a waterfall display which you can click on to select the time and frequency - so you can click a burst of MS for example and if you are linking SDR# to RDSSpy using the MPXOutput plug-in from this same site - 'bingo' the RDS will appear if it is there.

The real time will appear on files recorded in SDR# and if you use the most recent base-band file recorder from the same web-site you can record BIG files and the real time will appear. I've played back a file made on HDSDR it works fine except for not showing the real time.

Choosing the maximum resolution for the waterfall an 8GB file took 10 seconds to load. The screen shot shows an 8GB file - recorded from an RTL dongle with 2.4MHz bandwidth

The waterfall appears on the left and side but I've dragged it across to maximise the size for obvious reasons. I've shown the toolbox with the settings used. The "frequency control" has to be ticked if you want to choose a point of interest.

http://skywavesdx.org/download/file.php?id=195&mode=view

Try it out - is it as good as I think it is?

Posted to this forum for completeness

From: davebunyan@...
Topic: 37127 Message: 37141

Don't forget the cheaper SDR Play RSP - I'm not saying it is better than the Elad 'cos I haven't got one to compare it to but I'm really getting loads from it.

John - if you save your pennies you could buy one and then have both the Elad and the SDR running in parallel the same way I have the SDRPlay and an RTL dongle running at the same time. That will be whole 13.4 MHz of bandwidth!

One of the things that is very evident with having an SDR is the way that whole clusters of signals from a small area - even a single site - appear for a very short time. For example I got eight stations from Ymittos in Greece in less than 2 minutes. It wouldn't surprise me if you find even more Lebanese stations at the same point in time. How long did the reception last?

My preferred mode of operation, at the moment, is to use Jeff Knapp's FMSuite high speed scanner. On a quiet band it can do a scan in well under a minute and with a pause time of 6 seconds will grab pi codes like there's no tomorrow if anything appears. It's usefulness can be seen in my log files on FMList - and like you I'm finding it takes quite a while to go through and do the loggings. I only finished the files from the 7th July yesterday.

However as I've just posted there is an updated version of a wav file player on rtl-sdr.ru which gives you a waterfall display and the ability to click on the point of interest - so you can pick the time/frequency in the downloaded file and listen/check for RDS data very quickly. So I might do some recording during an opening - especially as the file size of their baseband recorder can go to huge. (8Gb gives 4 min 20 sec for 8 MHz B/W)

BTW I know the RTL dongle has it's limitations - but hey! - look at all the Finnish stations I got on it while the SDRPlay was grabbing stuff from another direction. Something is always better than nothing.

Rgds

David

Thanks Dave. Things like this are all on my 'to do' list. There are lots of software add-ons I need to check and I will sit down one day (when??? !!!) and look at the available options.

Very tempting. I could do with this for meteor scatter as it should help me to identify some of the multi-tx sites.
>

> long did the reception last?

I am about to publish links to the file with Lebanon in. The band seemed comparatively quiet at the time. I will post the links here shortly - I can see that the last of the four files is almost uploaded.

As for how long the reception lasted? It was quite brief. Just the back end of one of the files and the first few seconds of the following file (which I haven't uploaded at this point). There were several 'exotics' creeping in when the Europeans faded. You can hear snippets, so chances are there could be some more Lebanese or other Middle Eastern DX to be identified. You might be able to dig out some RDS which I couldn't. DXers in central Europe would probably have a better understanding of these eastern conditions and might spot a thing or two, so here's hoping they might recognise something we wouldn't.

Cheers Dave,

John

Are you sure? ;)

8 + 3.2 =11.2 MHz (max bandwidth)

7.2 + 2.88 = 10.08 MHz (allowing for 10% total loss at the edges)

Hi Peter,

- I meant an Elad and an SDR Play with a useable bandwidth of 7.4 MHz for8MHz sampling rate. But even so I can't add up as the Elad is effectively 5Mhz - so its actuallly 12.4MHz.

I never use the RTL at 2.88MHz - some nasty aliasing and the same at 2.4MHZ. I prefer 1.024 MHz b/w.

Rgds

David

got to go - Italy just appearing!

I get almost 6 MHz on recordings on my S2. I forget what I did to increase this (just looked around but cannot find it) but the recordings used to be just 5 MHz. anything above 6 MHz and you get the foldback effect, so you have to ignore what comes in at the extreme edges of the band.

I wonder if software will ever increase the bandwidth of the S2? I suspect it is already up to its maximum physical limit. Just curious.

John

37149. UNID Hungarian 87.5

Yahoo group: SkywavesDX (2015)
Date: 2015-07-20 14:48:30 UTC
From: John Faulkner, Skegness
Topic: 37149 Message: 37149

At least, I *think* it is Hungarian. The PI code is B0FF and the partial PS name is __at_FM_ I mentioned this a few days ago but nothing has come back. It seems odd that a Hungarian operates is out of band like this. Or could this be something more exotic? The station was playing English pop music at the time.

Hi Jozsi,

87,8 MHz russian with syrian news.

If it was recorded last Friday between 10:00 and 10:30, it could have been Bayrak International from Cyprus.

87,9 MHz ID at 0:35

The ID sounds like Uhud FM, which is a religious station broadcasting all over Turkey.

But this frequency is unlisted and unregistered.

88,0 MHz kurdish ?

This is Farsi. No ID

89,4 MHz ID at 0:04 - "Sawt al ..."

I think this is not Sawt al but Thawra which means revolution. The male voice at 0:10 mentions “Shark al awsat” = Middle East. Maybe somebody speaking Arabic could help.

From 0:18 onwards Turkish + ??. The music after 1:00 is Kurdish, mixed with Turkish talk.

90,1 MHz kurdish ? - ID at 4:09

These are advertisements in Kurdish with mobile phone numbers from Iraq. At 3:43 Zaxo is mentioned (Dohuk province near the Turkish border). I think there is no ID but something like Radyiokhabir (radioNews?). Reklam was mentioned shortly before.

Regards

Kurt

37153. UNID Arabic 87.6

Yahoo group: SkywavesDX (2015)
Date: 2015-07-20 16:33:45 UTC
From: John Faulkner, Skegness
Topic: 37153 Message: 37153

I hope I am not posting too many recordings, because I keep finding them.

Here's another one of an Arabic station on 87.6 with a phone in. The modulation is quiet and different from anything I have heard on the frequency from North Africa.

87.6 unid Arabic 1732 17-07-15
https://app.box.com/s/9fyvjo3zlqv9zwxhwaq63xs3scbu97bb

Not sure if there is an ID 2' 06".

Thanks

John

Hello Peter.

Thanks for this. Yes, I do already have this one in the log. I am checking more files from the 17th right now. You can see the progress at http://www.fmlist.org/fm_logmap.php?datum=2015-07-17&omid=2149

Cheers

John

37155. UNID Arabic 90.7

Yahoo group: SkywavesDX (2015)
Date: 2015-07-20 18:12:02 UTC
From: John Faulkner, Skegness
Topic: 37155 Message: 37155

90.7 unid Arabic talks 1734 17-07-15
https://app.box.com/s/2ll9gpm8a5uiubkxfd875pfcra5hq0rp

Not long after this time Algeria started to creep in, so I am hoping this final Arabic file is not them. I hear Arabic with French words mixed in. Lebanon? Or maybe it is Algeria.

Thanks again.

John

Hello John,

I forwarded your mail to the hungarian forum. I got an answer: PI: B0FF
PS: _Rat_FM_ - this is a low power weekend radio in area north of
Budapest. It is operated at different time on different frequencies, it
is a not licensed station.

Congratulation, it is an excellent catch!

regards,
Jozsi from Hungary

OK John,

I checked your online logbook but couldn't find this one:

92.600 HNG Siófok / Balatonszeplak Som hu Part FM s 1.000 Nv 18e00/46n53 108 52 55 B00B

file: (http://www.mediafire.com/download/ybffl2yu5j20pfu/2015-07-17_1724_%28Lebanon_92.9)

The song was Maria by Blondie, then the B00B suddenly popped out. ;)

Very difficult to get this PI. I tried making a video but the PI wouldn't show again

Peter

Actually Lake Balaton Hungary could well be the touch down for your Lebanon double hop.

I meant to add that I assumed that the PI B00B was a falsie, but FMlist PI look up showed it as genuine.

Part FM and the Lebanon station are in simultaneously on your IQ WAV file.

Brilliant videos as always Peter.

I didn't see these at all. I think my mind was concentrating on the Istanbul stations.

This highlights how easy it is to miss a chunk of the band, as I occasionally do. I sometimes go back over a file and realise I have missed out a large chunk of frequencies.

37170. SDR# and Airspy

Yahoo group: SkywavesDX (2015)
Date: 2015-07-22 02:27:21 UTC
From: Marc Vissers
Topic: 37170 Message: 37170

Recently purchased an Airspy and use it together with SDR#. Works great. The RDS-reception on SDR# however is terrible, to say the least (only strong stations), that's why I use the MPX-plugin and RDS Spy. That works like a charm. At least it always gets the PI-code quickly, the PS-code a bit later with stronger stations. I did mention that on the SDR#-group (I said it was 'lame' and RDS Spy did a better job), but got banned for that, not even calling names or other things. The guy, Youssef behind SDR# and Airspy, is not really cooperating on such things. You'll be warned making contact with him or posing questions, sometimes answered with a pollite 'sigh'. He's got what you call 'a big ego' and you don't want to be too critical. You've been warned. Sad to see these things happen in 2015.

73, Marc

37174. More recordings from July 17th. Cyprus?

Yahoo group: SkywavesDX (2015)
Date: 2015-07-22 10:56:48 UTC
From: John Faulkner, Skegness
Topic: 37174 Message: 37174

The band was open to Lefkosa at 1825 and 1832. It looks like the band might have been open to Mount Olympos and Nicosia too. Some interesting stations caught on ...

88.6 unid Greek 1832 17-07-15
https://app.box.com/s/ym8j3vanfywko44864vdexfugfohzg2k

92.8 unid Greek(?) 1825 17-07-15
https://app.box.com/s/3qfyubchuu54x6zrf2jgytja4xzebu13

93.3 unid religious singing 1825 17-07-15
https://app.box.com/s/yzo4enqykesgxj7sn8nqgofqpzej6w8u

91.1 unid English mixing Steinkimmen 1825 17-07-15
https://app.box.com/s/9kc3hz66nnop5fwkeu59x8hkks14zuxo

I'm fairly certain that 91.1 is CyBC-RIK Radio 2 from Mount Olympos. The English talk peaks quite clearly at times and manages to topple Steinkimmen.

If 92.8 is Greek, which I am unsure, perhaps this is also Mount Olympos.

93.3 has religion. Would fit with Nicosia.

Not sure who or where 88.6 could be from, but definitely Greek.

Peter wondered if my 92.6 was Cool FM from Lefkosa. I will upload a clip of the song in case it is in Greek, but there's nothing to go on. My guess is that this is NPO Radio 2 from Ijsselstein, but the fades 'sort of' coincide with the Cypriot stations. I think it's too stable compared with the the rest of the Es though. Here is a recording of the song:

92.6 unid pop song 1826 17-07-15
https://app.box.com/s/15r42vr96e971cztxm0kolep1lnns2du

Thanks.

John

Yet another file from prolific Lincs UK based FMDXer and youtube user SkegnessDX, aka John Faulkner who lives on this forum apparently :)

Big Balkan opening at the end of the file with a lot of juicy RDS.

Screencast-O-matic highlights the mouse cursor so you can see me adjusting the Zoom FFT filter.

I do and I did. Here is mine, FWIW...

http://www.wtfda.org/sdrplay.html

On June 29 during our only decent skip opening here I had to record
about 45 minutes of spectrum from 88 to 96mhz using SDRPlay and SDR#
since I wasn't able to DX live. I'm glad I did.

I don't see much, if any, difference in sensitivity between the Elad
(with a preamp) and SDRPlay without one. Selectivity is great with both
of them.

I just bought a new laptop, an HP i5 2.5ghz and SDRPlay w/SDR # runs
very smoothly with it.

Thank Ruud.

I'm pretty sure these are Cyprus stations. 91.1 just seems to confirm
the other frequencies in a way. Well, not 92.6 perhaps :)

No RDS was received from stations other than 87.5.

Hopefully Thanos may come in and give us a translation.

Best regards

John

This should be of interest to you SDRplay - Reviews http://sdrplay.com/daveb_sitt.html

http://sdrplay.com/daveb_sitt.html

SDRplay - Reviews http://sdrplay.com/daveb_sitt.html FM DXing results from Sittingbourne, Kent, UK Tropo reception conditions were projected to be good on Tuesday 10th-Weds 11th February 2015.

View on sdrplay.com http://sdrplay.com/daveb_sitt.html
Preview by Yahoo

Since then I have moved onto SDR# rather than HDSDR because SDR# + RDSSpy gives better sensitivity than HDSDR# + RDSSpy and there are plug-ins like Andy's RDSDataLogger. Also HDSDR seems to have a lot more spurii than SDR# which might affect performance.

At the time of the above review SDR# wasn't automatically correcting the I/Q but SDR play worked on the EXTIO and restored the operation.

I too find something decidely 'off' with SDR# forum especially the contributor "sdrsharp" who appears to have an attitude. But on the other hand Youssef has provided some very helpful insights and responded very positively to the question as to whether an unfiltered MPX output could be provided - a plug-in from rtl-sdr.ru appeared a couple of days later. Sometimes I wonder if there is a translation problem and genuine questions come over as confrontational.

you could also search conversations for "SDR Play" on both verions of the skywaves forum for more info

Rgds

David

> weak
> spurs in the empty parts?

When the spectrum is set for 82-90 I see one on 82.9.
When I set it to 106-114 I have one very very weak one on 112.8 and one
more stronger one on 112.10.

When set for 108-116 the spectrum is clear and all I have is aircraft.

> Check the 70-82 Mhz range in 8Mhz steps, to see if there are any 88-108
> spurs.

70-78 is clear. 78-86 is clear.

On the FM band there are two or three but I just move the spectrum over
200 or 400khz either higher or lower and they are gone. I have about
twenty strong local stations (15-25mi)with all of them south of my
location except for three(10-20mi north). My antenna was pointed south
into my locals.

Hello everyone,

I received what I presume to be an Arabic station during an E Skip opening that went mostly into the Balkans on the 21st of June this year. I think Italy later made an appearance as well as Tunisia.
Maybe it might be Algeria that made a momentary appearance but I don't know. The thing is this is more or less on the same frequency range that I received a station with Coran prayers a year or two ago when there was also an opening to the Balkans at the same time. Here is the video link. It is between 4:34 to 5:05...

E Skip in UK, Balkans & eastern Europe 21/06/2015
https://www.youtube.com/watch?v=uha8tYcmAfs

All I could get was the music played here. Any help is appreciated.

sleeper77, Southampton.

Hi cedric,

I am somewhat surprised, there is no feedback.

All I know is, at least two finnish listeners have this SDRplay gadget, and for what I know they are all satisfied with it. I wish they read this forum and posted their comments.

I bought one, some three months ago, but I have not taken it in use. I only have i3 PC's, and I do not believe they are powerful enough to record and play back. Felt reluctant to buy yet another laptop, for just DX purpose, even though I already bought some teras of USB storage for the very. What interests me most is, whether the box stands the 30 kW tx, two miles to my N.E.

Anywhay, last spring I was considering whether it is the Airspy or the SDRplay, and having studied various forums I ended up with the latter. Would not know whether she is a fine radio, I still tune with the mod'ed Yamaha TX-530 of 1990, as in my QTH there is no band wor bdwtdh wider thas 80 kHz :)

The Funcube and straight Realtek 2832[U] dongles as such, I consider more of a joke, buying cheap c[l]ap never even crossed my mind.
.

BTW:
If any of you wondered my MS-logging 88.3 France Inter, Carcassone 2615 km, this morning, I also felt foolish logging. Yet, this very 79 kW tx pinged to me also in Aug-Sep 2013, back then with heavy tropo conds all the way. This morning, there only was noticable tropo in France, yet France Inter on 88.3 pinged for some 4 seconds. This very transmitter is the only one, having carried to me as tropo-enhanced MS, say beyond 2.300 km. And I simply do not know why. And yes, I am familiar with MS since the 70's, having been quite keen on it.

37194. 87.5 Pal FM jingle ID and unid possible ID on 91.1 ....

Yahoo group: SkywavesDX (2015)
Date: 2015-07-24 22:59:30 UTC
From: John Faulkner, Skegness
Topic: 37194 Message: 37194

Continuing with the S2 files from the 17th:

A recording of Pal FM popped up on 87.5 at 1840:
https://app.box.com/s/g50vysi7m1al5ctj2okqdffcjlqk63sa too weak for RDS
unfortunately.

But a few moments before this I heard what sounded like an ID on 91.1.
Does anybody recognise this?

https://app.box.com/s/q2ku34zdlihs9jyrw4w0mk1imxrict8s

Thanks

John

hello ilkka, thanks for your report about the sdrplay. I think change my
funcube with this sdrplay on my remote qth.
My location is in a quiet place i think this new sdr offers me new tropo dx.

Hi John. Nice catch with the Pal FM jingle ☐☐

I can't decipher the ID on 91.1 but it sounds Balkan to me.

Good DX

Subject: [SkywavesDX] Need help ID'ing 92.6 Arabic (?) station please

Hello everyone,

I received what I presume to be an Arabic station during an E Skip opening that went mostly into the Balkans on the 21st of June this year. I think Italy later made an appearance as well as Tunisia.
Maybe it might be Algeria that made a momentary appearance but I don't know. The thing is this is more or less on the same frequency range that I received a station with Coran prayers a year or two ago when there was also an opening to the Balkans at the same time. Here is the video link. It is between 4:34 to 5:05...

E Skip in UK, Balkans & eastern Europe
21/06/2015<https://www.youtube.com/watch?v=uha8tYcmAfs>

All I could get was the music played here. Any help is appreciated.

sleeper77, Southampton.

[image] <https://www.youtube.com/watch?v=uha8tYcmAfs>

E Skip in UK, Balkans & eastern Europe 21/06/2015
<https://www.youtube.com/watch?v=uha8tYcmAfs>
A great E Skip day with some really nice signals from Serbia at the start of the opening. Received in UK.

Congratulations!

whats the band like in Poltava?
do you have many local Tx's? is it as bad as in Lviv & Kyiv?

somewhere in the middle of Ukraine there must be an awesome dx
location, where multihop to China is possible.

would be an brilliant dxpedition, Visit my mate in Poltava, soak up
the culture and dx!

Hi, and hi also to Ilkka. I've not been at the computer for the last couple of days and have only just picked up your query on this forum.

I have been using the SDRPlay since December 2014 with great success. SDRPlay published some of my comments to them by way of a review on their web-site link: SDRplay - Reviews http://sdrplay.com/daveb_sitt.html

http://sdrplay.com/daveb_sitt.html

SDRplay - Reviews http://sdrplay.com/daveb_sitt.html FM DXing results from Sittingbourne, Kent, UK Tropo reception conditions were projected to be good on Tuesday 10th-Weds 11th February 2015.

View on sdrplay.com http://sdrplay.com/daveb_sitt.html
Preview by Yahoo

An important point to note with the SDRPlay is that you must make sure you use a software package that will allow the I/Q phase and amplitude balance to be properly balanced. SDR# does this very effectively automatically. HDSDR allows manual fine adjustment that also works very well. If the I/Q is not properly adjusted you wil get mirror images of strong station. Example with a centre frequency of 104.0 a strong station (55dB and above) on say 105.0 will also appear on 103.0 about 45-50 dB weaker. So a 70dB signal would give a 15dB mirror noise free mono.

Sensitivity is good but a lot of the benefit comes from the software especially being able to adjust the bandwidth down to 40 or 50 kHz.

If you search for SDR Play in conversations on this forum and the Skywaves DX forum you'll find other useful comments.

Rgds

David

37211. Unid English speaking station on 106.5 MHz.

Yahoo group: SkywavesDX (2015)
Date: 2015-07-27 22:15:56 UTC
From: Mauricio Molano Sánchez
Topic: 37211 Message: 37211
Attachments: 2 described; binary payloads are missing from this source WARC

Hi friends,I need some help with this station in English appearing in the middle of a bunch of Italian stations on 106.5 MHz
on July 24th. The conditions were very strange with lots of stations reaching 108 MHz but with weak and fluttery
signals. Quick and strong bursts of signals from other stations were appearing from time to time like one with a
speaker in chinese! (1'15" in the rec.). The english speaking station was playing adv. ending the block with a
jingle (3'03") "xxxxx Radio". I am attaching two versions of the recording (long! I´m sorry). One with the original
sound, the other with some digital filtering. Thanks for your time!.

Topic: 37212 Message: 37212
Attachments: 1 described; binary payloads are missing from this source WARC

On the 14th of May I heard this ID on 89.20 MHz.

I heard UNID turkish language station. At the top of

hour it faded out and I heard this jingle "Dream FM Padar" ??

or something like this.

Topic: 37213 Message: 37214

Hi All, Tried to get a more accurate offset an I think freq should be 49.739,345 Mhz. Only received this once before in 2013 I think and freq does not tie up with last time. However this looked to be the strongest signal by far and faded when video faded.

Its a reminder to always be ready ! I was up early and wasn't going to do any radio. Just decided to switch the Promax on as 1+1 was in last night and was shocked to see perfect video with 5 logo. Offset measuring receiver and video recording not set -up and by time got everything ready signal was fading away. - Maybe next year I'll be ready !

Mauricio,

I'm pretty sure it is Rivierra Radio in Monaco. There is a Jingle at 3 minutes 4 seconds which though suffering a fade sounds like theirs and there is an ad for an American retaurent on the Cote d'azur at 1 minute 4.

Good catch

Simon

Hi Reijo,
The language is turkish.
Do you have a recording just before your clip?
There seems to be an incomplete jingle before "??? FM Haber" which is "???
FM news".
The first news item is about the turkish prime minister, so this is 99% a
station from Turkey.
regards from Istanbul
Kurt

Hi Jurgen,
Yes fairly clean and stable. I would say I was more confident in this offset since there was very little else showing up at the time. However, as before I was caught on the hop so I'll treat with caution until I can properly catch a good measurement.

Remember that Mike Fallon logs superb Es from Saltdean!
Saltdean is below the hills which shields it from strong UK signals. Go up into the hills above Brighton for Tropo from the UK and Western Europe. For example Ditchling Beacon, where you can also log all the London pirates :-(

Hello all,,,

I'm planning to change my car's Nissan factory Head Unit with another one that's suitable for DX'ing purposes as you know it's the season and i love looking for stations on the move. Unfortunately I live in a city with many strong local transmitters so selectivity is the main factor here i guess?.

Any suggestions of brands with good radio Fm capabilities.

Thank you all in advance,

Ali

Es signals will be the same at high ground or low ground, but the local QRM will be very different ;-)

You will be staying in Brighton? There is a bus to Ditchling Beacon, No. 79, but only at weekends or holidays:
http://www.buses.co.uk/travel/service.aspx?serviceid=1201
http://www.buses.co.uk/travel/service.aspx?serviceid=1201

Go to the top, it is very pretty, and when you come back you can also try lower down, near Holingbury Golf Course, which is also a good location with less QRM

Any day of the week you can go to the other high 'beauty spot' at Devils Dyke on bus No. 77:
http://www.buses.co.uk/travel/service.aspx?serviceid=1199
http://www.buses.co.uk/travel/service.aspx?serviceid=1199

There is a restauraunt and a pub. Both bus services start in the centre of Brighton, near the pier

Subject: Re: [SkywavesDX] UNID 89.20 MHz

Thanks for the longer clip. Unfortunately it did not help.
I have no idea, what station this could be. I listened to the recording many times.There are at least two different stations.
The advertisement at the beginning is for a nationwide bank and usually is broadcast only on nationwide stations.
best regards
Kurt

Subject: Re: [SkywavesDX] UNID 89.20 MHz

Hi Reijo,
The language is turkish.
Do you have a recording just before your clip?
There seems to be an incomplete jingle before "??? FM Haber" which is "??? FM news".
The first news item is about the turkish prime minister, so this is 99% a station from Turkey.
regards from Istanbul
Kurt

37235. Sporadic E Loggings for 28 July 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-07-28 20:59:22 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37235

Hi All,

Sporadic E clouds around all day long today, all across Europe. Despite of this, Band II propagation for long seemed not to take off. Until mid-afternoon, which was the start of a fantastic opening into a confined area of south eastern Sicily Island. With the skip area virtually stationairy, a lot of local stations could be heard.

The following thirteen countries have been received:
Algeria
Belarus
Bulgaria
Croatia
Finland
Italy
Lithuania
Portugal
Roumania
Russia
Spain
Tunesia
Ukraine

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

From: John Faulkner, Skegness
Topic: 32969 Message: 37241

During the opening to Iceland, I received an unidentified station on 93.3. There are no clues, other than the fact that this was definitely Es and had the same fluttery fading as Iceland. The station was playing the Queen song, "A Kind Of Magic". It was very weak and probably just too low for RDS.

I don't see anything listed from Greenland and the only other transatlantic stations in that direction would be from the CBC in Canada. I could not get their web stream to work, but they were airing a magazine type programme anyway, so unlikely to be them.

An interesting mystery.

John

Hi John,

What is your distance, for instance to the RTL 93.3 -tx? Could it
have been, your antenna was hoovering in the Dudelange//Ginsterberg
-tx via backbeam? Or some other, in your backbeam direction.

One might bear in mind, there is the Perseids meteor shower around,
giving pretty durable slides, sometimes hard to tell whether it is Es or MS.

Hi Ilkka.

This was 100% Es, matching the reception of Iceland. Nothing else was coming in. Not meteor scatter and not regular aircraft scatter. 93.3 is not a regular anyway via scatter.

I suspect there may be something in Iceland which is not listed.

Thanks.

John

Hi,

from your initial posting it was not clear if you have a standard radio which you can take out and fit another one in. There are default 1-DIN and 2-DIN heights.
Almost all modern (last 10 years) car radios have digital filters, so selectivity is normally not a problem. Sensitivity is usually ok, but consider that antennas in cars sometimes have amplifiers. So the result will depend also on the antenna. Best are the old-fashioned long whip antennas. Small sticks or invisible (window-based) antennas are sometimes ok, sometimes poor. Look for a radio which has manual tuning, and RDS capability. With some radios, it is possible to enter into engineering mode and to see things like signal strength, signal quality and PI codes.
I can't give specific recommendations - but I think any radio from Blaupunkt will do a good job.

73,
Günter

Hi

I have an Icom R75 receiver which gets quite strong signals on 49.750Mhz CW while E skips come from the ex USSR;

Is there a software that could from the soundcard transform that high tone into TV pictures just by linking the audio/out of my Icom

into the jack in of my laptop??

I had a Win USB stuff long time ago but it's broken, there were regular pics on R1 at the time (as well as E2/E3 but that was before the big

analog fade out).

Thank you Reijo and Alessandro.

This didn't appear in the list when I checked but I see it is there this morning.

I tried Google Translate with what I guessed to be "bella stretto" but this was translated to "pretty tight". Also various other attempts such as "bell a stretto" = "bell too close" but Google Translate is not perfect. I do not speak Italian either. I assume the "tight/close" refers to the station being "very local".

Thank you again. A new one for the log.

Date: 2015-07-30 12:18:57 UTC
From: John Faulkner, Skegness
Topic: 37254 Message: 37256

Howdy do Hannu!

Thank you for this. All I could hear was "Radio Ore/Ora".

I don't see a Radio Amore listed on 104.9. That's the second one for the 22nd alone! The other one being on 106.7 with PI 5190. In fact, I have had a lot of unlisted Italian stations this season. No surprises there.

As you will gather, I have started going through my recordings for the 22nd June. This puts me about five weeks behind with my logs and there's every chance this gap will increase hugely. Suddenly, the joke about DXing this summer's Es recordings at Christmas seems like a real possibility.

I am really enjoying the Italian Es openings this season thanks to the S2. It's possible to be accurate with the transmitter sites of the majority of the stations received. There are still a few ambiguous sites and I might make a presumption regarding one or two based on previous reception/knowledge, but it is impossible to assume them all. Guessing is not the correct option.

I have already completed my log from the 17th July, which I gave priority due to the exceptional conditions. I am hoping to post the log in the next couple of days. I am just waiting on the analysis of a few recordings, some of which I posted to RealDX.

Good DX!

John

Thank you for the reply Mr Günter.

Yes i want to replace the standard Radio (Nissan sunny 2002)... The main problem is poor selectivity then multipathing (could be the tuner or the antenna which is in windscreen?) which makes Dx'ing a hard job.... Is it possible to mount a whip antenna even without an already available factory location???..

Thanx in advance

Ali

I would strongly recommend the radio in my Citroen C4 Grand Picasso. It is super-sensitive and super-selective and possibly out-performs the XDR-F1HD. I am still to perform a side-by-side comparison. Unfortunately, I do not know what model this is, plus it does not have easy tuning. You have to enter frequencies directly as I have not found a way to disable the slider tuning which, very annoyingly, always jumps to the nearest strong signal.

I briefly had a Citroen C1 courtesy car and I liked the performance of the car radio in there. That had a nice rotary knob manual tuning, but the make and model of the radio is unknown. Citroen radios are worth a look.

Hope that helps.

John

> The tx site for 104.9 MHz is Scilla/località Melia-Monte Scrisi (RC).

Janpeter, what is your source for this?
FMLIST has Radio Amore from above site on 105.8, logged in Skegness 2015-06-16 17:17.
Further, FMLIST has 104.7 (Radio 105, logged in Skegness 2015-06-16 17:17) and 105.1 (RMC, also logged in Skegness 2015-06-16 17:17) from that same site.
Now this log is from another date, but if that is all from the same site, John should have the above on the recordings as well.

http://www.radioamore.eu/sito/images/stories/frequenze.jpg
Note that 105.8 and 104.9 are always mentioned together, but 104.9 also serves another area: Patti, Milazzo, Capo d'Orlando, Isole Eolie. That may be a different "beam" or a second tx, or actually 104.9 is from a different site.
105.8 is mentioned also for other areas, as well as 108.5 [sic] - can we trust this table?

Hi Günter,

I don't know what the source has been for my information. Several years ago I have been searching these two sites extensively:
http://www.siciliamedia.it/ (now under construction and no longer accessible)
http://sicilia.onderadio.net/

So I probably got the information from either one of the above. Note that both web sites often provide detailed information, but also very often their information is not the same. So the reliability can be questioned.

I usually delete the files once I have gone through and extracted the DX, so checking back may not be possible once the files have cleared from the Recycled Bin. In all cases, I log everything I can identify, so if there are stations missing then the frequencies might have been blocked by co-channel DX stations or splatter from adjacent channels. Happy to help wherever I can though. Let me know the times of files you would like me to check again, or if you would like me to upload to my Mediafire account.

It's fascinating to see how you carry out your detective work. I guess this is another fascinating side to the hobby. /A few years ago I applied to work in forensic science, so you might expect that putting all the pieces of the jigsaw together is also fascinating for me./

I have received several unlisted outlets of other networks and it makes me wonder if some local stations are relaying these networks. Some kind of sustaining service perhaps.

Back to the files.

John

Hi Paul,
Nice pictures of BT-1 in S.E. Essex too ATM with zero offset carrier. Also good clear pictures from UT-1, no-offset on Ch.R2.

Cheers
Tom.

Hi Rejio,

isn't very easy to help you with a so few evidence but, if you can share this recording, I think that it would be possible to find more useful information.

"Centro Commerciale Girasole" is a shopping center situated near the city of Fermo, into Marche region.
It's unlikely that they have bought some space to advertise into national networks.

According to Fmlist database (that, in the case of Marche, is very reliable), there is 4 txs in that region, but two of them are unlikely because they broadcast national networks (R101 from Grottammare -Ap- and Radio Italia from Ascoli-Colle San Marco -Ap-)

It remains only two:
Radio Linea numero uno from Sarnano Monte Sassotetto (Mc)

Radio Studio 24 from Camerata Picena (An)

I can't say nothing more but I hope this could be useful for you.

37280. UNID Arabic on 107.7

Yahoo group: SkywavesDX (2015)
Date: 2015-08-01 17:08:55 UTC
From: nick gilly
Topic: 37280 Message: 37280

Hi all.
I am going through some recordings from the last month and have found this recording from July 11th of an unidentified Arabic station on 107.7 with what sounds like a radio play:
https://app.box.com/s/czewwfnzpzo4j65shne0tw76trjsqxn6
I was wondering if it may be Radio Al-Jawhara FM from Tarabulus in Libya as just after this I received Radio Msallata on 88.3. Could anyone confirm whether this is Libya or not please?
 Thanks and good DX.

From: John Faulkner, Skegness
Topic: 32969 Message: 37286

Half of my messages get through here straight away. The other half take an hour or longer. I thought I just might have found a reason why this happens, but it seems not.

Suderland FM have read my post on their Facebook page. No answer in ten minutes. I don't expect one, plus would you log a station as 100% certain on the basis of having the time conformed by their radio log? I know some people who wouldn't and I'd probably agree with them, but based on the fact that this very transmitter was received at the very same time it would make sense, including the radio log info confirmation.

Oh well. Thanks again.

John

37288. Spain - 91.4 - Talk Radio Europe - where is it?

Yahoo group: SkywavesDX (2015)
Date: 2015-08-01 21:37:26 UTC
From: Ian Kelly
Topic: 37288 Message: 37288

Hi all. I heard this English speaking Spanish network during this evening's Es opening to Spain on 91.4. PS name came up as TRETALK_ and the programme was parallel to the station's webstream (thanks to Nick Gilly for identifying the station as Talk Radio Europe from the PS name).

FMLIST does not have the station listed on this frequency, neither does the station's frequency page on their website:

http://www.talkradioeurope.com/listen/frequencies

However, a Google Book does have the station listed on 91.4:

https://books.google.co.uk/books?id=AW0un7oX4gkC&pg=PA673&lpg=PA673&dq=%22talk+radio+europe%22+%2291.4%22&source=bl&ots=8YM1s9Qd2M&sig=q42W9m1IxQA2CRZ7i-nqtXlKm7I&hl=en&sa=X&ved=0CAsQ6AEwAGoVChMIjMy53teIxwIVzI_bCh0PsAeR#v=onepage&q=%22talk%20radio%20europe%22%20%2291.4%22&f=false

Does anyone know where this transmitter is? I have emailed the station, but maybe someone knows already?

Thanks for any help
…

John, could it be this from Iceland?

http://www.sudurlandfm.is/index.php/um-sudhurland-fm

96.3 and 93.3 are mentioned.

From: John Faulkner, Skegness
Topic: 32969 Message: 37290

I have just re-checked 88.5 in the four SDR files I recorded of the Iceland opening and there's nothing concrete on the frequency other than BBC Radio 2 from Pontop Pike.

I still have the files and can upload one if you like, but there's nothing much on them, other than the three Icelandic stations and the unid on 93.3. Virtually the entire Queen song can be heard, but there is no speech at either side.

However, it does look like Sudurland FM was the station I received as this is from the same transmitter as Radio X on 90.4, which was received with full RDS.

It's a VERY long shot, but I wrote to the station to ask them to check their radio log ... assuming they have one ... assuming there is somebody who speaks English ..... assuming they will take time to check their radio log .... assuming they actually believe me ..... assuming .... well, you never know.

Thanks for the info.

John

Weak signal from RNE5 Lierganes on 105.0. Comes as a surprise, as often, it's breezy when I hear this, but it's really still this morning.

Haven't dug anything else out yet. Enhancement to France too, but nothing special.

How odd, from memory its often breezy when I hear it too

I woke up at 00:45 and noticed UK Raw was enhanced on 87.5 so had a tune around

Painfully weak and intermittent Radio 5 relay on 93.2 from Guernsey
which I would never had Id'ed without using the SDR to compare its
modulation pattern to the radio 5 relay on 93.1 from Blaenplwyf

an unid on 87.8 was mixing with RTE 1, presumably Cherbourg
(its always a sign of good condx when anything is mixing with Cleremont Carn)

RTE had a really interesting interview with a film maker with
Polish/Jewish roots
so I left the radio tuned to 87.8 and went back to bed,
for the rest of the night the unid was never better than poor, only
audible when RTE faded and sometimes not even then

these overnight sessions can often be productive

didn't remember to check 105.0

Good luck, if they check their log and confirm the song, I don't think anyone will mind you claiming it as presumed

If you do get chance to upload the file I can't deny i'm curious and Peter might be able to squeeze out some RDS data at ridiculously low levels

This is probably the best of the four Icelandic files I recorded. There are only three or four stations on there so don't expect wall-to-wall Icelandic DX. Maybe Peter will be able to drag out a PI code as you say Tim.

I have already had a play with SDR# and RDS Spy, but found that it was much less sensitive than the FDM . VAC > RDS Spy combination. I must be doing something wrong.

Cheers

John

I'm sure Peter will try his best - I've heard he is downloading the file now. He said he is using the Edge, which he thought was the guitarist from U2 :)

Tell Peter John Faulkner says that you.

U2? Never heard of them.

Peter says he got RDS on the three stations you did, but 93.3 is too near The Edge to get RDS, but he'll keep trying.

From: pe1etr@...
Topic: 37301 Message: 37301

I'm a bit confused.

RÚV Ras 2 SvæðisSuðurland FM is listed on several frequencies and seems to be one of the regional versions of RÚV Ras 2.

There is also a brief entry for 93.3 Suðurland FM. (no mention of RÚV Ras 2)

In John's IQ recording 88.1 and 93.3 are NOT in parallel.

Can anyone clear this up?

Peter

Svæðisútvarp is "regional broadcast".
So RÚV Ras 2 SvæðisSuðurland FM is (was) a regional service of public RÙV, while Suðurland FM is a different station.
It seems that all regional broadcasts on RUV2 have been stopped already back in 2010 or earlier:

Thanks for the info and thanks for listening Peter. Shame the RDS did not appear. 93.3 has to be Suðurland FM, but I 'don't feel comfortable logging it on the basis of hearing a Queen track, despite the conditions probably confirming this.

Thanks for the info too Günter.

Hello John,

I think if the centre frequency was a few hundred kHz higher I might have got RDS from 93.3. I had a partial RDS lock. (a "pre-cursor" to the PI code)

Thanks to Guenter for clearing up the ISL situation.

Regards

Peter

37306. 22-06-15 Files - Kiss FM unid Côte D'Azur site 91.5

Yahoo group: SkywavesDX (2015)
Date: 2015-08-03 11:37:53 UTC
From: John Faulkner, Skegness
Topic: 37306 Message: 37306

Managed a good 'catch-up' over the weekend and have almost completed my recordings from the 22nd June.

The Côte D'Azur area was coming in with strong signals during the late afternoon and I logged Kiss FM from Saint-Raphaël on 90.8. But there was a second outlet of this on 91.5 which I don't see listed on their website. A new site? Perhaps Malijai or Gap?

John

Hello John,

I might have got a PI for 93.3

Unfortunately the correct PI isn't listed for this station. Is there anyone in Iceland on this list?

I got AF65 in SDR# native RDS Decoder but not in RDS Spy. I've had correct PI codes like this before.

Still photos attached.

Peter

Very exciting news about the above logging. The station have replied on their Facebook page following my post about hearing them on 91.4. I quote:

"Thats very impressive indeed! It is located on Mijas mountain between Marbella and Malaga in the Costa Del Sol and is a 2kw transmitter..must have been very favourable conditions ! Ironically its brand new having only been operational since Friday last."

I can probably claim a UK first?

Thanks due to you Nick. I didn't recognise the TRETALK_ RDS PS name when it came in, so I may never have made the connection at the time without your suggestion this was Talk Radio Europe, which I then confirmed checking the webstream.

Hello friends.
I don't know if this cuestion can be done here. If not, sorry.
I can receive the meteor pings on frecuency 143.048.50 Mhz USB.
Yesterday about 03:00 local hour (Spain), i heard an strong ping with duration approximately of 15 seconds. I can imagine an airplane reflection of Graves radar signal.
My cuestion is:
Is possible to know the airplane location with this reflexion?.
Is the airplane in the middle of path from my location (North of Spain) and radar locationr?
Can i expect more airplanes bounces if i know the exact section of path?
Many thanks and sorry for my English

Hello sequeyo,

aircraft reflection is possible over up to 800 km distance between transmitter and receiver.

Yes, it can be predicted.

See http://www.airscout.eu/ for a really exciting software! Reading the documentation is recommended.

73,

Günter

Betreff: [SkywavesDX] Meteor bounce from France radar Graves.

Hello friends.

I don't know if this cuestion can be done here. If not, sorry.

I can receive the meteor pings on frecuency 143.048.50 Mhz USB.

Yesterday about 03:00 local hour (Spain), i heard an strong ping with duration approximately of 15 seconds. I can imagine an airplane reflection of Graves radar signal.

My cuestion is:

Is possible to know the airplane location with this reflexion?.

Is the airplane in the middle of path from my location (North of Spain) and radar locationr?

Can i expect more airplanes bounces if i know the exact section of path?

Many thanks and sorry for my English

Hi Günter, sequeyo,

Darn. Whatever happened to flightradar.com? This
very handy site still was around, say just a few weeks ago.

As to sequeyo's question concerning the aircraft
position. It depends. The aircraft producing the
scatter, often flies not in the middle of the
path. Still, with a proper realtime map - such
as the flightradar was - the most obvious jet
producing the scatter is//was relatively easy to spot.

37316. Licence holders beware - "OFCOM" phishing email

Yahoo group: SkywavesDX (2015)
Date: 2015-08-05 08:24:00 UTC
From: Jim Smith G0OFE
Topic: 37316 Message: 37316

Hi all,

Just a heads up to anyone who holds an OFCOM licence e.g. radio amateurs.

I received 2 emails this morning apparently from OFCOM which began:

"Dear Sir/Madam,

Please find attached an electronic version of important documents relating
to your Wireless Telegraphy licence or application.

Please read the document carefully and keep it for future reference.

If any details within this letter are incorrect, please notify Ofcom
Spectrum Licensing as soon as possible. It is the Licensee's responsibility
to ensure all information we hold is correct and current. "

Attached was a .DOCM file.

Thing is, it was received on an address that I do not use for radio related
matters, and OFCOM do not have that address on file. It's clearly a phishing
attempt.

I almost opened the attachment before I thought "hang on, they shouldn't be
sending to this address"

Be warned.

Hi Ilkka,

http://www.flightradar24.com/48.39,11.79/11 is still here!
Airscout makes use of realtime data from flightradar, thus allowing
prediction of aircraft reflection. It really works, give it a try!
And yes, correct, the plane does not have to be in the middle of the path.
It may be anywhere where both the transmitter and the receiver can see it.

73,
Güter

Many thanks Günter and ilkka.
I downloaded Airscout to test.
This is very interesting to me:
"*It may be anywhere where both the transmitter and the receiver can see it*
"
Then,the airplane must be somewhere between the transmitter 47.3480°N
5.5151°E
<https://tools.wmflabs.org/geohack/geohack.php?pagename=Graves_%28system%29?ms=47.3480_N_5
.5151_E_>
and the receiver 44.0715°N 5.5346°E
<https://tools.wmflabs.org/geohack/geohack.php?pagename=Graves_%28system%29?ms=44.0715_N_5
.5346_E_>
With this data, i have some clue to keep my eyes on Airscout or
Flightradar24.
Best regards.

Hi

Interesting software indeed, currently testing it with the coordinates of a ham in Wuppertal.

At the same time my tuner is on 88.8 Mhz , a channel on which I have already heard a WDR FM station from Langenberg by Tropo.

I'm checking if there might be a ping while an aircraft crosses the Mons-Liège-Aachen line.

As the Scout gets its data from Planefinder (very few flights indeed), I'm keeping an eye on Flightradar as well.

Can it be made to get data from Flightradar direct ?

Nothing so far though many airliners cross the line high altitude, but other weather or ionospheric parameters are probably involved.

And it sure wouldn't be fun if it was automatic,like trainspotting passenger trains on a station platform, would it ?

From: ilkka suni
Topic: 37323 Message: 37323

Hi folks,

As it appears, quite a plenty of the FMLIST live
stream links once again are outdated,
out-of-order. In the FMLIST loggings, there has
been for instance references "töktöktök" by the
loggers, possibly indicating them stream links do not work.

If you spot malfunctioning stream links, please
do inform them FMLIST editors by country, to
erase outdated links. And if you spot one
malfuntioning added by me, please do inform me.

Keeping them live stream links current, surely is
a pain in the very place for us all. I can only
wonder the patience, Günter has keeping on updating the live stream links.

Oh, Airscout is not using FlightRadar24 anymore?

I’ve used Airscout last autumn when it worked with FlightRadar24. But planefinder.net also has all flights, so there seems to be a problem with the feed interface, that can certainly be solved.

Personally, I try to add links if I find one.

I went through MRC and ALG adding Listen Live links just before the start of the Es season, for example.

Think what is needed is a check box by each link to easily alert when a link is dead.

Hi Jim,

I am not sure I get what you mean. I believe, this dead link alert is impossible. Also, the effort would be unecessary, as the dead link would be deleted right away, discovered.

37327. Re: [SkywavesDX] About FMLIST live stream links

Yahoo group: SkywavesDX (2015)
Date: 2015-08-05 22:53:41 UTC
From: Kurt Zscherp
Topic: 37323 Message: 37327

At least here in Turkey links are only temporary unavailable. I update links usually once per year. About 30% of the links for local stations have changed.
regards from Turkey
Kurt

37328. Unid Language 96.0

Yahoo group: SkywavesDX (2015)
Date: 2015-08-05 23:53:55 UTC
From: John Faulkner, Skegness
Topic: 37328 Message: 37328

Just caught this from June 22nd:

96.0 unid 1833 22-06-15 -
https://app.box.com/s/vp27rh2autvt4scx7m8dr3f5yjqtabj5

At first I thought the language sounded Albanian. But I don't see any
Albanian stations listed for 96.0.

Thanks if anybody can identify the language or, better still, the station.

John

37329. Two more unids

Yahoo group: SkywavesDX (2015)
Date: 2015-08-06 00:09:39 UTC
From: John Faulkner, Skegness
Topic: 37329 Message: 37329

These are just music.

Firstly, I cannot find my phone to 'Shazam' the artist. This might throw up some clues as to the area coming in. It's also a rather odd channel.

98.75 unid (sounds Greek) 1833 22-06-15 - https://app.box.com/s/gnaztei4nightup8d4a5xtyt2r171j1o

I wondered if this was Turkish:

97.8 unid music 1823 22-06-15 - https://app.box.com/s/mrzugipko3ynxqvtb3lrgskowus0bqm5

This is the period just before Turkey was received here on the 22nd June. There were a few Arabic sounding stations mixing with the Balkans.

Thanks

John

Hi Ruud,

excellent catches!
Did you know you could send notifications to the FMLIST editors while logging?
A notification is processed much faster than going through your logbook and finding out what is new.

73,
Günter

From: John Faulkner, Skegness
Topic: 37328 Message: 37340

Thank you Nick and Kurt.

Kurt, these are the only recordings I have from 97.8 & 96.0. Thanks for narrowing these down. Interesting to learn that they were both Turkish. Such a pity that no RDS was seen / no IDs.

I found another short sample from 96.0. This time playing some music.

96.0 unid 1825 22-06-15 - https://app.box.com/s/fp3i5t0xeq2zq91h7ivjkvs8nqbr8h16 There's a Greek station to begin with, then the unid.

Let's see if Yahoo deliver my mail straight away.

Thanks.

John

It is all greek.
Only the last two seconds could be from Turkey. The three notes at the end somehow sound familiar to me. I can not say whether it is part of a station or advertisement jingle.

Dear all, just been testing a new dx spot on the A54 at 4 ways motel

had an extremly slow fading very weak tropo signal on 87.7 w classical mx
ruled out everything else

i can't access the latest hepburn map , but the latest available looks promising

heres the location
http://www.geograph.org.uk/photo/210971

despite low cloud and continuous rain
reception was insane!
North Hessary Tor 100.0 was S9

90.4 was a mix of Belgium, Truskmore & Betws-Y-Coed
93.6 was a mix of pontypool & Holywell hill
93.8 was Radio Ulster, Radio 4 Hutton & R Na Gael!

Kurt ...

Even the closest tx is in the double hop range, Karabük at 2748 km. That would fit with the conditions/path open at the time.

Denizli is possible too and also on beam with another path BUT that path had long been closed by this time. I also see that FM List has Denizli as "PLANNED". So do you know if this is definitely on the air now?

Finally, I think I can almost certainly rule out Hinis at 3500 km. It's not on beam with anything received that day.

Looking forward to your comments on my second recording of 96.0. I'll post it here again just in case ...
https://app.box.com/s/fp3i5t0xeq2zq91h7ivjkvs8nqbr8h16

Thanks

John

John
Sorry, I update the wrong entry in FMLIST. It is corrected now.
Denizli was received in Ukraine on 24 July with PS TRTNAGME COKELEZ_
TRT still lists the program on 88.6
Kurt

Hi Tim,

Back in the late 80s a Ham friend of mine who lived in Workington told me
he worked the Canaries on 2 metres via trops, so maybe its possible?

Chris.

Workington is good going
Thanks Chris
I've had the canaries from aberdaron including this tx on 87.7 but
this was much weaker

this mornings tropo map seems to back it up
and i've excluded everything else by checking online schedules and podcasts

the music was quiet enough to listen too in 15khz nfm with no
distortion but the presenters speech was too wide, the language could
have been anything
it was really at the threshold of listenability, it had very slow fading

i couldn't name any of the classical pieces b/c i'm an uncultured punk ;-)

anyway its a brilliant hilltopping site with or without the canaries

thank goodness no RSLs were on 87.7!

I've got a feeling it was via SSB with a fair bit of power behind it, but it was a long time ago and I cant be sure and I lost touch with the guy in the early 90s. It being largely a sea path probably helped matters quite a lot!

OK, so Denzili definitely on the air.

When you said that "Most likely, this is TRT Nagme from Denzili", were you referring to the transmitter site? I am not certain if you meant that or the station. If there is certainty of the station network, then Denzili would fit perfectly with the conditions at that minute.

Thanks.

Yes, I referred to TRT Nagme from Denizli.
I got the report from Ukraine for Hinis/Güzelbaba on the same frequency as
at that time Denizli was only listed as planned.
But he reported PS TRTNAGME COKELEZ_. So it was 100% from
Denizli/KücükCÖKELEZ Tepe.
The problem was, that I changed the wrong entry. Sorry

This music is almost exclusively played on TRT Nagme, rarely on TRT Radyo
1. I am 99% sure about Denizli.
The station on 96.0 with the THY advertisement was at almost the same time.
My guess would be TRT FM from Izmir.
And there were some greek stations around as well.

37357. RE: [SkywavesDX] surely not CNR 87.7 on trop?

Yahoo group: SkywavesDX (2015)
Date: 2015-08-06 18:54:18 UTC
From: Jim Smith G0OFE
Topic: 37345 Message: 37357

Yes, perfectly possible. The Canaries are worked on 2m tropo from time to time from Devon/Cornwall, and Ireland.

This path can spread to other areas too.

I expect I will hear it on Band 2 via tropo at some point.

==========

Jim, Bournemouth, Dorset. IO90BR.

Elad FDM-S2, Perseus/FM+ and Funcube Dongle SDR Recievers

8-element OP-DES for Band 2, 12-ele ZL Special for 2m, plus wideband vertical.

Wellbrook 1530 Loop for LF

Subject: Re: [SkywavesDX] surely not CNR 87.7 on trop?

Hi Tim,

Back in the late 80s a Ham friend of mine who lived in Workington told me he worked the Canaries on 2 metres via trops, so maybe its possible?

Chris.

On 6 August 2015 at 15:07, Tim Bucknall tim.bucknall@... [SkywavesDX] <SkywavesDX@...> wrote:

Dear all, just been testing a new dx spot on the A54 at 4 ways motel

had an extremly slow fading very weak tropo signal on 87.7 w classical mx
ruled out everything else

i can't access the latest hepburn map , but the latest available looks promising

** Personal 'First'
No personal firsts listed this time as I am jumping ahead of myself
regarding the SDR files, posting this log out of chronologcal sequence.

The Es conditions on July 17th were the best I have ever experienced on
band 2 with extensive double hop to Turkey, Cyprus and Lebanon. I wanted
to check through everything before I went on to older files while so
things were still reasonably fresh, but it's taken me almost three weeks
to do this even so.

Thank you to everybody who has helped me with my unidentified recordings, of which there were several. I still don't know the identity of the stations on 89.2, 92.8 and 93.3, believed to be from Cyprus, so hopefully somebody will be able to check through these in due course.

My unidentified Arabic stations on 87.6 and 90.7 turned out to be Algerian. Thanks to Tarek for listening. I couldn't really log them though as 87.6 did not produce an ID and I wasn't able to determine the site for 90.7.

The tentative Cyprus recordings are here:

91.1 unid English mixing Steinkimmen 1825 17-07-15 -

Very nice log Tim if that was CNR on 87.7. It sounds like it could have been!
 Good DX.

Hmm. I must admit my Balkan geography is not good. I probably wouldn't have realised my mistake had you not told me.

Thanks for the correction.

37362. Re: [SkywavesDX] Two more unids - PI 3023

Yahoo group: SkywavesDX (2015)
Date: 2015-08-07 01:03:19 UTC
From: John Faulkner, Skegness
Topic: 37329 Message: 37362

Sorry to throw another one in here. But I just remembered that I received a station on 93.6 with a PI code of 3023, logged at the same time the presumed TRT Nagme on 97.8. It doesn't appear in FM List and I wondered if anybody else had this one?

Sorry (again) Kurt, but you mention Izmir as the transmitter for TRT FM on 96.0. Did you mean Izmit? I only see Izmit listed, which is not too far from Istanbul.

Thanks again.

John

Hi John,
Forget about my guess about 96.0 TRT FM. I don't know how I came to that,
Ofcourse not Izmit, that would be too far off.
Kurt

Hi Ruud,

> The fields pi and Ps Which are marked with *are Used.

Yes, that is the first part.
And then there is a checkbox: " Check to quickly notify FMLIST editors if received RDS is different from what is listed in FMLIST!"

I just listened to Omroep Noos (Noos FM) online and their TOTH jingle/ID is totally different. John's recording has a 'number one in ??? for music and news, then (frequency) and sung jingle (something_Middel Radio?).
I can't see anything that might fit on FMLIST.

I just listened to Omroep Noos (Noos FM) online and their TOTH jingle/ID is totally different. John's recording has a 'number one in ??? for music and news, then (frequency) and sung jingle (something_Middel Radio?).
I can't see anything that might fit on FMLIST.
Good DX.

From: par_clarke@...
Topic: 37386 Message: 37386

Hi all
could anyone on here recommend me a good 5 or 6 element fm antenna (for meteor scatter and tropo) , I cant go any bigger than a 6 elements, at the moment I have a little 4 element one which is not to bad but could be better,
many thanks
paul

From: Patrick Travers
Topic: 37386 Message: 37390

Hi Paul,
For a ready built antenna I'd suggest Triax FM5, they're getting more difficult to source. You could try JW Hardy, they had stock the last time I enquired.

http://jwhardy.co.uk/shop/pages/pl_ant_ter.html

37391. Band II DX Loggings for 7 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-08 09:42:05 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37391

Hi All,

A nice coming home yesterday after some holiday travelling with the family, finding all sorts of DX on Band II. First there was sporadic E into Italy, followed by some sea path tropo. The latter has been largely absent so far this summer.

Please take a look at two Italian UNIDs on 88.3 and 88.5 MHz. Any suggestions would be much appreciated.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Friday 7 August 2015

Do digital spy forums have service problems?
I have filed a support ticket some days ago and received a ticket number, but issue has not been resolved.
Also, I created a new account and am waiting for them to confirm this new account.
I can't even access the search page: "you do not have permission to access this page".
Have I been banned, and they would not even tell me?

73,
Günter

Hi patrick
thanks for the info, I will look into that, are the Triax FM5 a good antenna then? I know they have been around for a while.

37394. DAB in UK: DABLIST request for support

Yahoo group: SkywavesDX (2015)
Date: 2015-08-08 10:11:09 UTC
From: Günter Lorenz (FMLIST)
Topic: 37394 Message: 37394

FMLIST has a DABLIST section, which includes a logbook feature, and logs are also sent to DXMAPS which has a separate DAB tab.
DABLIST would be happy to get some updates from the UK. While we have all the transmitter information from OFCOM, the MUX configuration is not always known but equally of interest. One simple way to collect data is by use of a USB receiver stick and a software called Andi's DAB-Player (freeware):
http://www.ukwtv.de/cms/downloads-aside/281-dab-player-von-andreas-gsinn.html
Not only does it show Slideshows, Dynamic Labels and many more details: One of the greatest features is the display of SNR on a specific channel, very useful to find optimum antenna direction or when hunting for DX signals. The software can export MUX configuration data, and I'd be happy to get such data files for as many MUXes as possible, to feed DABLIST.
Here is a document that explains how to export the data, including download links for the software:
http://www.fmlist.org/How-to-export-DAB-FIC-Multiplex-Configuration.pdf

Thanks and 73
Günter

From: Janpeter van Dijk
Topic: 37377 Message: 37398

Yes, this is a pirate. They have a web site, if you google Radio Muziekstad you will get there. This web site explains the situation for this station many years ago, when they were location in Oss. Their current location is unknown to me, but assuming it is still close to Oss, this is a good catch.

From: Radio Stations
Topic: 37368 Message: 37404

A slow starting opening with for me unknown stations but after waiting signals became RDS level and these are from ARS !Later it turned into Hurghada EGY area.RDS ARS at Ruud's DAB DX logboek

Ruud's DAB DX logboek Hieronder mijn iono ontvangsten uit SAUDI ARABIE op 8 augustus !!!:	
View on www.radio-tv-nederl...	Preview by Yahoo

There were a lot unids because the lack of RDS and some with stunning poor or very wide modulation. Visual logbook http://fmlist.org/fm_logmap.php?datum=2015-08-08&omid=1756New one (not FMlist listed) is EGY Radio Masr on 87.7.A strange tropo reception was a pirate ? from ISR with disco music from the late 80's with very wide modulation. Also UNID.Ruud

From: nick gilly
Topic: 37411 Message: 37411

Some very good conditions to Brittany and the Channel Islands this morning. Radio Kreiz Breiz is in on 99.4 with music and talk in Breton. I even managed to get the low-powered community station from Alderney, Quay FM, on 107.1 playing 'Itsy Bitsy Teeny Weeny Yellow Polka Dot Bikini' clearly in parallel with the web stream. A difficult copy though with the Breeze on 107.2 next door. Good DX.

Nick, Whitchurch, Hampshire.

Hi Jurgen, Thanks and very nice ! Have to remember to take into account line sync freq as well before finding a 'new' unid.

Thanks and Regards
Paul H

37425. UNID Russian language ID 90.6

Yahoo group: SkywavesDX (2015)
Date: 2015-08-09 17:58:10 UTC
From: nick gilly
Topic: 37425 Message: 37425

Hi all.
This ID was heard on 90.6 earlier today during an opening to Scandinavia and the Baltic:
https://app.box.com/s/w4f8i06a9o6wficr4xct3c4o0b895go5
Logic would suggest that it is Russkoye Radio from either Estonia or Lithuania but I received this station later on and the jingle was very different. Could any Russian speakers help please?
 Thanks and good DX,

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

in case anyone doesn't know, the different national versions of
Russkoye radio are independent from each other and the Moscow version
maybe the jingle you heard later was from a different national version?

On 90.6 only and one Russkoye radio, in Tallinn.
And they may have many different jingles.

Victor

Thanks Tim. It's the bit that sounds like 'Adno Radio' that makes me wonder.
The second one was very likely from Estonia as this country was coming in at the time:
https://app.box.com/s/mahwdtcewi133yq88uepfzbj5h8cwvdo Good DX.

Thanks Jurgen, will have to try that. I am now using a WinRadio G39DDC and SpecLab to measure offsets. I usually have it set to 40Khz on DDC 1 but it can go up to 4Mhz for RF recording. I should set some markers up to check for 15.625Khz separation.

Regards
Paul H

37433. DX Loggings for 8 August 2015

Hi All,

Below my loggings for yesterday. A day packed with DX, both Es and tropo. Even though it is August, the OIRT logbook is probably the biggest of this season.
Also, this was the tenth opening this year featuring Libya. And I have missed a few occasions.

Stand by, there is much more to follow from today.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

37434. Re: [SkywavesDX] DX Loggings for 8 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-09 21:10:12 UTC
From: nick gilly
Topic: 35847 Message: 37434

Hi Janpeter. At the same time of your logging of Radio Msallata (1153 UTC) I had on 88.3 a very excitable Arabic OM or preacher. It was very marginal and got a bit clearer briefly a little later on. Does this match what Radio Msallata had on at the time?
 Good DX.

Nick, Whitchurch, Hampshire.

  Hi All,

Below my loggings for yesterday. A day packed with DX, both Es and tropo. Even though it is August, the OIRT logbook is probably the biggest of this season.
Also, this was the tenth opening this year featuring Libya. And I have missed a few occasions.

Stand by, there is much more to follow from today.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

37436. DX Loggings for 9 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-10 14:33:10 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37436

Hi All,

While Saturday produced the largest OIRT logbook of the DX season, Sunday decided to produce an even larger one. Add to this again nice Band II Es and tropo and the picture of a by far most productive weekend of this year is complete.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Sunday 9 August 2015

37437. DRM+ tests in Russia

Yahoo group: SkywavesDX (2015)
Date: 2015-08-10 18:33:38 UTC
From: Victor Rutkovsky
Topic: 37437 Message: 37437

From the end of July RTRS is testing DRM+ on 67.46 MHz (Radio Mayak) in S-Petersburg in Russia.
Short term license for 6 months (spring-autumn 2015) I think.

37438. Band II DX Loggings for 10 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-10 20:54:17 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37438

Hi All,

Out of nowhere came a very nice opening this evening towards Spain and Morocco. The Moroccan part was the best I have had this season. The opening featured slow fading and no movement of the Es cloud. Furthermore the skip area had a relatively narrow path, which mostly gave just one DX station on a single frequency.
This was day three in a row with both Band II Es and Band II tropo.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

For info - a file extension .docm or .xlsm shows that the file is macro enabled i.e it has a macro in it. Macros can be set to run automatically when the file is opened.

You can set the security level of Microsoft Office to prevent macros running unless you give them permission- or indeed block them from running as a security measure.

Hi Nick,

Sorry for a late reply, I am just reading your e-mail now. It is very busy DX days, just like the summer season can be at times.

Yes, your description matches the Msallata format very well. In fact I have never heard anything else from the station. And I have been receiving it for several hours if you add all openings up this season.

Would that be the first time you are getting Libya?

Best regards,
Janpeter

Hi Janpeter. At the same time of your logging of Radio Msallata (1153 UTC) I had on 88.3 a very excitable Arabic OM or preacher. It was very marginal and got a bit clearer briefly a little later on. Does this match what Radio Msallata had on at the time?
Good DX.

Hi All,

Below my loggings for yesterday. A day packed with DX, both Es and tropo. Even though it is August, the OIRT logbook is probably the biggest of this season.
Also, this was the tenth opening this year featuring Libya. And I have missed a few occasions.

Stand by, there is much more to follow from today.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi John,

My suggestion is, it's either the estonian Raadio
Kadi, or the lithuanian LRT Opus. By my laptop
speakers lousy audio, can not quite tell what the
man shous out, the intonation fits both languages.

Anyway, none of the finns, for sure.

Thank you Ilkka.

That narrows it down slightly. It's a tricky recording but just about clear enough. I think somebody might recognise this. Estonia would fit and Raadio Kadi would be a great catch.

Fingers crossed.

John

Well since Opus 3 play alternative/electronic music I can't see it being them. It sounds like he's saying "E.E! Trouble!" but I'm probably way off.
 Good DX.

Nick, Whitchurch, Hampshire.

Thanks Janpeter. It probably was them then.
As for receiving Libya, no that wasn't the first time. I received Radio Msallata in 2 or 3 openings last month. This is probably the best recording, with an ID:
https://app.box.com/s/ps1kcrpkbkirb6dx17mdi25ivxu7vs5p
From what I remember Msallata was in for >40 minutes during that opening.
There's also what is almost certainly Radio Al-Jawhara FM from Tarabulus/Tripoli on 107.7 as Tarek at Real DX confirmed that the accents are Libyan:
https://app.box.com/s/czewwfnzpzo4j65shne0tw76trjsqxn6
So Libya is definitely being reported more frequently this season.

I heard another burst of Algeria on 87.6 10 or 15 minutes ago so maybe another interesting day to come.
 Good DX.

Nick, Whitchurch, Hampshire.

  Hi Nick,

Sorry for a late reply, I am just reading your e-mail now. It is very busy DX days, just like the summer season can be at times.

Yes, your description matches the Msallata format very well. In fact I have never heard anything else from the station. And I have been receiving it for several hours if you add all openings up this season.

Would that be the first time you are getting Libya?

Best regards,
Janpeter

  Hi Janpeter. At the same time of your logging of Radio Msallata (1153 UTC) I had on 88.3 a very excitable Arabic OM or preacher. It was very marginal and got a bit clearer briefly a little later on. Does this match what Radio Msallata had on at the time?
 Good DX.

Nick, Whitchurch, Hampshire.

Hi All,

Below my loggings for yesterday. A day packed with DX, both Es and tropo. Even though it is August, the OIRT logbook is probably the biggest of this season.
Also, this was the tenth opening this year featuring Libya. And I have missed a few occasions.

Stand by, there is much more to follow from today.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

From: ilkka suni
Topic: 37441 Message: 37446

Hi Nick, John,

In my ear, the guy might pronounce:
"Riigi hitid...", yet I really can't tell - neither guess - the third word.

I.e. that would make Raadio Kadi. On their Thursday programming there
is hit music, from 1600 hours UT on.

Then again, I might totally be wild-goose-chasing.

73, ilkka

Hi John,

Most definitely Raadio Kadi.

They guy shouts something like “Hitiii hiti sadu”, a promo for one of their programmes, “Hitisadu” (=hit stories)

Great catch!

Best 73

Jukka

Thank you very much. Ilkka, Nick and Jukka.

It's been fun watching this unfold. Raadio Kadi is listed with 1kW so a nice catch indeed. This is now in my log.

Best DX!

John

37449. Perseus FM+ v1.1a (new) software demo

Yahoo group: SkywavesDX (2015)
Date: 2015-08-11 09:42:38 UTC
From: pe1etr@...
Topic: 37449 Message: 37449

Using the new Perseus FM+ software (1.1a). This is now freeware and will work with other FM downconverters.
I don't have a Perseus/FM+, so I used an old FM+ demo file recorded by Peer-Axel in N. Germany in
2011
Es from Italy with RDS.

37451. Unlisted Algerian FM stations

Yahoo group: SkywavesDX (2015)
Date: 2015-08-11 12:34:01 UTC
From: Ian Kelly
Topic: 37451 Message: 37451

Hi all. I started off a thread in the Unidentifieds section over on the Skywaves forum, so apologies if you've already read it, but I know not everyone on the Yahoo group is over on there.

I caught some of yesterday evening's Es opening to Algeria, though curry making duties meant I missed most of it!

I had one station that is not listed in FMLIST, on 97.8, at good levels. It was carrying Chaine 1, confirmed this as being parallel to 87.8 and the webstream for the network. So, either a dedicated Chaine 1 outlet, or maybe a local, carrying it as a sustaining service. I heard this at 1650 UTC, and it was still there about 90 minutes later, on my return to the controls.

Does anyone have any idea of the site, and any other details? Google was not my friend on this occasion.

I was chatting with Nick Gilly during the opening and he had some other unlisted Algerians as well, From what he remembers, "88.2, 94.5, 100.5 and 104.5 had unlisted Algerians on them. There might be one or two more. 100.5 was seemingly in parallel with Chaine 1 at first but a little later was not, suggesting an Algerian local."

I've discovered a useful page at the TDA website - https://www.tda.dz/fr/radiodiffusion.php#station - there's a drop down for 48 areas, showing their frequencies, including start dates. I went through the whole lot, but alas, I couldn't find any of the "unlisted" frequencies we heard yesterday listed. Maybe the list is out of date? Clicking some of the areas returned no results, so maybe the list is incomplete?

Another resource I found was Samir Elhacene's Algerian FM listing at http://www.elahcene.co.uk/algeria/. I'd forgotten about this resource and I know that Samir has posted to Skywaves in the past. He has some outlets listed on 104.5, including Radio Naama, a good bet for what Nick heard, as Radio Naama was coming through on its main frequency, 90.9.

Can anyone help with the unlisted sites and other details?

Ian Kelly

37452. AW: [SkywavesDX] Unlisted Algerian FM stations

Yahoo group: SkywavesDX (2015)
Date: 2015-08-11 13:16:24 UTC
From: Günter Lorenz (FMLIST)
Topic: 37451 Message: 37452

Hi Ian and all,

thanks for starting this thread.

I was in contact with Samir a few days ago, and he told me that unfortunately he has no time anymore to update his site and FMLIST ALG.

His website is still a gem, and his work for FMLIST was excellent!

Anyhow, I would like to add all missing ALG stations to FMLIST, even without knowing the location. Best would be to use FMLIST notifications.

When researching on the web, don’t forget to check Facebook – some stations do have FB pages, and please add the links to FMLIST.

WRTH seems to have little information; French-speaking DXers might want to contact Algerian Radio for details, perhaps try with a reception report?

ALG frequencies might also be found in ITU registration files, they certainly do coordinate with their neighbors.

And last but not least we could ask DXers living in southern Spain to check for Algerian stations.

73,

Günter

Thanks for that link Ian. I'd forgotten about that.

Looking at my notes on the Skype chat I also had a relay of Chaine 1 on 95.3, but that might have been Radio M'sila as listed on Samir's site. 88.2 was Chaine 2 which regularly appears during Es to Algeria. 94.5 was I think Jil FM, which is listed as Algiers on a couple of radio station streaming sites, but I don't know how accurate their information is. Good DX.

Nick, Whitchurch, Hampshire.

37457. Unidentified Russians from 25-06-15

Yahoo group: SkywavesDX (2015)
Date: 2015-08-11 21:00:11 UTC
From: John Faulkner, Skegness
Topic: 37457 Message: 37457

I hope I am not bombarding the forum with too many recordings of unidentified stations.

The 25th June was particularly interesting with lots of Russian stations to the top of the band and some possible extended/chordal hop into Yaroslavl.

Sankt-Peterburg was well received, but nearby cities were also received, plus stations from Estonia and Lithuania.

Here are three recordings with potential IDs.

105.3 unid possible jingle ID 1705 25-06-15 - https://app.box.com/s/qyqpl39sbr7awwkodbbgq07w6d3xt98l

105.5 unid possible IDs 1705 25-06-15 - https://app.box.com/s/vuklhpsu8rebijibijvx5fqjx1j7ekaa

107.0 unid with possible ID 1705 25-06-15 - https://app.box.com/s/b7jatc13ycvy5ejxmchvdf44tf3z38hu

** In addition, I question my logging of Dorozhnoye Radio from Yaroslavl on 103.8. The RDS was 7827 __OV____ . Just to make sure there aren't any nearer transmitters as this was a further 500 km from the main reception area.

Thank you for any help.

John

37458. Band II DX Loggings for 11 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-11 21:15:05 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37458

Hi All,

August continues to be in an excellent DX shape, with day four in a row with Band II Es and tropo. Looking at the whole of the season so far, despite of the very poor start end of May and the beginning of June, at my location the sporadic E propagation is better than average. It does not qualify for a good season, at least not yet. But who knows what still lies ahead of us.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi John,

As far as I am concerned you can never send enough of those audio fragments to this list. I love listening to them, trying to catch any ID's. Or other hints that may point into a certain direction.
With regard to Dorozhnoye on 103.8 MHz, I would suggest that this was Borovichi. FMLIST does not have any RDS information, but I am sure they will have RDS.

73, Janpeter

Thank you Janpeter.

This is an area I try to be careful with. I like to help other people too, but have made incorrect assumptions in the past, so I may not be the best qualified to help, unless it's with a UK station.

Thank you for the info about Borovichi. I did not see this due to the degree 'focus' on FM List, but this fits perfectly as the conditions moved southward from St Petersburg. There may even be more than one path open.

Back to the files anyway.

Cheers.

John

Hi Günter. Thanks for your ideas. I found that Chaine 1 does have a Facebook page at https <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>:// <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser> www.facebook.com <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>/ <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser> chaine.une <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>? <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser> fref <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>= <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>pb <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>& <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>hc <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser> _location=profile_browser <https://www.facebook.com/chaine.une?fref=pb&hc_location=profile_browser>, so I have just sent them a message. As the recipient probably only speaks Arabic, I don't rate my chances, but who knows?

Are the ITU registration files publicly available on the web?

Subject: [SkywavesDX] Unidentified Russians from 25-06-15

I hope I am not bombarding the forum with too many recordings of unidentified stations.

The 25th June was particularly interesting with lots of Russian stations to the top of the band and some possible extended/chordal hop into Yaroslavl.

Sankt-Peterburg was well received, but nearby cities were also received, plus stations from Estonia and Lithuania.

Here are three recordings with potential IDs.

105.3 unid possible jingle ID 1705 25-06-15 -
https://app.box.com/s/qyqpl39sbr7awwkodbbgq07w6d3xt98l

105.5 unid possible IDs 1705 25-06-15 -
https://app.box.com/s/vuklhpsu8rebijibijvx5fqjx1j7ekaa

Quite unclear. Perhaps Avto Radio ID at 01.15 ? (Love Radio is also possible)?

107.0 unid with possible ID 1705 25-06-15 -
https://app.box.com/s/b7jatc13ycvy5ejxmchvdf44tf3z38hu

"Serebryanyi Dozhd" ID at the beginning of the clip.?

Reijo Alapiha

Joensuu Finland

** In addition, I question my logging of Dorozhnoye Radio from Yaroslavl on 103.8. The RDS was 7827 __OV____ . Just to make sure there aren't any nearer transmitters as this was a further 500 km from the main reception area.

Thank you for any help.

John

Just to remind, the Perseids meteor shower max. is at hand.

The radio peak for this morning passed Finland, drifting out roughly
1+ hour ago. The visual peak over here, is expected tonight.

I missed the morning radio peak, yet noticed there was plenty of
low-powered i.e. 1 kW and below tx, pinging. Dense scatter also
appeared to produce Es-like conds, momentarily.

Yes, 105.5 was Avtoradio, presumably from Rybinsk (Yaroslavskaya obl), as some listener asked to say hello to the Molotov family from Rybinsk... no other clues...

No clear ID on 105.3 (something vague like 'v efire na Love' that is 'airing on Love') but the hosts were mentioning some guy who decided to spend his vacation on 33 Saint-Petersburg beaches without 'leaving our beloved city'... So it must be LoveRadio from S-Petersburg....

Thank you very much Leo.

Really pleased with the likelihood of Avtoradio from Yaroslavl on 105.5. So it looks like my tentative Yarolavl on 103.8 was correct also. Yaroslavl is almost 2600 km from Skegness. This transmitter was 'on path' too, so I guess that nails it. Amazing!

I think every station from Saint Petersburg was coming through during the late afternoon of the 25th , many with RDS, so Love Radio 105.3 makes sense too.

33 beaches in St Petersburg? That's a lot. I just looked at the map - I didn't even realise St Petersburg was by the sea! How did I miss that?

Thank you Leo and best wishes.

John

One correction: I just received an email from Victor. He wrote to the Skywaves group 12 hours ago but his email still hasn't appeared!

Victor also agrees Leo. But my 103.8 apparently is Borovichi and NOT Yaroslavl. There is a partial PS (scrolling perhaps?) showing likely BOROVICHI. But Rybinsk (Yaroslavl) on 105.5 must be correct.

I'm sure there is a lot more from Russia on the files. Hopefully checking more of this today.

Thank you Leo and Victor. No thanks to Yahoo (as usual).

Topic: 37457 Message: 37470

OMG, what a coincidence! I was listening to this very program (hosted by Anton Dolin interviewing the famous Russian actor Veniamin Smehov) a few days ago! And i had a feel i might be hearing it on RSN (107.0) then, however, google led me to the VestiFM website (there is a recording of this program aired on 09AUG, reportedly at 1705 MSK - BTW, whats the time in your audio clip names - UTC or?).
http://radiovesti.ru/episode/show/episode_id/35030

But then again, you heard the same program on 25JUN. So there is an possibility that i also heard it on 107.0 (RSN) rather than 97.6 (Vesti FM). Furthermore, a quick google search confirms that Anton Dolin (the host) also works/worked for RSN.

Go figure....

But - unlike Reijo, i failed to hear the Serebryanyy Dozhd ID. What i did hear was "Dolin i ego serebryanyy golos" (Dolin and his silver voice)....

106.9 unid 1711 25-06-15
https://app.box.com/s/kzxcmymf0873e3l12iloedlws5ftp6ug

I hear "Maksimum" then reference to "Evropa", but there is an ID for "Spirit FM" just to confuse matters. I don't think Spirit FM relates to the Russian station, but this is also unidentified.

If it helps, this station is also appearing on 107.2 and 107.6 at the same time.

I have a PI code of 78AB, but I don't know if this appeared while I was tuned to 106.9 or 107.0.

107.6 has a real pile up of Russian signals with a possible ID, but I don't know which station is which:

107.6 pile-up with possible ID 1711 25-06-15
https://app.box.com/s/93p4yunsrl8ypubouknm8243yhje6z9z

Fingers crossed on Yahoo now.

John

Hi John,

Spirit FM is a Russian broadcaster, operating on the Finnish
territory, also broadcasting in English. The station is ex- Radio Sputnik.

See for the details, under the FMLIST section FIN.

That's a big coincidence. :O)

I have only started checking through my files from the 25th June and the Russian DX started here at 1702. I am up to 1711 in my files so far and I think there is a lot more of this to come, so possibly other recordings on the way

Don't you just love this great hobby? :O)

Actually, so it was still in June, as Ilkka writes. In July, all these frequencies were switched back to Sputnik and Spirit is now on 101.4 after the bankruptcy of Spin FM. (Looks like I need to update FMList...)

John, yes you managed to hear Spirit FM on all their frequencies!

BTW, the 106.9 tx is 4 kilometres away from me. Some will pay for what others pay to avoid, as the old saying goes... ;) Congrats!

Best,

Oh yes Jukka. Know what you mean. :)

Amazing coincidence again!

Thank you Reijo, Ilkka and 'others'. I say 'others' as one or more posts are out of sequence and yet to reach my inbox. Maybe I am the main problem with Yahoo :)

Appreciated once again.

John

From: John Faulkner, Skegness
Topic: 37477 Message: 37477

I have an unlisted frequency of Radio City on 106.4. Presumed the Finnish Radio City.

106.4 Radio City, unlisted site 1711 25-06-15
https://app.box.com/s/cz69lofgr6xyr1blekv63krm5jtkfx90

John

Hi Jukka,

Some more to update:
105.0 Radio Rock, Lappeenranta.

This very tx is operational since 2013, yet seems to been deleted from the FMLIST. Also, on 105.0 is listed the temporary Suviseuraradio, Lappeenranta. I believe, the correct QRG for Suviseuraradio Lappeenranta-tx is 94.4, at least they were on air, on the very frequency, as the incident was active a few weeks ago.

73, ilkka

37479. DAB in Brighton at 192 kbos

Talk on 107.6 is the same as 106.9/107.2 - Spirit Fm/ex-Sputnik in FIN
Music on 107.6 Dorozhnoye Radio, Priozersk or Pskov, RUS

Victor

Yes, Sir! (we can boogie ;) Kotka, Mansikkavuori Radio City Kaakko 26E5955 60N3134 17 130 106,4 1 kW V

Kaakko means South East. They may have some local content, ads at least.

The most updated list of Finnish stations can be found from:
http://www.mediamonitori.fi/index.php/taajuuslista
http://www.mediamonitori.fi/index.php/taajuuslista
Put the frequency into "vapaa haku" and press "Etsi" (search).

The site contains oodles of current stuff on the Finnish radio scene for you to brush up your Finnish *or* your google translation skills.

PS yes I'll update the FMList. Soon. Promise ;)

Best 73,

Jukka

Hi Istvan,

Isn't the PI on 93,2 40B0 (not 4080)? If it is, then this is supposedly from Libya. It has been received several times during openings to Libya. Would that match the reception area you had?

73, Janpeter

Hi, saying that "exact" PI belong to this and that _without_ the audio are
just like jokes. Noted (from our database in Finland) that PI "3000" is
used / has been logged from BLR, ROU, TUR and POL. So several options
possible without the audio..

Hannu

Very much an Italian day today, as you might have spotted! A few signals
were very strong and even several dB stronger than my local Belmont
transmitter. I checked the OIRT band on my XDR-F1HD during the peak of
the strong Italian signals and discovered severe overload down there.
Italian stations were all over the place! The FDM-S2 coped perfectly.

I love it when the entire FM band turns into thick layers of Italian
pasta. Not a single frequency from Belmont, Tacolneston or Peterborough
survived the onslaught.

The French Riviera and North-west Italy provided a 'proper' appearance
in today's opening. These areas are notoriously difficult and quite rare
due to their closer distace to the UK.

The big catch for me today was my first properly identified Turkish
station here in Skegness, with Damla FM from istanbul popping up on 87.5

with Turkish music in parallel with its web stream. Libya also made an appearance on 96.5 in what must have been double hop, the French Riviera being the first hop.

With all this, it seems clear that this year's sporadic E season is trying really hard to recover. Today's strong signals seemed to compare favourably to the strongest Italian signals from last season, so I took some readings and made comparisons. Using the dBf scale on Konrad's XDR-GTK software, I observed that the strongest Italian signal today was still 7dB down on the strongest Italian signals from last season. Still, this is a BIG improvement from the first few weeks of this season, which has been the poorest I have known.

It was great to observe so many French mainland transmitters too. I love it when this area comes in. I was hoping to receive Switzerland, but conditions didn't quite get close enough for this ultra-rare rare Es country. Nice to observe double-hop to Libya at the height of the French Es. Only one station made it through though. Wadah FM from Misratah on 96.5. This was just strong enough for the PI code but I managed to grab a clear vocal ID. Misratah is slightly further than Istanbul from here.

Some facts and figures: 581 stations feature in today's log (not including unids) from 16 countries. There are 266 personal firsts in what is my second largest band 2 logbook to date.

37490. Greek regional Fq-IDs of Proto Programma ?

Yahoo group: SkywavesDX (2015)
Date: 2015-08-13 08:47:19 UTC
From: Arvid Husdal
Topic: 37490 Message: 37490

Hello,

Just a question about a couple og logs I have had from Proto Programa (ERA 1):
On July, 8. I had Kerkyra/Korfu 91.8 with great signal, and as identification/jingle on 91.8 (14.32- UTC)

"Proto Programma, 88.6 (...) 91.8"

Could this be regional identifications, as both transmitters of ERA 1 are to the northwest ?

73, Arvid, Kristiansand NOR

Hi Nick,

Congratulations with these excellent loggings! A very nice opening indeed.
I would love to see your loggings on DXMAPS (through FMLIST). Is there a possibility that you start using FMLIST for your loggings? I know you have your computer away from the receiver, but maybe a tablet or smart phone could work?

73, Janpeter

37496. Re:: Review of Sont ST-SB920 Tuner

Yahoo group: SkywavesDX (2015)
Date: 2015-08-14 12:12:02 UTC
From: alex_cator_mmi@...
Topic: 19532 Message: 37496

My Sony ST-SB920, which still has the stock filters, has slightly better selectivity below than above the intermediate frequency, but there isn't much in it, unlike my Grundig G5, which again currently is still with the stock filters, which are two MuRata L10.7S 180 kHz filters and the selectivity is much better above than below the intermediate frequency. On my G5, for example, there is more splatter on 102.300 from Heart SHC (102.4) than 102.475. It was also possible to receive BBC Radio 4 from Sutton Coldfield (92.7) in Felixstowe Ferry (or was it Bawdsey?) on the Suffolk coast, despite the same station on 92.5 from the local Manningtree transmitter, yet there was too much splatter on 92.3 for reception of BBC Radio 3 from Peterborough.
My G5 is soon to be fitted with two MuRata 110 kHz filters, which I think are 10.7HY filters, out of a pack of five. The remaining there will be fitted into a Sony ST-SE520, which I have yet to own.

Of course it does. Just make sure to set 192 kHz bandwidths.

Don't you need a special plugin? Or does the latest version now have it
built in?

Hi John,

Another unbelievable logbook, congratulations. You must be doing a lot of hard work to put all of this together. It has in any case convinced me that single frequency tuning will soon be history for me, I just can't let go so much of the DX by not using an SDR receiver.

I have a few solutions for your UNID's.

> Unidentified / Unlisted:
> 98.1 1028 I UNID, ? 54AA DolceMus

This is Radio Dolce Musica from an unknown site.

> 106.7 1039 I UNID, ? 5190 (Radio Amore?)

This is the PI for Radio Amore Dance, again an unknown site.

> 101.0 1151 ? UNID, ? 5465

Radio Studio 101, Tortolì/Via Tirso 8 (OG)

> 93.6 1825 ? UNID, ? 3023

Radio Nacional, Tiranë/Fushë Dajt (ALB)

> 90.8 2213 I UNID, ? 5327

This one is interesting. This is the PI for Radio Pulce, there are two sites on 90.8 MHz: Buti/Monte Serra (PI) and Camaiore/Venti di Pedona (LU). The reason that you did not find this in FMLIST is that very recently both txs have changed to RDF 102.7. So here you see a downside of a delay with processing the loggings. In the interim changes could have occurred. Oh well, nothing is very easy with our hobby :-)

Yep, works like a charm.

He has to install the mpx-plugin from here (use Translate) :
http://rtl-sdr.ru/page/vse-dostupnye-na-etom-sajte-plaginy-s-kratkim-opisani
em

Then configure the VAC cable : SR 192000 to 192000.

Choose the VAC Line input in the mpx plugin and Enable MPX Output.

In RDS Spy choose the same VAC cable.

That should do it roughly J

From: John Faulkner, Skegness
Topic: 37489 Message: 37503

Thank you Janpeter.

You're quite right - it's time consuming, but I am determined to get through all the files, technology permitting. The FDM-S2 has turned the worst season I have known, into the best! I not even half way into my files and there are already close to 5000 loggings in this year's sporadic E log.

I will need to adopt new tactics when it comes to next year's season. I will probably get behind with the loggings again, but I aim to be more careful regarding the number of files I record.

I still wonder if there is room for *some* more automation regarding loggings, but I see a big problem with that: Determining transmitters on Multi-tx frequencies. The knock-on effect is an increasing chance of error with too much automation. Live DXing is still king, whether it is in real-time, or when checking an SDR file manually.

Thank you for the info on my unidentified loggings. I will update these shortly.

I am currently about half way through the nice Russian/Scandinavian/Baltic opening from June 25th. It will easily be next week before I have completed this one.

Cheers

John

I have strong signals from two stations on 88.0 MHz. One perfectly identified thanks to RDS: MFM (PI 1283) from Boujdour (AOE). The other blocking at times the signal of MFM with RFI-Afrique programming (// with Direct Afrique web stream). Listed is Nouaktchott!! Mauritanie with 1kw.

Hi Marc
I´m fellow DXer of Günter, and, uffff, I'm a bit clumsy.... Could you explain it more deeply?.
I only managed to make the RDS Spy program work me at times, and often does not work. I think that is related to the SR upper and lower limits (in VAC). If i put 192000 up and down, RDS Spy doesn´t work. I configured the VAC program with two cables, like HDSDR, but nothing, it´s imposible.
Thanks a lot

Tomas Gonzalez

For this QRG I have tx Loznica/Gučevo-Cer (ser), coordinated with 25 kW, h-pol. But there is something strange. In my personal list I have indicated this as a planned tx, but I have also indicated that I have received this transmitter. So it seems that this tx has been activated.

Hello Ruud,
Thanks.

I don't have a Perseus/FM+ so can't test it. I understood from reading Nico's notes on the Yahoo Perseus Group, that the update is to allow the use of third party downconveters with FM+ software, and remove the licensing restrictions.

Peter

Hi Ruud,

this is what Nico Palermo wrote about the last versione of FM+:

Since the number of users of the FM+ was not very high I decided to make the FM+ software free for everyone who has a down-converter for the 88-108 MHz which could fit the specifications of our FM+ converter and interface properly to the Perseus receiver.
The new version v1,1a of the software is offered as is. To use it you need an FM+ converter or just a decent down converter with a 80 MHz LO and a Perseus receiver.

The software demodulate s the RDS text messagges and PID, has an excellent audio quality and if you have still experience with your iron it would be worth looking around the net for the schematic of a good converter for the purpose.
No FM+ software registration procedure will be required anymore. Feel free to download and use the software at your convenience.

The Microtelecom FM+ converter itself will be placed out of sales soon as we have no more requests from new users. Users who already own one of these units could benefit of the new software distribution which has been tested also on W10 and should therefore grant quite a long life-time to the units.

No wonder I couldn't find these under Croatia. :O}

Just thinking out aloud regarding Radio Beograd 1 on 93.4:

I see two transmitters for Radio Beograd 1 in Serbia: Maljen at 25 kW and Rosomac at 500 watts. I presume Maljen is still on-air. (??) Maljen would be the logical site on two counts. 1, because it's higher powered (it doesn't always work like that as we know) and 2, it's on beam. The conditions never really extended down to towards Rosomac and the Bulgarian border area at this time so I am tempted to claim Maljen. With such intense activity as today's it's probably best to let this go as I cannot be 100%.

37523. To all Skywaves Investigators ...

Yahoo group: SkywavesDX (2015)
Date: 2015-08-15 15:05:27 UTC
From: John Faulkner, Skegness
Topic: 37523 Message: 37523

I just updated my FM List log, the log on the new Skywaves forum, the log on my blog and then the all time sporadic E log on my website to include personal first-time catches. That in itself took me about an hour and I still haven't changed everything. It's just too complicated.

I like to thank those who have helped me and try to include your names in my loggings if possible, but in view of this crazy season of thousands of SDR loggings I may just update the main all-time log on my website for the moment. It's all too much to handle now., but make no mistake, your efforts in tracking down unlisted stations and helping me and other DXers does not go unnoticed.

To all those who do the time-consuming investigative work and help us with our unidentified stations, THANK YOU again.

John

I ran this through Google Translate and just wanted to clarify ... the station I received was in Maasdriel and their cable had been broken/hijacked by Muziekstad FM for their own pirate transmissions? That's quite amazing if so.

Now good video from RTR Pskow on 49.757,812 Mhz. Also 49.739,633Mhz and maybe Ukraine starting to build.

Regards
Paul H

Several carriers here on R1 producing colur pictures and sound from Belarus also Russia 1 battling with it.
Weak carriers on R2 as well now too weak for pictures yet.

my SA3ES ,was the same, especially noticeable after replacing the
filters with 110/50khz filters

93.6 was easier to access next to Holme Moss than 93.8 was.
I never minded, I decided it wasn't worth re-aligning, it was better
having excellent performance on one adjacent than mediocre
performance on 2 adjacents

I could still just about hear Machynlleth on 93.8 anyway

That is quite incredible. The station themselves got in touch and asked me if I had a recording so they could hear my reception. I obliged of course, but what a revelation this is!

Thank you for sharing this.

John

Date: 2015-08-15 17:48:36 UTC
From: AnnePaulWill@...
Topic: 37525 Message: 37533

Getting weak/fair video now on 49.760,411 Mhz, not had this before. Quite wide carrier on spec lab. Closest match on Jurgens list suggests 1TV Nyandoma Arkhangelsk. Video was good briefly but could not make out a logo. Would make sense as my antenna is very North East pointing at the moment.

Regards
Paul H

R1 Still going strongly with good video now on 49.739,633Mhz looks like 1TV.

Earlier had R3 open with carriers on 77.260,486 Mhz and then 77.260,413 Mhz , but not quite at video level so no id. Belarus now taken over from 1TV.

R2 now with what looks like UT1 on 59.250,011Mhz

R3 in again now with 77.260,486 Mhz with weak video and also weaker offsets on 77.250,010 and 77.252,610.
All change again with burst of video on 77.250,052 Mhz but 260,486 dominating with better video now -could be RTR.

Never had so many R3 carriers!

Hi Jurgen, Didn't notice the click, but carrier was certainly 20hz or so wide so maybe Rostov is the better fit.

Also logged on R3, 77.250,012 Mhz, suspect Belarus (was very strong on R1 at the time)

Possibly also my first R4 carrier, 85.249,991 Mhz

Things quiter now with just Belarus perfect video on R1.

Thanks

Hi All,

Major geomagnetic storming stirred things up in the ionosphere yesterday evening.
Resulting in a big and persistent sporadic E OIRT opening, which lasted until after local midnight.
A good number of stations were audible that had not been received earlier this year. And there were even a couple of first time ever catches.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi Jürgen,

A very impressive logbook, congratulations. Especially wih the 2xEs catch, which unfortunately is so rare on OIRT.
My reception results were very similar, although I did not get any 2xEs. But getting some >2500 km stations is always nice.

I hope there will be a few more of these openings, before the season's end.

73, Janpeter

More interesting cx this evening, with long distances and rarer catches, with very little boring BLR / UKR stuff

37554. Sporadic E Videos - 15.8.15

Yahoo group: SkywavesDX (2015)
Date: 2015-08-16 10:27:25 UTC
From: chris.thatcher123@...
Topic: 37554 Message: 37554

Hi folks,

Here are some videos I filmed during a fantastic SP-E opening to Russia on 15th August.

http://youtu.be/_FQ0jgD-cSE = R1

http://youtu.be/bXKnLqNrcIU = R3

http://youtu.be/luHuCnBykjs = R3 with clear "E" in top left hand corner.

Annoyingly, on R3, there was a near-perfect colour picture (with no SECAM "fire") and good audio, only seconds before I managed to find & switch on the mobile phone's camera. Isn't that just sod's law!
Colour picture never came back.
There is an "E" in top left hand corner of picture. The programme was selling jewellery.
I don't know where the transmitter is.

73,

Chris (Lincoln, UK)

Thanks Jurgen,

I knew I could rely on someone like yourself to come up with the answer to my question.
You're quite right, it was an "e", not an "E", on the top left of the picture.

So it's from Ukraine.

I've never seen R3 signals so late at night - 22.50 BST, (23.50 CEST). I was just about to go to bed, and thought I'd have one more tune around. So glad I did!

Best regards,

Chris (Lincoln, UK).

Thanks Jurgen for that info as I had the same "e" on R2 as I have only just taken up band 1 DX again and so glad I did.I did put my dipole on the roof and a bad move too much QRM so it's back at 3 M at the East side of the house screened from the PMR station on the hill 1 km away.

Excellent videos Chris nice to see the JVC TV working well an excellent set.
Andy

37560. FW: Greek regional Fq-IDs of Proto Programma ?

Yahoo group: SkywavesDX (2015)
Date: 2015-08-16 16:48:58 UTC
From: Arvid Husdal
Topic: 37490 Message: 37560

Hello, Group,
will repost this one: Comments appreciated !

Hello,

Just a question about a couple og logs I have had from Proto Programa (ERA 1):
On July, 8. I had Kerkyra/Korfu 91.8 with great signal, and as identification/jingle on 91.8 (14.32- UTC):

"Proto Programma, 88.6 (...) 91.8"

Could this be regional identifications, as both transmitters of ERA 1 are to the northwest ?

Hi Jurgen,

Once again, thank you for the info on the likely R3 transmitter. As you can see in the video, there was no co-channel interference at that time.

Cheers for now,

Chris (Lincoln, UK).

Thank you for explaining this again Jürgen. All of a sudden I know the solution to my UNID Radio Stalitsa of yesterday. I got this on 69.23 Mhz, with Geranony being very strong on 69.26 MHz. So I did not get a new station, but the Geranony stereo subcarrier instead.

> You should keep an eye on E2, the AFG carrier comes in more often than I ever

Yes, I need to do that indeed. I more or less forgot about E2, since the closure of the Iran stations. Let's see if August brings some more intense openings into that direction.

73, Janpeter

From: davebunyan@...
Topic: 37554 Message: 37565

thanks for this id - I was getting it on R2 around 21:30 UTC - it didn't quite make it in colour but the "e" logo was very clear and the signal - with sound was quite persistent.

I also had three carriers on channel R1 - one of which had the "1" logo for Rossiy 1.

The above was along with a bunch of strong OIRT signals -mainly from Belarus.

Rgds

On Victor's list, its marked as planned (Roslavl', Smolenskaya obl).
OTOH, i used to hear the 'Khorosheye Radio' jingles on the Pridnestrovian synchro-network on 88.8 (aka Shanson)...
Is Khorosheye Radio somehow liaised with Shason (program contents seem similar)?

Hi Leo,

Thank you very much for the response.

Actually, Radio Shanson liaison would make sense,
as this 88.8 reception [with full-hour ID
Khoroshnoye Radio] I had last Saturday, Aug.
15th, must have been from a site much further in
the South-East than the Smolenskaya oblast. By
the time, I was receiving stations from Roumania
to Ukraine S.E, with Krasnodar being//having been
furthest in the east, coming in.

37570. French Autoroute received on 107.7, 25-06-15

Yahoo group: SkywavesDX (2015)
Date: 2015-08-17 11:12:13 UTC
From: John Faulkner, Skegness
Topic: 37570 Message: 37570

I received one of the French Autoroute transmitters on 107.7 during the Es on the 25th June. I doubt there are any clues as to the transmitter site, but I see there are two networks now (other's too no doubt?). Radio Vinci Autoroute and plain old 'Autoroute' seem to be the main two now.

My French is not so good but I hear the usual references to "vehicles" and a road closure (I stand to be corrected on this) and I think I hear a mention of Marseille, so I guess not local reports of any kind.

The propagation at the time was focused on Dept. 40 with France Bleu Gasgogne giving RDS on 103.4.

107.7 unid Autoroute network, possibly Dept. 40 2100 25-06-15
https://app.box.com/s/7hq23545bv8rybxj5g4v9d4gsy6elnmn

hello john, it's a sample of national news, the woman talked about uber pop services.
At 20 seconds you received two different transmitters with some echo :)

Thank you Cedric.

After I posted this I discovered more stations, presumably in the south-west of France. Political talk on 105.1, so presume RTL. Full RDS from France Info on 105.5, plus French talk on 106.1. I couldn't guess which transmitters these would be either, but presume the Bordeaux or Bayonne area. The France Bleu Gasgogne tranmitter on 103.4 would be Mimizan.

Good DX!

John

37576. Band II Es - Spain & Algeria - and mystery RFI in English 87.8

Yahoo group: SkywavesDX (2015)
Date: 2015-08-19 12:00:51 UTC
From: Ian Kelly
Topic: 37576 Message: 37576

Sporadic E: Spain and Algeria have been in and out for the last 30 minutes or so here, not particularly strong and nothing above 91.4 heard (where I heard Talk Radio Europe from Mijas, Spain, in English for the third time this season).

Briefly, a mystery station heard briefly on 87.8 at 1130, in English, with Radio France International ID. Any ideas where this is from (maybe someone relaying RFI)?

Ian Kelly

From: ilkka suni
Topic: 37577 Message: 37577

Hi folks,

Now, I know I should acquire one or two proper mast pre-amps, the ULNA or equivalent. But as I have the 30 kW tx just 2 miles away, and my antenna mast seems too stuck to bring down, after having not been maintained for several years, I must come up with at least a temporary [vertical] solution for the autumn tropo conds, over here in Finland.

Folks, how are your experiences and opinions on line-amps? Are line-amps any good, or is the noise floor too much, do they just spread the local ground-wave tx's all over the band? Is the ultimate truth a mast re-amp, and in no way a line-amp?

This is the model, I'm considering buying:
http://www.antennenland.net/TVS-11

Thanks in advance, for you comments.

37578. RFI relay on 87.8 - treble hop Es to Benin???

Yahoo group: SkywavesDX (2015)
Date: 2015-08-19 15:54:46 UTC
From: Ian Kelly
Topic: 37578 Message: 37578

Further to my alert posting earlier, heard via Sporadic E opening to Spain and Algeria at lunchtime today. A mystery station heard briefly on 87.8 at 1130, in English, with Radio France International ID. Moments later, on 91.4, I heard Talk Radio Europe (TRE) again from Mijas, Spain, in English for the third time this season.

The only RFI outlet I could find listed earlier is on 87.8 - a relay via Radio Bobar in Bosnia. See http://www1.rfi.fr/radiofr/statiques/europenov05.pdf.

However, I was beaming just west of south, whereas Bosnia is more south-east from here and nothing else from that part of the world was being heard. As I heard Talk Radio Europe which serves ex-patriots, I wondered if this RFI relay was coming from the same area, from a station serving ex-patriots, either English (being that it was the English service) or French.

However, I've now found RFI's leaflet for their African service, and they have a relay on 87.8 in Benin, via Radio Cité, Savalou. Only 0.5kW! See http://www1.rfi.fr/radiofr/statiques/afriquenov05.pdf

Could it have been this? It would be a treble hop, but almost in line with (15 degrees apart) and 3 times the distance of Talk Radio Europe's 91.4 outlet.

I've just noticed those pdf files are some 10 years old! A Benin relay is not mentioned on RFI's current website that I could see: http://www.english.rfi.fr/general/20100208-how-listen-rfi-english.

Any thoughts anyone?

37579. Radio Slobodna Europa 95.1?

Yahoo group: SkywavesDX (2015)
Date: 2015-08-19 17:35:44 UTC
From: ilkka suni
Topic: 37579 Message: 37579

Hi folks,

I have these stupid questions, as I am pretty much forced to listen,
using bandwidth 80 kHz or less. So being, I cannot utilize RDS.

Any ideas on 95.1 "Radio Slobodna Europa"? My common sense says,
considering the current conditions, it would have been HRT HR-1
[Ulijenje, 3kW]. Yet, HRT HR-1 live stream was driving completely
different programming, and to me the language sounded more like Serbian.

Kept listening to this 95.1 broadcaster for some 7 minutes, and even
past half-hour they identified as "Studija Radio Slobodna Europa".

Which Croatian, or more like Serbian would relay Radio Free Europe, on 95.1?

Thank you.

Hello Ian.

The station you received might be RSA (Radio Sol de Almijara) from Nerja in Spain, which serves ex-pats. It relays BBC WS & WRN. When I received them via Es a few years ago, they were relaying NPR from the US which at first had me stumped, until somebody pointed out it most likely was RSA.
If you caught TRE from MIjas, then Nerja could very well be received as well since both places are not far from each other & are in the Malaga region.
Also somebody received English news broadcast presumed to be from Algeria on the same frequency this season. Maybe an unlisted RFI relay? Hopefully though you got Benin instead.

Regards,

sleeper77, Southampton.

I've had an UNID station with English-language news before on 87.8 during E-skip to the south e.g. see here on 23rd May: https://app.box.com/s/3rmthpwyqrky151tndhtveac20g9ll1n
This was suggested at the time to be news from Radio Algeria International so I presumed it was from that country. It certainly doesn't sound like news from an English ex-pat service.
The question is, does Chaine 1 (the only Algerian listed on 87.8) have any news bulletins in English from the external service?
 Good DX.

According to RSA's website the programme on at the time of Ian's reception is:
Wednesday, 13h-15h: Norbert with the Europe Cafe
Unfortunately there is no more information but it's definitely worth emailing them to find out if your station matches their output.
Good DX.

C'est la vie! My original gut feeling was that this was from an ex-pat station, especially given I heard Talk Radio Europe moments later. Thanks Nick, Sleeper and Stuart for your input.

Radio Sol de Almijara does seem the most likely source of what I heard today. A bit of wishful thinking with Benin, but a remarkable coincidence a station in Benin relays (or relayed) RFI on the same frequency. In fact, the evidence for Benin started to fall away the more I looked into it. Apart from the RFI PDF file from 2005 that listed the Benin relay on 87.8, I was unable to find any contemporary information from web searches to confirm that Radio Cite still carries any relays of RFI. The propagation research from my learned friends further dispels the Benin connection.

I think the mystery is solved, but I will make more enquiries.

Ian Kelly

Hello ilkka,

Maybe you received this from Bosnia and Herzegovina. There are two
stations on this frequency, which relay Radio Slobodna Evropa daily.

Radio Olovo
Frekvencija: 95,10 MHz
Vrijeme emitovanja:
08:00 - 09:00 Svaki dan
15:00 - 15:30 Svaki dan
18:00 - 19:00 Svaki dan

Nezavisni Radio TNT
Frekvencija: 95,10 MHz
Vrijeme emitovanja:
08:00 - 09:00 Svaki dan
15:00 - 15:30 Svaki dan

http://www.slobodnaevropa.org/howtolisten/default.html

vy73 and good DX,
Jozsi from Hungary

Hi All,
Strong carrier on 49.750,014 Mhz. Clean carrier with good clear 50hz sidebands.Weak video but not enough to id. 1TV Simferopol was in prior to this on 49.739,584 Mhz but faded and this came up strongly afterwards

Thanks for your commiserations Tim, but an interesting logging nonetheless, assuming this was RSA in Spain I heard, which seems rather likely.

I checked out FMLIST, but noted that there is no listing for RSA / Radio Sol de Almijara, but I tracked down their website http://www.rsafm.org/, which gives some more details about the station.

Their relay of WRN is mentioned, and checking the link out from their site to WRN's own website confirms that RFI is carried by WRN Europe from 1100 to 1200 UTC, which fits in with what I heard.
http://www.wrn.org/listeners/assets/PDFs/WRN_ENGLISH_EUROPE_A15.pdf

Great, thanks a lot for your help, Jozsi!

I had already visited the website, yet managed to miss the very info.

73, ilkka

** Personal 'First'

Another great day for E skip with 298 loggings from 23 Countries and 118
personal firsts. I am surprised by how many new stations keep popping
up. Don't be surprised if there are one or two duplicate entries in there.

The makers data sheet says the n/f is about 7dB which is very high! It is not designed as a pre-amplifier.

You would be much better to look at the VHF-1220FM amplifier shown on this page Masthead Amplifiers http://www.fringeelectronics.co.uk/standardrange.html it doesn't have to be right at the aerial. It has a noise figure of less than 2dB but doesn't say what the overload figure is and you will need an amplifier that can handle a very high signal level with 30kw txs just 2 miles away.

TGN-technology do some very low noise FM preamps - that are more expensive.

http://www.fringeelectronics.co.uk/standardrange.html

Masthead Amplifiers http://www.fringeelectronics.co.uk/standardrange.html Two models are available in the V.H.F range, all feature low noise figures. The V.H.F. 1220-

37594. Band II Sporadic E Loggings for 20 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-20 20:02:36 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37594

Hi All,

A nice, yet difficult Band II DX session today. Nice because this was an intense opening into Italy with the MUF above 108 MHz for quite some time. Difficult because of the large skip area, which did not help the RDS to be decoded. Also, for many received stations it was impossible to decide which tx site was being received.
But the biggest difficulty was due to a cyber attack on my internet provider. This made the internet connection highly unstable and occasionally extremely slow. With that, using FMLIST for real time logging was very stressful.
So this appears to be an unhealthy hobby after all :-)

Please take a look at my UNID on 107.7 MHz. I would appreciate any tips.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Moi Janpeter, as always..would be nice to hear the audio clip..Odd if really said "Eye" radio, imo.

"107.70 1400 I Eye (I) Radio, ? Could this be the ID for Radio International?"

Su (Radio International) DJK (should this sound as "Eye"(?)..deejaykei". Dance music (=disco/vocal house) mx format. "Rotazione musicale". The only time this has been heard in Finland was 1989, on 95.5 Pescara tx (by Harri).

37596. Re:: Opinions on line-amps?

Yahoo group: SkywavesDX (2015)
Date: 2015-08-21 03:43:38 UTC
From: pe1etr@...
Topic: 37577 Message: 37596

Noise figures of around 1.8 - 2dB are considered to be rather high for pre-amps these days. Even with 1980s MOSFET devices, noise figures of 0.9 dB could be attained. Modern pre-amps, some at affordable prices designed for Astronomy use, have noise figures of 0.4 -0.8dB Satellite LNBs with noise figures of 0.1 dB are common these days.

David, Peter, thanks for the comments and hints. Appreciate.

You are right, David. The 7 dB is too much noise. I suppose, the noise floor would eat up almost all the gain I could utilize. I'd better skip the Axing TVS-11.

I guess, some +10dB would be about the max. gain I could use, as already as it is all my receivers crash time to time, even with no amplification.

73, ilkka

Best recording of 87.9:

https://app.box.com/s/t3m9m9uxn6iqwer5r7rfyg5vwoppb1jc

The main station is Turkish pop. There MAY be an ID between songs but the signal is so weak here (predictably) that it's almost impossible to copy what's being said. There's another station with talking near the beginning (not sure where this is from). Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

Kurt Zscherp has IDed the Turkish station I received on 87.9 this morning at around 0700 UTC:

https://app.box.com/s/t3m9m9uxn6iqwer5r7rfyg5vwoppb1jc

Apparently there is an announcement (during a fade): "“Yazin en aktüel …. sharkilari Radyo Müzik’de” which means “The summer’s most recent …. songs on Radyo Müzik”. The only tx listed is Kayseri. This fits in nicely with Ankara and Lebanon being received in Hungary at the same time. Many thanks to Kurt for carefully listening to this clip.

The distance from here is 3177 km/1974 miles. Not what you'd expect two months after the summer solstice! Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

37612. Unstable carrier on R1

Yahoo group: SkywavesDX (2015)
Date: 2015-08-23 17:46:48 UTC
From: Christian Stödberg
Topic: 37612 Message: 37612

Not detectable yet on the TV but I’m listening with my Yaesu FT-857 and it’s very unstable. Much QSB and it sounds almost like a bit aurora in the signal. Probably 1+1 Kryvy Rig since it’s strongest on 49,749,99 when the carrier peaks.

73 de Chris

Hi , Strong carrier here on 49.749,974 Mhz, could be 2plus Moldova ? As it fades up many 6hz sidebands appear which makes the carrier sound unstable.

Hi Nick,

Congratulations with this remarkable catch so late in the season! This year's Es keeps surprising us, all in all quite an unusual DX season.
Paul Farley got Cyprus just a couple of days ago. So I guess we need to keep watching the band closely, until deep into September.

73, Janpeter

Kurt Zscherp has IDed the Turkish station I received on 87.9 this morning at around 0700 UTC:

https://app.box.com/s/t3m9m9uxn6iqwer5r7rfyg5vwoppb1jc

Apparently there is an announcement (during a fade): ""Yazin en aktüel …. sharkilari Radyo Müzik'de" which means "The summer's most recent …. songs on Radyo Müzik". The only tx listed is Kayseri. This fits in nicely with Ankara and Lebanon being received in Hungary at the same time. Many thanks to Kurt for carefully listening to this clip.

The distance from here is 3177 km/1974 miles. Not what you'd expect two months after the summer solstice!

Good DX.

Nick, Whitchurch, Hampshire.

The main station is Turkish pop. There MAY be an ID between songs but the signal is so weak here (predictably) that it's almost impossible to copy what's being said. There's another station with talking near the beginning (not sure where this is from).

Good DX.

Hi Hannu,

Thank you for replying. Unfortunately I do not have a recording. I did listen to the Radio International wen stream though and I have not heard something even close to the ID I got during the Es opening. So this will remain a mystery.

Moi Janpeter, as always..would be nice to hear the audio clip..Odd if really said "Eye" radio, imo.

"107.70 1400 I Eye (I) Radio, ? Could this be the ID for Radio International?"

Su (Radio International) DJK (should this sound as "Eye"(?)..deejaykei". Dance music (=disco/vocal house) mx format. "Rotazione musicale". The only time this has been heard in Finland was 1989, on 95.5 Pescara tx (by Harri).

Hannu

2015-08-20 23:02 GMT+03:00 Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX] < SkywavesDX@... > :

Hi All,

A nice, yet difficult Band II DX session today. Nice because this was an intense opening into Italy with the MUF above 108 MHz for quite some time. Difficult because of the large skip area, which did not help the RDS to be decoded. Also, for many received stations it was impossible to decide which tx site was being received.
But the biggest difficulty was due to a cyber attack on my internet provider. This made the internet connection highly unstable and occasionally extremely slow. With that, using FMLIST for real time logging was very stressful.
So this appears to be an unhealthy hobby after all :-)

Please take a look at my UNID on 107.7 MHz. I would appreciate any tips.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Thanks Andy & Janpeter.
Yes this was definitely a surprise! I saw that the MUF map had potential that way so parked the beam at 110 degrees and waited. Oddly, there wasn't much else coming in, apart from some vague music and maybe Arabic-sounding talk on 87.6, but too brief and vague to get a recording. The speech near the beginning of the clip sounds Slavic or Balkan so maybe this was from northern Serbia, which would be on the same path. I was surprised to see no other logs from the UK at the time.
Deep into September would be nice but I'd be surprised if it kept up that long. Still, you never know.
 Good DX.

Nick, Whitchurch, Hampshire.

The briefest of meteor bursts but with "Radio ...?... " mentioned. It sounds German and possibly "Radio Berichten" which, as far as I know, means Radio Report, so not helpful if so, unless somebody is familiar with the announcement.

Thank you

John

Old Perseus FM+ IQ WAV file by Peer-Axel (N. Germany).
Two French stations in one frequency. (both with full RDS)
Nice stereo audio from the second station.
Playback: SDR# with RDS Spy
https://youtu.be/6f-_yXOkM-o https://youtu.be/6f-_yXOkM-o

A wide FM demo file being played in WiNRADiO G39DDC native software. (Does not have RDS)

Hi John,

I believe, it's rather Ö1 than Bayern 2, with
their current affairs programming, or a news bulletin.

73, ilkka

Very good ears, Ilkka!
It is the "color" of the voice which makes me agree - it sounds Austrian and familiar, I listen to Ö1 quite a lot.
Tx Graz/Schöckl, 80 kW.

73,
Günter

Hello Tim

I enjoyed your clippings – at least, those I could read without getting spots before my eyes!

What magazines, if any, carry information about TV DXing, or FM radio DXing for that matter?

Have you done any writing recently?

Many thanks again.

Regards

Tim Arnold

Hi Tim,

Its along time since I have been TVDXing myself, I am just scanning all my old TVDX photos and articles. The only TVDX mag I know about these days is the BDXC Bulletin emailed from tv@... . A good source of lots of TVDX info is Todd Emslie's site http://home.iprimus.com.au/toddemslie/dx.html . The only writing I have done for years is a short biog for Todd's site!

All the best

Tim

SDR Console V2 on 7" Windows tablet
Playing a Perseus FM+ IQ WAV file (2MSPS) in SDR Console V2 on my new SNS JOI 7 Windows 8.1 tablet.
Intel Atom Z3735G, 1GB RAM 16GB storage and 7 inch IPS 1024 x 600 display.

Some problems recording the audio and some stuttering when recording in Bandicam. I'll work on it!

RadioUser magazine has a column on TV DXing (last month's also included Band II Sporadic E reports). The September edition is due out tomorrow. Also BDXC's Communication magazine has a column on FM DXing.

37632. Unid Arab on 87.5

Yahoo group: SkywavesDX (2015)
Date: 2015-08-26 15:25:37 UTC
From: Marc Vissers
Topic: 37632 Message: 37632

Hi there,

Throughout the season at several times I heard an unidentified station in Arabic on 87.5 MHz, also today for a short period. Considering conditions around the same time I think it resides somewhere in Morocco, perhaps Algeria. Did anyone else here that too perhaps or has more information ?

37636. Band II Sporadic E Loggings for 26 August 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-08-26 19:40:17 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37636

Hi All,

After returning home from work I found a very nice Es opening on Band II. With an unusual intensity for the end of August. Signals were strong and fading was slow, which made listening a real pleasure.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Dear Janpeter

Very interesting log because the reverse path was evident here in Southeast Spain yesterday (26 Aug 15).

At about 1700 local time (1500 UTC), I initially heard a programme in German on 101.0 (not ID-ed), an unused frequency locally here. During the next hour (1500 to 1600 UTC), transmitters in Germany were audible up and down the FM band, many in stereo and some providing RDS IDs. On some frequencies, different German stations were cutting in and out abruptly. Some French programmes were also heard. By 1600 UTC, the DX opening had finished here and only local stations were audible. It had been amazing.

Stations ID-ed were:
91.4 Bayern 1, Buttelberg, Germany, 25kW [1672km]
91.5 MDR Jump, Brocken, Germany, 100kW [1891km]
88.4 RDS= 'FIGAR'

I have been unable to ID the 88.4 station from its RDS [see attached photos]. Any info welcomed.

Location: Vera, Almeria, Spain [101m asl]
Equipment: Roberts Gemini 49 portable + internal telescopic aerial

Yours,
Grant Williams

Hi Grant,

Congratulations with catching the DX in the opposite direction yesterday. An amazing opening indeed this late in the season, with the MUF right to the top of the band. I even had a strong station playing just music on 108.0 MHz. Unfortunately not strong enough for RDS.

I do not recall seeing any earlier reports from you. Have you just started with this hobby? It would be good to see more FM DX-ers becoming active in Spain. Spain is an important DX country for us here in North West Europe.

Best regards,
Janpeter

Hi Grant again,

Welcome back to this wonderful hobby. Do you by any chance have the possibility to receive PI codes? A lot is still unknown from the area where you live. So if you have some spare time and could make a local bandscan, that would be great.

Do you have the possibility to install FM antenna's?

37656. FMLIST RDS PS

Yahoo group: SkywavesDX (2015)
Date: 2015-08-30 23:38:27 UTC
From: Günter Lorenz (FMLIST)
Topic: 37656 Message: 37656
Attachments: 1 described; binary payloads are missing from this source WARC

RDS PS: May I remind all editors and myFM logbook users that a RDS PS text usually consists of blocks of 8 characters. Some of these characters may be "space". But we would like to know where the spaces are, represented by the underscore in FMLIST. RADIO___ is not the same as ___RADIO, and RADIO is not a valid PS information.
On the enclosed screenshot, you can see an example of ☐bad practice☐: 6 DXers have declared to have received the PS ☐ULTRA☐, but none of them told us whether it is ULTRA___, _ULTRA__, __ULTRA_ or ___ULTRA. On another frequency, a DXer from Skegness ;-) has reported the PS as __LT____ - now this is great, because we can assume it is _ULTRA__.

Topic: 37656 Message: 37657
Attachments: 1 described; binary payloads are missing from this source WARC

I am glad you brought up this matter.

I am probably as guilty as the next person for not reporting RDS incorrectly, although I do try my best to record the characters in their correct place. In the case of the RDS field in the FDM-SW2 software, blank characters do not appear, hence I can only note down what I can see. i.e. "105_FM" instead of "_105_FM_", unless I know the correct positioning of course, but that cannot always be guaranteed as some transmitters might display "105_FM__".

I know that I don't insert my RDS data into the correct field. It /should/ be entered into the "*RDS received? (select "yes" for PS/PI details)*" field and not into the field which clearly states "*Details No RDS info here, please use radio button below!*". It is simpler. Yes, I must be getting very lazy in my old age, but also I find the RDS information is often different in the correct field and there are instances where I am not sure whether to change this data. I probably should.

There is a question, however. If a PS character is not known, do I enter a question mark or just an underscore? An example would be a partial PS for Catalunya Musica in Spain. The full PS is "CATMUSIC". If the first two characters are not present, would it be preferable to enter "__TMUSIC" or "??TMUSIC"? I think the second example looks messy. I think I know the answer to this. ;) Perhaps it's just time for me to follow the rules properly now.

John

Hi Pat. You have to click on the map (or tap it if you are using a smartphone/tablet) and it will take you to the next one. It's actually better than before because the first 36 hours or so are in 3 hour increments and you can see areas of tropo forming overnight and burning back to the coast as the day warms up. After that the maps are in 6 hour increments out to 6 days ahead as before.
 Good DX.

37667. FM radio bandscan in Vera, Almeria, Spain

Yahoo group: SkywavesDX (2015)
Date: 2015-09-01 12:00:15 UTC
From: Grant Williams
Topic: 37667 Message: 37667

Hello

Janpeter suggested I post a bandscan of stations received here near the coast of SE Spain. So here is a very basic list that excludes DX catches. Some notes:

* I have identified some of the Algerian stations but am not confident enough yet to list them - more work needed.
* The station names are derived from listening (and RDS), the locations are derived from online tx lists and occasional on-air IDs or (rarely) RDS.
* Almeria is both a city and a province. Listed within a station name, it refers to the province; in a location, it refers to the city.
* I have RDS (but no PI capability) so will add this data in future iterations. None of the Algerian stations display RDS.
* The empty carriers appear to be there to stop competitors nabbing a good frequency. For example, Cadena Energia in Mojacar moved from 98.2 to 99.8 earlier this year, but an empty carrier remains on 98.2.
* Permanent high pressure in the summer brings in a lot more stations, so the band is quieter in the winter (though some of the Algeria stations are year-round).

Hope this is useful in some way.

Yours,
Grant

From: William F. Kitching
Topic: 37664 Message: 37668

Hello Tim,

I am not sure of the power but it cannot be much. Reception in Telford is better on the vertical which gave PI and eventually a full PS. The horizontal beam only gave a PI. Not a good frequency though, QRM.

Luckily 97.40MHz has not been affected by it so is still good for MS.

I think the aerial is on top of a building in St Mary’s Street which is lower than the Church there. Very local reception I would say.

William.

hows the signal with you? any guesses on polarisation?

will be interesting to see if Sting 97.5 moves, causes problems or gets busted

I have it! playing heavy metal, whispered "NOVA" id

I didn't expect this
signal is wildly variable for some reason

I'm basically beaming due south on the vertical

the pirate has gone

some splatter from Rock FM on peaks,
nova vanishes if I go any wider than 50k

Hi Pat

You have to click the map to advance the hours/days or if like me you prefer the previous layout:

http://www.dxinfocentre.com/tropo_nwe_old.html
http://www.dxinfocentre.com/tropo_eur_old.html

Hi

why does DXinfocentre give you yesterday's tropo ducting situation and no more the 6 day forecast as it used to ??

Sorry if the question has already been asked.

Tropospheric Ducting Forecast for VHF & UHF Radio & TV

Thanks for this Andy.

I had no idea the old version would still work, unless this is a new URL.

I generally prefer to use the old system, but I can see the uses with
the new one.

Cheers

John

37672. Re: [SkywavesDX] FM radio bandscan in Vera, Almeria, Spain

Yahoo group: SkywavesDX (2015)
Date: 2015-09-01 21:11:58 UTC
From: Janpeter van Dijk
Topic: 37667 Message: 37672

Hi Grant,

This is very useful in many ways. I will help you trying to fill in the blanks, but I need some time for that. You can start doing that yourselve with the aid of this web site: www.fmlist.org
There is a lot of functionality, amongst others the possibility to make a listing for your location. This will provide you with the most likely stations to be received at your location. Just try it and I am sure you will like it.

I will be looking forward to see which PI codes you will be receiving in due course. These are also included in the FMLIST database, but quite a few are missing or outdated.

Best regards,
Janpeter

Onderwerp: [SkywavesDX] FM radio bandscan in Vera, Almeria, Spain

Hello

Janpeter suggested I post a bandscan of stations received here near the coast of SE Spain. So here is a very basic list that excludes DX catches. Some notes:

* I have identified some of the Algerian stations but am not confident enough yet to list them - more work needed.
* The station names are derived from listening (and RDS), the locations are derived from online tx lists and occasional on-air IDs or (rarely) RDS.
* Almeria is both a city and a province. Listed within a station name, it refers to the province; in a location, it refers to the city.
* I have RDS (but no PI capability) so will add this data in future iterations. None of the Algerian stations display RDS.
* The empty carriers appear to be there to stop competitors nabbing a good frequency. For example, Cadena Energia in Mojacar moved from 98.2 to 99.8 earlier this year, but an empty carrier remains on 98.2.
* Permanent high pressure in the summer brings in a lot more stations, so the band is quieter in the winter (though some of the Algeria stations are year-round).

Hope this is useful in some way.

Yours,
Grant

37673. Re:: Re: [SkywavesDX] FMLIST RDS PS

Yahoo group: SkywavesDX (2015)
Date: 2015-09-03 13:29:13 UTC
From: davebunyan@...
Topic: 37656 Message: 37673

Gunter - following on from John's comments - would you like to suggest a symbol we could all use to show missing letters when we receive a partial PS. In the past I've use a hyphen [-] until I realised it was also a valid PS character. I then went to an asterisk [*] but stopped using it for the same reason - and now use the equals sign[=] . I had never thought to use the obvious question mark symbol.

Noting the correct positioning of spaces can identify a specific transmitter - unless the tx decides to change it's PS, and just get a couple of letters can make the difference in identifying countries / stations using the same pi code.

BTW being able to turn the link to DX maps off is really useful - I try and remember to do that when playing catch up with my logs especially if they aren't for the current day.

.... and just to add that underscores are also used in valid PS names, though they are not common.

Question marks might be the correct option, but they look messy and cause minor confusion when looking at character positioning. I guess nothing is ideal, but which is best?

37675. AW: : Re: [SkywavesDX] FMLIST RDS PS

Yahoo group: SkywavesDX (2015)
Date: 2015-09-03 17:54:49 UTC
From: Günter Lorenz (FMLIST)
Topic: 37656 Message: 37675

Thanks for your considerations!

Radio_FM from Slovakia uses a real underscore, that’s the only example that comes into my mind. The underscore is the best choice as placeholder for the space character. If a station uses a real underscore, let me have that info or put it in the remarks.

My best choice for unknown characters is the question mark. It is rarely used as part of regular static PS, and symbolizes best what it stands for.

Hyphen or = are not so good, as they are used in PS.

I plan to change the font for PS fields and PS display to Courier (which is a fixed-width font) in the various FMLIST pages.

That should improve readability.

73,

Günter

A cuestion John.
What type of vertical antenna?
Many thanks.

Yes, perhaps this is Radio Maryja. The "Radija / Radya" pronunciation made me think it might be something more Baltic, but I wasn't sure there was enough speech to go on.

"A Körner Shop"! Boom boom indeed :) Like it. Those not in the UK might not be familiar with the UK term "Corner Shop". It's something of an institution here. Perhaps they are known by this name outside the UK? But our own corner shops rarely sell antennas or DX equipment.

If you ask for antenna recommendations these days, the most popular ones of recent years tend not to be easily available. The Triax FM5 was considered one of the best value for money band 2 antennas and performed better than most of its size. The Körner antennas are definitely worth considering. My own 9.2 is an excellent performer and optimised for good performance across the whole of the FM broadcast band. I would recommend a 9.2, or larger if you have the room.

John

https://youtu.be/6Z4VUM9oRlI

My Körner 9.2 antenna was vertical tonight, beamed approximately 150 degrees. Nice to hear so many interesting personal firsts too. I didn't bother to log the more regular catches, but to be honest there weren't many regulars anyway!

Good DX!

New transmitter today:

88.9 Mercury FM, [location unknown], Murcia province? [progs in English]

on-air liners:
"Spain's Mercury FM, playing just great music"
"Mercury FM, from Alicante to the Mar Menor"

Noise-free stereo signal (no RDS) but tx fault with power reduction once a minute (capacitor charge/discharge?).

http://www.mercuryradio.fm/

Grant

37703. FMLIST: Some question about UK STL/FM stations

Yahoo group: SkywavesDX (2015)
Date: 2015-09-16 12:28:50 UTC
From: Günter Lorenz (FMLIST)
Topic: 37703 Message: 37703

48.480 Warminster STL Total Star, heard in 2010
According to https://en.wikipedia.org/wiki/Total_Star_Warminster, this
should now be "The Breeze".
STL still on air?

52.920 Worksop Trust AM 1278, Hospital Radio reported in
2013
52.930 Worksop Trust AM logged in 2011, //
1278 kHz
I have merged these two into one entry, the actual frequency is 52.925, as
reported by Tim Bucknall on MWLIST.
Anyone still getting this station on AM or on the STL frequency?

102.500 Aldershot BFBS Aldershot
Active?

Thanks and 73,
Günter

Hi Günter. I can confirm 102.5 BFBS Aldershot is still on air. I hear it all the time here.

I am intending to check the current RDS when I am next in the area (not strong enough for RDS at home).

As for what was Total Star in Warminster, they were indeed "blown away" by The Breeze. http://www.thebreeze.com/westwilts/ . I can't confirm if the STL is still on the air though.

Further to the above, just looked at the FMLIST entry. I note a "t" in the "p" column to the right of the frequency. Couldn't find a key - does this indicate "test", "temporary", "tentative", or something else? Anyway, it's a permanent station, having been on air for a few years now, previously under guises of Garrison Radio and Aldershot Army Radio. It serves army personnel at Aldershot Garrison in North East Hampshire, but the signal travels well for several miles.

Thanks Ian for your replies.

“t” is for “temporary”. Information regarding testing or tentative would go into the remarks.

37708. IMPORTANT WARNING ABOUT SDR#

Yahoo group: SkywavesDX (2015)
Date: 2015-09-17 14:31:46 UTC
From: davebunyan@...
Topic: 37708 Message: 37708

To all SDRPlay users and other SDR hardware that uses the ExtIO interface

DO NOT UPDATE YOUR CURRENT SDR# INSTALLATION as the latest release will not support it

Save a copy of your current folder to a backup device. Re-installation is simply a matter of copying the contents of the folder to another folder.

I'd also suggest deleting the files 'install.bat', 'httpget.exe' from the SDRSharp folder to avoid an accident.

Providing you've got all the plugins you want - also saved to a separate location - you can carry on regardless. Of note is that HDSDR hasn't been updated since Nov 2013.

SDR#'s e-mail has also given me an excellent reason not to upgrade my PC from Win 8.1 to Win 10!

Out of interest - do you know what other SDR hardware uses the ExtIO interface? - as I wonder how many other bits of kit will no longer run on SDR#.

Rgds

David

37709. FMLIST UK

Yahoo group: SkywavesDX (2015)
Date: 2015-09-17 15:52:31 UTC
From: Günter Lorenz (FMLIST)
Topic: 37709 Message: 37709

On Sept 7, 2015, 105.2 from Sutton Coldfield (11 kW) has been transferred
from Planet Rock to Absolute.
Observed on Sept 8 with unchanged PI C4B3 and PS ABSOLUTE.

Found the date on Wikipedia ;-) - whoever did the update there could
have informed us as well ...

73,
Günter

It is a German football commentator, but it seems not a real play. The time scale is compressed, one of team is “FC Gerlitz” which does not exist.

Perhaps a leaking computer game?

Hi Tim. Do you mean 105.2 from Lille? I haven't checked that direction yet but I am getting 2 bars of signal from Brest, Caen and Cherbourg here on a Denon TU-800L tuner. They are all solid signals but with some hiss in stereo.

Good DX.

That is France Inter, also from Lille.
Other frequencies to try for from Lille:

88.7 France Musique (probably blocked by Radio 2 from Crystal Palace on 88.8)94.7 France Bleu Nord98.0 France Culture
Good DX.

Hello Ruud.
Yes, it's a STL probably because i can hear some audio in French around 188 Mhz.
The enigma is to know where are those transmitters.Maybe,my next task.
Thanks

37725. FMLIST UK: Heart

Yahoo group: SkywavesDX (2015)
Date: 2015-09-20 21:40:52 UTC
From: Günter Lorenz (FMLIST)
Topic: 37725 Message: 37725

Working my way through the preferred locations on this page:
http://www.heart.co.uk/
"Your preferred location is .... Change location?"
2 questions:

I can select East Midlands: http://www.heart.co.uk/eastmids/ and it tells me
"96 - 107 MHz".
But I have no frequencies left which are not yet assigned to other areas ...
can anyone explain this?

103.40 Henley-on-Thames
Is this Heart Thames Valley (Oxfordshire) or Heart Thames Valley (Berkshire
& North Hampshire) ?

73,
Günter

From: Ian Kelly
Topic: 37725 Message: 37726

Hi Günter. Heart is for all intents and purposes a national network now, with local opt-outs for some peak time shows, news and ads. The default ID on their website before you choose a local preference is 96 to 107, as all (I think) FM frequencies fall somewhere in the range 96.0 to 107.9 MHz, across the UK. I think they use "96 to 107" in the East Midlands strapline, as they have so many FM frequencies scattered around in that range in the East Midlands!

103.4 Henley falls in the Thames Valley (Berkshire and North Hampshire) area, rather than the Thames Valley (Oxfordshire) region, even though Henley-on-Thames is in Oxforshire! Confusing, huh? They don't bother mentioning 103.4 in the logo on the Berkshire/North Hants website, as it's a lower power filler for 97.0 and 102.9. 97.0, 102.9 and 103.4 came from the former "2-Ten FM" days, whereas 97.4 and 102.6 were formerly "Fox FM", serving central and northern Oxfordshire. Fox FM and 2-Ten FM became part of the Heart network, along with a bunch of other ILR stations a few years ago now.

Although the Thames Valley describes the section of the River Thames that flows through Berkshire and South Oxfordshire, the Thames also flows through Oxford, but isn't regarded as the area described as the "Thames Valley".

I hope that helps, but you are [probably more confused now than when you started.

Ian Kelly
Tilehurst, Reading, Berkshire, Thames Valley

Hi Gunter

You can match UK analogue commercial stations to specific licences and frequencies from the Ofcom database:
http://www.ofcom.org.uk/static/radiolicensing/html/radio-stations/analogue/analogue-main.htm

Coverage maps for individual Ofcom radio licences are linked from this spreadsheet:
http://www.ofcom.org.uk/static/radiolicensing/mcamaps/MCAs.htm

Station owners' own website data is often opaque due to extensive regional consolidation of locations and networked outputs.

Yours,
Grant

That's handy, Grant.

Noticed a mistake for Heart FM Berkshire at
http://www.ofcom.org.uk/static/radiolicensing/html/radio-stations/analogue/al000123ba2heart.htm.
It says the on air date was 3 August 1976, but it was in fact 8 March 1976.
Funnily enough, I heard the first song they played on that date on the
radio today - The Carpenters' "We've Only Just Begun". I heard the opening
as a 10 year old lad!

Hi Ian

Yes, you are dead right. I remember me and my school friend Jeremy had arranged a station tour of Radio 210 during the Easter holidays in 1976, soon after it had opened.

The mistake on the Ofcom page comes from a source Excel spreadsheet where this input date was accidentally in American format ('8/3/1976') instead of UK format ('8/3/1976'). There may be other similar errors that nobody at Ofcom has noticed.

Yours,
Grant

From: Dave
Topic: 37735 Message: 37735

on any am radio / tuner needing the pilot light to be on for stereo yes
that has been off for a few weeks now so only mono reception will occur...

However on an am stereo radio like the Sony A100 or SRF 42 you will still
get stereo reception

I wish we they would keep this transmitter running, it's a great advert for
am stereo in Europe

37746. 20 m long rope-yagi !!

Yahoo group: SkywavesDX (2015)
Date: 2015-09-24 18:34:19 UTC
From: harriku@...
Topic: 37746 Message: 37746

How about 20 m long FM-yagi??
I am planningto build 20 m long rope-yagi to Utö-island (with the help of ham 'Zaba' who count the measurements and gave the hint).

The idea is to mount the elements over two long kevlar-ropes.

Here is a photo of one 144 MHz:n rope-yagi: http://www.qsl.net/w0pt/N0kqy.jpg
http://www.qsl.net/w0pt/N0kqy.jpg
And here 51-element 40 m long 144 MHz:n antenna in a strong wind:
http://www.bigskyspaces.com/w7gj/longyagi.htm
http://www.bigskyspaces.com/w7gj/longyagi.htm

There are different possibilities to adjust the beam and bandwidht (5 MHz planned).
I do not remember the gain of this kind of 20 m installation.

One clear negative thing is naturally that it is very difficult to change the direction :)

>> There are different possibilities to adjust the beam and bandwidth (5 MHz
>> planned).
> You will have a hard time to get it that wide, and just 5 MHz is just too
> narrow for this amount of work. A narrow band ham antenna is easy to design,
> try that with a wide band. Maybe Peter can comment on that?

Many directors also mean more degrees of design freedom, so bandwidth will depend on according to what principles the antenna is designed. Preferably not just by pressing the "optimize" button...

I happen to have a .mma file for the "updated version" of this long antenna. (Thanks to Mattias Hornsteiner.)
Its bandwidth seems to be around 4 MHz (142-146 MHz), somewhat depending on where you decide to set the lower limit.
Gain is 20.2-20.8 dBi
F/B is 23-28 dB
The -3dB front lobe at 144 MHz is 16 degrees wide.
The first side lobe occurs at 21 degrees and is 14.5 dB down.
The model I have uses a folded dipole to get 200 Ohm impedance -> 50 Ohm with coax balun.

When considering long, or very long, antennas, there comes a point when it is worth considering stacking multiple antennas instead...

Peter

Thanks all for comments!
Jürgen is right. That might not be worth to try and install - especially because it will be up only for 7-8 days in our Utö FM-DX-pedition - if the other participants are really willing to join the project.
But this rope-idea is the easiest way to make a temporary installation.
Let's see. We would like to have it directed to rare Spain, but there are limits on the ground in this QTH.

But I am so curious to see (SDR) and hear the difference to Körner for example. Does it bring constant tropo-scatter etc ?? Also it would be great to see it really built up!

My ham-friend is very exprienced antenna designer with over 30 years experience. He just erected new 29 m antenna tower for 50-70-144 MHz etc. yagi stacks.

I am VERY motivated to try - so let's see what happens.

Definitely receiving this station beaming roughly 300 deg - whether it is directly from the Caribbean is another question - I've linked 3 clips on the "other" Skywaves forum. If you listed to clips 2 and 3 the sound will suddenly increase in volume where I've mixed the live stream.

Am I going mad???

David

for future reference theres nothing legal in the western hemisphere on
104.0 104.2,104.4, 104.6 etc

but never give up hope :-) the trend for tropo is towards the west these days

i'll be in London (multiple locations) on Thursday- saturday so will
check it out and narrow down the location
will be in Euston, ealing, balham, hammersmith, Chiswick & Reigate so
between those I should get some answers

I miss the zip fm Jamaica relay on 99.1 which we used to hear at Cannock chase

Hi All,

A very slow, yet gradual built-up of the Band II tropospheric lift today. Here's waiting for the big bang, which is expected to kick-in tomorrow evening.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Tuesday 29 September 2015

37762. Unsettle signals on R1

Yahoo group: SkywavesDX (2015)
Date: 2015-09-30 19:25:45 UTC
From: Christian Stödberg
Topic: 37762 Message: 37762

Hello!

Unsettle signals on R1 right now. Very much QSB. It fades up and down with some high peaks for a second or two.

Nothing detectable so far on TV.

But keep an eye on Band 1.

Good conditions on 144MHz. Maybe the high pressure makes this?

73’ de Chris

37764. Band II Tropospheric Loggings for 30 September 2015

Hi All,

Another day with light tropospheric ducting giving some Band II DX. Heavily impaired this time by a blanket of very strong QRM across the band. I can only hope this will be gone by tomorrow.
This was not the big bang as forecasted anyhow.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

37765. Can any Swedish speakers confirm this is SR P1 on 88.6?

Yahoo group: SkywavesDX (2015)
Date: 2015-10-01 01:20:59 UTC
From: John Faulkner, Skegness
Topic: 37765 Message: 37765

I am pinching myself here in disbelief. I just listened to ten minutes of talk on 88.6 which appears to be coming from Sveriges P1 on 88.6. I see only Linköping listed at just 150 watts. Common sense tells me this cannot be possible as the Swedish stations I had a couple of hours ago have faded almost completely. Or, is it a fine duct?

I already logged this as presumed as the programming seems to be in // with the SR P1 web stream, plus I tried all the other possibilities, including Finland, but none of them matched this reception. To seal this 100%, could somebody please give me a confirmation that my ears are not deceiving me.

You will also hear the web stream audio, intermittently with my recording.

88.6 SR P1 Presumed 0055 01-10-05
https://app.box.com/s/8my6f3am757rgl96tbx2alnbfsdg6oll

Thank you

John

This is Swedish talk, a long distance for 150watt, but there was god
reception against Sweden yesterday.
I listning to the Meldrum BBC frekvencys with full RDS.

Yes. swedish swedish (the stream of course). John, note that SR P3 has an tx in Finland Åland Islands as well 10kW on 886 (but it is P3 and should be a mx/pop etc channel). Sounds like SR P1. Very weak that on underground..could it be any weaker ;)

37768. Re: [SkywavesDX] Can any Swedish speakers confirm this is SR P1 on 88.6?

Yahoo group: SkywavesDX (2015)
Date: 2015-10-01 12:48:03 UTC
From: John Faulkner, Skegness
Topic: 37765 Message: 37768

Thank you John and Hannu.

Thanks for listening to my recording.

There seems to be an agreement that this is definitely SR P1. I have also had two private emails confirming this.

Just to clarify, the audio which cuts in and out is the web stream and there was a long delay on this, as there is again today.

So it seems this must be the Linköping transmitter at 150 watts. This transmitter was well outside the main tropo reception area, but this is not unusual with Sweden here as I have known other occasions where I have had solitary Swedish transmitters via tropo in the past, either out of character with the main tropo zone, or just on their own. Nässjö and Jönköping have each been received on their own on separate occasions - no other Swedish transmitters were coming in on either occasion.

So this must have been a very finely tuned duct. There are no alternative transmitters.

Thanks again for listening and best wishes.

John

Hello,

So i changed the factory radio with a new (Blaupunkt Amsterdam 130) hoping for a better reception and the opposite happened.

The problem now is that i suffer badly from (multipath)

The whole band seems to be affected, even the semi-locals are suffering.

There must be something wrong here. the antenna is the factory Wind Shield.

Your help is much appreciated.......

Subject: [SkywavesDX] DAB/DAB+ DX

Hi folks,

I'm receiving some very impressive DAB DX from Netherlands and Denmark!

Hi Ruud,

I'm quite new to DAB/DAB+ DX. In the UK we only use DAB channels 10, 11 and 12, so that means many frequencies are free for DX (thankfully). I can sometimes receive North Yorks and Derby, here in Lincoln. Both my DAB radios (Roberts) seem to download "channel lists" in the background. On one of my radios, I have NJOY radio from Germany. I know I did not manual tune this MUX, the radio did it by itself.

Chris (Lincoln, UK).

Thanks Bernt.

I just needed the confirmation. 150 watts! Hard to believe.

Good DX!

John

Please help..... could the crazy multipath and weak performance be a connection problem??
Are the Windshield antennas normally amplified or not?? or this radio is just useless????

This was in last night, playing crooners pop, today playing back to back country. Wide modulation.

Any suggestions? Cannot find a web parallel.

Thanks

John

37785. Band II Tropospheric Loggings for 1 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-02 10:10:41 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37785

Hi All,

Yesterday the big bang finally came. And big it was. Around the clock excellent tropospheric Band II conditions, with the main skip areas towards Northeast England, East Scotland, Denmark and the Southern coast of Skandinavia. Some good signal strengths also, everything below 1000 km distance though.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Thursday 1 October 2015

Seems to be a programme on SR P2. Mentions Radio Romano several times
and has a web address of radioromano.se

I guess the language is Romanian.

John

I think I am getting some central European station on 96.55 fm. Dunno what the language is. But it appears to be a news programme.

Tim Arnold, Slough.

From: John Vinther Nielsen
Topic: 37786 Message: 37795

That was a hard one, I can´t hear what it is, du you hear some music!
my closest station is Radio M in Arnborg about 7km from my QTH
Radio Limfjord is also a strong one here.
was your antenna vertical or horizontal!

For me today 97,1 Metro Radio is strong
Its seem on the picture that sother part of Jutland, Denmark is strongest

37797. RE: [SkywavesDX] 96.55

Yahoo group: SkywavesDX (2015)
Date: 2015-10-02 13:19:12 UTC
From: Tim Arnold
Topic: 37792 Message: 37797

Apparently, this is a London based Turkish pirate station called Dem Radio.
:(

An hour of my life I will never get back..

Tim Arnold

Subject: [SkywavesDX] 96.55

I think I am getting some central European station on 96.55 fm. Dunno what
the language is. But it appears to be a news programme.

Tim Arnold, Slough.

  Koszalin with RDS, also Bialogard.

Sweden good levels too.

Good DX!

John

Hi John.

It was a vertical 9.2 at the time of this reception. Isn't that an ID in
there? Yes, it's weak. I had back to back music in // with the web
streams of the multi-local " Radio Odsherred, Radio Update, Gaybow
Radio,
107FM<http://www.fmlist.org/fi_tabelle.php?filter=program&filterwert=526164696f204f6473686
5727265642c20526164696f205570646174652c20476179626f7720526164696f2c20313037464d&QRG=107.8&
sent=1&PI=&Local=0&ES=0&Tropo=-1&Afrom=0&Ato=360&Au=&omid=2079&sort=db2&country=DNK>"
network, but I couldn't narrow it down. Maybe this is the same station.

John

Poland is THUMPING in here.

PR1, Koszalin is 70dB on 107.9! That would be 50dB without the pre-amp.

Lebork, Gdansk and Bialogard are also in.

Good DX!

John

The German station on 101.8 appears to be Deutchelandfunk, aka Radio Germany, on 101.8 from Aurich, northwestern Lower Saxony, , on 100 kW.

Can you believe that I am getting this in hissy stereo?

Tim Arnold, Slough

This email has been checked for viruses by Avast antivirus software.

37813. Lincoln, UK Band-scan

Yahoo group: SkywavesDX (2015)
Date: 2015-10-02 19:55:15 UTC
From: chris.thatcher123@...
Topic: 37813 Message: 37813

I've just performed a band-scan at my location, here in Lincoln, UK
This is what I received with RDS

87.6 = NDR2
87.9 = NDR INFO
88.1 = DR P2
89.0 = DR P2
90.3 = NDR 90,3
90.5 ?
95.1 = DR P2
97.2 = DR P3
98.5 ?
103.9 = NOVA
104.9 ?
107.1 = DLF
107.3 = OTSEE
107.9 = WIECZORN ROZMAI TOSCI POLSKIE RADIO JEDYNKA Current Time (Dynamic Text)

My antenna is a single rod (cut to 106.7 MHz) as parasitic element to Band 1 dipole

I'm still receiving Denmark on DAB on frequency 8B (197.648 MHz)

Chris (Lincoln, UK).

37814. Re: [SkywavesDX] UNID Danish ID 107.8 ....

Sorry John,

There is no ID in this clip, only national danish commercials for
babysam.dk and Designa Kitchens, but Radio Oddsherred dosn't broadcast
Commercials, but cosidering the Time it might be Solo FM. As they have
Commercials a little earlier than other Danish Local Stations - But all
commercial Stations has the same National Commercials around xx.55 -
Local commercials is usually around xx.20 and xx.40...

73's

Niels

From: John Faulkner, Skegness
Topic: 37786 Message: 37816

OK. Thanks again Niels and John.

Another one coming up ...

John

37820. Band II Tropospheric Loggings for 2 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-03 07:31:04 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37820

Hi All,

A truly fantastic Band II tropospheric DX day yesterday, one of the best I have known. Non-stop reception from a very large skip area ranging from deep into Poland towards the east, through deep into Sweden towards the north and into Ireland towards the west. Many stations reached RDS level.
I was particularly pleased with getting Ireland, a first with this propagation mode in 42 years of DX-ing! Speaking of firsts, after DX-ing for such a long time, a good tropospheric Band II opening will bring me no more than one or two first time catches on the average. Yesterday I had an estimated 20 - 30 first timers, still have to go through the loggings. A glorious start of the autumnal conditions, may there be more of this.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Friday 2 October 2015

Hi Dave,

My antenna is a single rod (cut to 106.7 MHz) as parasitic element to Band 1 dipole (horizontally polarized).
I live in a bungalow on the top side of Lincoln (North Greetwell village) LN2 post code.
The antenna is outside, 15 metres above ground, on a rotator.
The Lincolnshire Wolds are a barrier between my location and the North Sea, but when there's a tropo of this magnitude, the DX still gets though.

Most of the DX has gone, as I type this, but my DAB radio is still receiving 8A DAB+ "West" from Amsterdam & Rotterdam.
For DAB, my antenna is a 5 element Yagi (vertically polarized). This is also placed on the rotator.

Good DX,

Chris (Lincoln, UK)

Poland has been in here for over 48 hours now. Band II is Scandinavian from end to end, tuning up from the bottom it's Scandinavia, BBC R2, Scandinavia, Scandinavia, R2, white noise, R2 etc etc I am handicapped by not being able to distinguish the Scandinavian languages. I've never known conditions anything like this. We have light fog and no movement of the air

37829. Tropo from Bournemouth, UK 1/2 Oct

Yahoo group: SkywavesDX (2015)
Date: 2015-10-03 09:31:46 UTC
From: Jim Smith G0OFE
Topic: 37829 Message: 37829

Nice little opening this. For quite a while I have been beyond the western edge of this, but from mid-evening on Thursday the opening extended far enough west to me to be able to join in, though Poland didn't come in here despite being received only a few tens of miles further NE. Norway, Sweden, Denmark and N Germany logged.

Logs and visual maps:

1st http://www.fmlist.org/fm_logmap.php?datum=2015-10-01 <http://www.fmlist.org/fm_logmap.php?datum=2015-10-01&omid=2748> &omid=2748

2nd http://www.fmlist.org/fm_logmap.php?datum=2015-10-02 <http://www.fmlist.org/fm_logmap.php?datum=2015-10-02&omid=2748> &omid=2748

It was still open this morning to Denmark and Sweden after sunrise, but was mostly weak and spotty.

Hi Jurgen,

Yes, it is Radio Active, but the ads refer to the Ystad region in Scania in southern Sweden, not Halmstad.

The frequency is a mystery, however, since it is not listed on the website of the station. However, this one is:

107.800 S Sjöbo/Blentarp/Vodafone RM sn sv Radio Active Sjöbo s 0.490 Dh 13e35/55n35

which I BTW can hear at my QTH in Lund.
They also use:
103.900 S Ystad/Hedeskoga Sopstation sn sv Radio Active Ystad s 0.500 Dv 13e47/55n28

Om radion | Radio Active http://radioactiveystad.se/om-radion/

http://radioactiveystad.se/om-radion/

Om radion | Radio Active http://radioactiveystad.se/om-radion/ Om radion Follow Den 10 juni 1995 hördes den första sändningen över frekvensen 103.9 MHz – Radio Active var född.

Julian,

My own guide is that if it sounds rather like German, but not quite German, then it’s Scandinavian!

Here, no Poland, and the Scandinavians came and went, but none strong enough for RDS here. I was very much on the edge of this opening and I think I am lucky to log as much as I did.

37832. AW: [SkywavesDX] DAB/DAB+ DX

Yahoo group: SkywavesDX (2015)
Date: 2015-10-03 09:22:48 UTC
From: Günter Lorenz (FMLIST)
Topic: 37777 Message: 37832

FMLIST has a DABLIST section, which includes a logbook feature, and logs are also sent to DXMAPS which has a separate DAB tab.
DABLIST would be happy to get updates from the DX you get. While we have all the transmitter information, the MUX configuration is not always known but equally of interest, both for domestic and DX. One simple way to collect data is by use of a USB receiver stick and a software called Andi's DAB-Player (freeware):
http://www.ukwtv.de/cms/downloads-aside/281-dab-player-von-andreas-gsinn.html
Not only does it show Slideshows, Dynamic Labels and many more details: One of the greatest features is the display of SNR on a specific channel, very useful to find optimum antenna direction or when hunting for DX signals. The software can export MUX configuration data, and I'd be happy to get such data files for as many MUXes as possible, to feed DABLIST.
Here is a document that explains how to export the data, including download links for the software:
http://www.fmlist.org/How-to-export-DAB-FIC-Multiplex-Configuration.pdf

Thanks and 73
Günter

Fantastic reception Chris!

Poland reached here for a while yesterday evening, the best reception being RMF FM on 98.4 from Gdansk which peaked for a short while in solid stereo/2 bars on the XDR-F1HD. I was hoping that it would continue to improve as this was early evening but it didn't. Still, this is my first ever reception of Poland via tropo, as well as Norway. The amount of Swedish txes heard was also unprecedented.

I now have about 11 CD-Rs to go through for uploading... Good DX.

Nick, Whitchurch, Hampshire.

Nice one Chris it seems lots had this one here it was sitting there with full RDS a most of the day just odd spells when it faded allowing Delta Radio to come in then back to PR 1 but yes just like a local.
Andy

Unbelievable reception for Tropo. It was there for hours, with instant RDS, just like a local!

Hello from sunny Spain

Some notes:
* This lists only stations heard during the past month
* Station names sourced from listening or RDS
* Station locations sourced from listening or RDS or the AER database at http://www.fmlist.org/aer_fm.php?smode=S [?=location unknown]
* Station RDS sourced from observations
* Unidentified Algerian stations still need more work, but Mike Fallon's list at http://www.ukdx.org.uk/fm/FreqOrder.htm has been invaluable for identifying locations
* AL=Almeria province, MU=Murcia autonomous community
* I have removed some entries from last month's list as I realised my radio was finding ghost stations exactly 3MHz above strong local transmitters (problematic as some stations have genuine relays exactly 3MHz apart!)

Hope this is of some use to DX-ers.

Yours,
Grant

Given the amazing Band II reception I decided to try for DX on 2m (145 MHz). Signals were faint yesterday after I finished work, but I managed to work a Swedish station with 50W my end this morning (1000 km). Wish we had more openings like this

37846. Band II Tropospheric Loggings for 3 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-03 20:21:48 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 37846

Hi All,

The tail end of an excellent spell of almost a full week with daily Band II tropospheric conditions produced some very nice DX into the UK. Even with a few personal firsts.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Saturday 3 October 2015

Hi Grant,

Like I stated before, this is of great use to DX-ers. Spain is a large country and there are not so many DX-ers in Spain keeping track of their local and always rapidly changing FM band.
It would be even more perfect if you could get a hold of a radio with PI decoding. Many PI codes from Spanish FM stations are still unknown.

Keep up the good work!

73, Janpeter

Sorry I did'nt have my conatcts in, I thought you were in London not Lincoln !

Very very low asl here hills all around but seem to get something but rare for Germany etc. Yes It's amazing what dx can get though sometimes...

37853. Tropo log 3 Oct 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-04 08:15:08 UTC
From: Jim Smith G0OFE
Topic: 37853 Message: 37853

A much quieter day yesterday, a little tropo to Sweden and Denmark first thing but that soon dissipated.

Looks like it carried on for longer further north, just as it started much earlier further north.

I did record a 2m band stream so I could concentrate on Band 2, and starting to go through that now.

Thursday night brought Poland (not heard on Band 2 here at all) and a Swedish station on the southern tip of Gotland, in the rare JO96 grid at 1477km. Amazing.

Log and map:

http://www.fmlist.org/fm_logmap.php?datum=2015-10-03
<http://www.fmlist.org/fm_logmap.php?datum=2015-10-03&omid=2748> &omid=2748

==========

Jim, Bournemouth, Dorset. IO90BR.

Elad FDM-S2, Perseus/FM+ and Funcube Dongle SDR Recievers

8-element OP-DES for Band 2, 12-ele ZL Special for 2m, plus wideband vertical.

Wellbrook 1530 Loop for LF

sincere congratulations Chris

ironically I missed this once in a life time Polish Tropo due to being
in London promoting.... Poland!

tak jest!

since Suwalki was apparently in on 107.9 did anyone log my beloved
Radio Racyja 99.2 from Bialystok?
i'm happy to listen to any possible recordings of it to help people ID it

I had no idea what was going on until John & Julian texted me
I only had had space to take my mp3 player w/ fm tuner & the rf
explorer with me to London so I had a look around and found
definite tropo even with just those
on Friday morning at the White Eagle Club, Balham Lille was clearly
visible on the handheld spectrum analyser with its whip ant on 88.7
(next to crystal P!) 98, 94.7, 103.7, 105.2

I was at redhill, surrey Friday night/sunday morning, the strong
Reigate tx crucified the mp3 players front end as you'd expect but
the rf explorer held up well, apart from an increase in noise in the
102.7-105 region no adverse affects or spurious images were noted
I id'ed Holme Moss 93.7 & Sutton Coldfield 92.7 on the rf explorer
by matching the visible modulation peaks & troughs to the audio from
my mp3 player tuned to local R4 relay
I presume that was tropo enhanced, they were stable

the ZPB relay on 104.0 is coming from North London, audio is audibly
lossy and the stream is frequently lost, the time checks for -5 hrs
are a dead giveaway

it has no connection to Omega 104.1 which was also heard with usual px

I looked for unstable or off freq pirate txs and surprisingly there
were no really bad txs and only one off freq: London live on 102.99

From: Chris Thatcher
Topic: 37835 Message: 37855

Thanks Tim,

I have to say I've never received Poland via Tropo before. The signal on 107.9 was just like a local, producing instant RDS which read WIECZORN_ROZMAI_TOSCI_POLSKIE_RADIO_JEDINKA_23:10_ (my radio only displays upper case). Which translates to
variety evening Polish Radio One (according to Google Translate)

John Faulkner usually gets the best DX, a) due to his location, on the East Coast, b) because he perseveres at digging out the stations more than me!

Good DX,

Chris (Lincoln, UK)

It's a great shame you weren't able to take advantage of this opening Tim. Bialystok was received here, but I did not receive Radio Racyja.

I have a lot of logs to post and, quite honestly, I need a quicker system to compile the logs now. As you know, I am a compulsive record keeper and like to note all my own personal firsts. I am also keen to record my DX catches during these exceptional openings as I consider them a kind of QSL, so I used the XDR-F1HD to listen, but this overloaded with all the strong DX. OIRT was a mess of German, Swedish and Polish stations. I did manage to take two sweeps of the FM band with my FDM-S2 - now uploaded. I will post the links shortly.

There is so much to check through and compile with openings like this, /(Don't ask me when I am going to check my remaining Es files)/ but I am almost ready to post the tropo logs from the last few days.

John

My first decent tropo opening to Sweden since moving here, with Swedish
lower power outlets opening up at the top of the band. Denmark was also
pretty, but I left out some of the more regular Danish tropo catches.

Good DX!

This is one of the best tropos I can remember. Band 2 is solid with strong signals from the most distant, unlikely, rare or never-before-heard transmitters. It's openings like these which restore your faith in the hobby, should you have lost it. Those stations or countries you never thought you would ever hear are there and not just scraping their way through the noise, but are: Giving fully quieting stereo; Have full and instant RDS; Are just sat there like a local for hours on end. Furthest distance was 1250 km from Radio Maryja, Ilawa/Kisielice, on 96.9, toppling Viking FM!

One of the big surprises was the Koszalin transmitter from Poland. This peaked at 70dBf on the XDR-GTK software - minus 20dB for the pre-amp. Seven transmitters from Poland came through, two of which I have not heard of. I just love the openings where you receive transmitter sites you've never even heard of. There were plenty of them too.

Tuning from one end of the band to the other was mesmerising. One frequency after another of strong continental signals. Belmont, Tacolneston and Peterborough, my three closest transmitters, gave way to Danish, German, Swedish, Norwegian and Polish signals. Holland was also strongly received at times but I ignored that as there were far too many other and more distant stations to wade through. The band became noisy at times due to co-channel interference. It was mad. What country was I living in to receive all these signals like this? You wouldn't have easily guesses. The FM band was unrecognisable. OK, I've laid that on a bit thick, but just to stress that this was probably one of those 'once in a lifetime' DX experiences, the likes of which I hope will be received many more times! :)

I tried the OIRT band for Kaliningrad as the Gdansk area was received with good signals. It's just a hop, skip and a jump to Kaliningrad from there, but my XDR-F1HD was overloaded with German and Swedish stations appearing randomly between 66 and 74 MHz. I thought I heard a station from Belarus at one time, but I can probably put it down to overload. I couldn't get any of the necessary Belarusian web streams to work anyway. I would have tried the FDM-S2 but it doesn't work down in the OIRT range.

I recorded two separate IF snapshots of the band with my FDM-S2 (2 x 4 files). These were not recorded at the height of the conditions, though not far off. I was too busy DXing when conditions peaked.

You will need to use Monkey's Audio to decompress thee files:
http://www.monkeysaudio.com/ If you don't have an SDR, you can use HDSDR

to tune: http://www.hdsdr.de /
http://www.hdsdr.de/download/HDSDR_install.exe

I will also add these to the SDR Filesharing group in due course.
Uploading large files is difficult these days as my internet has gone back in time 20 years. We don't have 24 hour internet here anymore. The speed is roughly one third of what it should be at best and less than 1 MB at night (I live near the exchange too!) and the connection drops at night. Time to contact Ofcom again.

Good DX!

well done!
https://www.youtube.com/watch?v=yPJIMQS7C5Q

the overloaded XDR says it all!- what an opening

I'll have a listen to the files and see if I squeeze out anything more
that you haven't id'ed -prob not based on the comprehensive log you
posted

congrats

That's great Tim. It will be interesting to see what else you can dig out. I'll look forward to seeing any new findings. The opening was too big to /not/ miss something.

Thanks

John

No. Highly unlikely. I think the UK was too far away for this level of propagation on band 2. It was happening, and possibly further, on 2m at this time though. I probably kust heard an image of Grevesmühlen Hamberge or Bad Doberan ;) .

John

37868. Super Tropo Week

Yahoo group: SkywavesDX (2015)
Date: 2015-10-04 14:07:11 UTC
From: Andy Pritchard
Topic: 37868 Message: 37868

Hi All

This weeks conditions for me:

28-Sep-2015 # - Max distance France MUSIQUE @485 Km / 301 miles

BBC Scotland & Brest
http://www.fmlist.org/fm_logmap.php?datum=2015-09-28&band=ALL&hours=0&omid=1419

29-Sep-2015 # - Max distance Norway NRK P1 @966 Km / 600 miles

Decent opening to Norway
http://www.fmlist.org/fm_logmap.php?datum=2015-09-29&band=ALL&hours=0&omid=1419

30-Sep-2015
Nothing of note

01-Oct-2015 # - Max distance Sweden SR P3 @1203 Km / 748 miles

This is when the event kicked off for me with stations being received from Norway, East Denmark, Germany and Sweden (Sweden being a Tropo 1st for me).
http://www.fmlist.org/fm_logmap.php?datum=2015-10-01&band=ALL&hours=0&omid=1419

Screenshot: http://www.apritch.myby.co.uk/TropoSweden1145Km.png

02-Oct-2015 # - Max distance Poland Radio ZET @1396 Km / 867 miles

The conditions continued to be ‘special’ with Poland being received (another Tropo 1st for me) along with Germany, East Denmark and the Southern tip of Sweden.
http://www.fmlist.org/fm_logmap.php?datum=2015-10-02&band=ALL&hours=0&omid=1419

Screenshot: http://www.apritch.myby.co.uk/TropoPoland1286Km.png

03-Oct-2015 # - Max distance Sweden SR P1 @1242 Km / 772 miles

The 3rd didn’t disappoint either with again very good conditions to Denmark and an East Coast Sweden station being received.
http://www.fmlist.org/fm_logmap.php?datum=2015-10-03&band=ALL&hours=0&omid=1419
The conditions dropped off quite quickly that day with only Norway on 87.8 hanging around till about 22:00z

A very memorable lift!

My logs below:

From: Julian Hardstone
Topic: 37227 Message: 37869

Sigfrid - A few of the best RDS car radios will detect multipath distortion and retune to another weaker tx if one is available
For home reception, you can only cure multipath by using an external aerial, preferably horizontally polarised, pointing direct at the tx, or away from the reflected signal

Thank u for the reply Mr Julian.

What happens is, while I drive around and in most areas of the city, the FM band is chaotic and flooded with stations off frequency i.e you can hear 2 or more differ. stations on a single freq. that's supposed to be blank!. This happens all over the band, only leaving the strong stations listenable and ruining everything else.

I'm not sure of this is called Multi-path or something else.

The Radio is a new Blaupunkt that I bought for some decent DX'ing...

Many thanks.

Regarding commercial radio stations in Denmark and Sweden 95% work with vertical polarization so if you listen with

horizontal antenna you lose about 20 dB in polarization shift. (I manufactured the transmit antennas for them)

Hello Sigfrid. That sounds like overload of front end of the receiver, which is unable to cope with two or more very strong signals. In this situation, you get mixing products of strong local stations on otherwise clear channels.

Multipath is where you get multiple reception of the same transmitter on its real frequency, arriving via different paths. It typically happens in hilly areas and where there are tall buildings. One or more signals will arrive via different paths due to reflections and will arrive slightly out of phase, causing distorted audio.

Yes Sven, I noticed that.

But to the 5% belong Nova Næstved and Holstebro, both high power

Has it something to do with high power?

Well Jürgen the 5% are mostly H-pol and are in Sweden, in Denmark the license have in the last year been negotiond with the PTT and I don☐t know all the facts but we made systems up to 10kW most stations had then about 1 ☐ 1,5kW even if the license said 500W! (I sold my company in 2011). I know that in the new license the commercial private stations must start with DAB so something will happen with DAB activity in Denmark ☐ someone else in Denmark might have more facts about this for us. In Sweden DAB is Dead And Buried!

That sounds like my Blaupunkt San Remo wide as a barn door and that is exactly how this is I can hear our powerhouses 200 Khz away as this does not have Sharx so it's a matter of changing the ceramic filters.

Thank you Niels.

Seems I already logged this on the 2nd, but I thought this recording had
the IDs of a different station.

Thank you.

From: Günter Lorenz (FMLIST)
Topic: 37227 Message: 37879

The Blaupunkt should not have any problems with strong signals, but perhaps the car has a "cheap" amplified antenna and the mixing products are already generated there?
Could you try to connect a different antenna? For a very rough try, you could use a simple piece of copper wire.

73,
Günter

I have a Blaupunkt Adelaide 130 Andy. Do you mean that i have to modify the radio to get rid of the problem?

37884. Re: AW: [SkywavesDX] Great Tropo Opening

Yahoo group: SkywavesDX (2015)
Date: 2015-10-04 21:53:05 UTC
From: John Faulkner, Skegness
Topic: 37835 Message: 37884

That's an interesting idea.

To know if I have received something for the first time, I check against my personal all time log on my website. It's a collection of everything I have received and gives the first logging of the station. There are problems with this as: My method is clumsy and it takes time; It's easy to make mistakes and list some stations as personal firsts when they aren't - and vice versa. A facility such as this would be extremely useful for us 'collectors' and I think most of us are in one form or another.

If I receive something for the first time, the row in the FM List database does not have a tinted background. As you know, the background colour is yellow if I have previously logged the station and it is orange if I have logged that station or transmitter elsewhere on the same day. Hope I am making sense so far :) Maybe there is some kind of flag which could be activated if the station has not been logged previously. You have a similar flag with low powered transmitters, where a messages appears to advise that another higher powered transmitter of that station is located on the same frequency.

How would such a 'personal first' logging be presented though? I use the **** symbols. Some DXers underline or embolden the entire log entry. They are all fine.

I hope other people will add their thoughts.

John

Hello Mr Gunter,,,,

The Radio is a new Blaupunkt Adelaide 130 .....The Antenna is a factory built in windshield with no amplification as far as i know.

Furthermore, the problem is almost non-existant away from the city.... and I did check in another car and the problem is less severe than my case but i will try another antenna for further checking.

>103.9 Næstved runs 100 kW horizontal

Yes, this station could cause hijacking...
It is powerful and has wide range coverage.
With a good car radio installation, you can hear it along the Swedish west coast almost up to Gothenburg.

Peter

I could not find a service manual for your radio so I looked the the user manual and no mention of Sharx on this model I compared the user manual for a Blaupnkt Casablanca which does have Sharx and it is mentioned on that one.So it looks like your radio does not have Sharx like mine one thing of interest is region setting in the menu make sure it's set for your area.
Important note for radio reception in the US and AsiaThis car sound system is designed for operation in different regions with different frequency ranges and station technologies. The factory default of the reception area is "EUROPE". If you operate the car sound system outside of Europe, e.g. in the US or Asia, you first have to set a suitable reception area in the menu. Available reception areas are"EUROPE", "ASIA", "USA", "S-AMERICA" and "THAI-LAND".The reception area for the radio reception is set in the user menu (see the chapter "User settings",section "Making settings in the "TUNER" menu",menu item "AREA").
Hope this helps
Andy

Hi Sigfrid. You say that the problem gets worse in the city. Is there a powerful FM transmitter in that area, say 50 kW or more?
 Good DX.

Nick, Whitchurch, Hampshire.

37901. Unidentified Polish station 92.0 from October 2nd tropo

Yahoo group: SkywavesDX (2015)
Date: 2015-10-06 14:02:30 UTC
From: John Faulkner, Skegness
Topic: 37901 Message: 37901

I'd like to thank Tim for downloading my SDR files of the tropo on 02-10 and listening through them as I he has spotted an unidentified Polish station on 92.0.

92.0 unid Poland 1231 02-10-15
https://app.box.com/s/u9i2k98yxkvl7nf4hr6v7e9zuhnq47df

The programme sounds like a radio play, or at least something very similar. Perhaps this suggests PR2? If so, this would be Suwalki. I checked other Suwalki frequencies and they were all blocked by strong Germans ... apart from 96.6. Unfortunately, 96.6 is brief and unclear and may not even be Polish, but I'll include it here in case it is recognisable Polish as this would further back up Suwalki.

96.6 unid 1231 02-10-15
https://app.box.com/s/s5eigkunuhtat0ns5f1ev2ioee8kof6f

Either way, it would be interesting to know who 92.0 is.

Thanks

John

37908. Re: [SkywavesDX] PI 5601 on 94.7. Which transmitter?

Yahoo group: SkywavesDX (2015)
Date: 2015-10-06 17:58:52 UTC
From: Fabrizio Carnevalini
Topic: 37676 Message: 37908

Hi Hannu,
this PI is effectively the regional code utilized in Liguria, but the transmitters from this region are rarely listened from north.
On 94.7 there is Rai Radiouno from Monte Nerone, 100 kW ERP.
Unfortunately the regional PI is utilized from 06.10-06.30 and from 11.10 until 11.30 utc (not legal hours), and in this area there are not dxers with a decoder...

Thank you Fabrizio.

So probably Monte Nerone but nobody can confirm this. Understood. I'll put in my log but will state "presumed".

Best DX

John

Hi John,
also my guess is. The Rai uses the same regional code in different regions but far enough. In my next trip to Umbria I will try to find out, if I can. Unfortunately, given also the characteristics of propagation, detect this regional PI is not facile.
I was reminded of why it's not easy listening to Liguria from northern Europe. And then in Italy need much imagination to "tame lions": for two years I'm putting together with seven different sources: the 1990 census; territorial inspectorates (under the Ministry, control in every region of frequencies); Arpa (regional agency for the environment: controlling electromagnetic pollution); technical offices of 15 networks; listen to Skywaves; 10,000 km of surveys with Pira; and of course FMLIST

I will do it tough it's not an easy task as most of stations without RDS and one day a channel is on another off.

And I think this is an excellent opportunity to thank you BIG time Fabrizio for all the hard work being put into FMLIST Italy. And a BIG thank you to all other editors and correspondents that are supporting you with this immense job. I would guess that the number of FM stations in Italy is aboiut 30% of all FM stations in Europe. In addition, it is very difficult to find reliable transmitter information. Despite of that, the number of amendments to the list per day is huge. These are not always current changes, but most of it is improved accuracy of the information or simply additions. With regard to the additions, it is great to see the transmitted power being added for many stations. So to you Fabrizio and the entire team, keep up the good work!. FMLIST Italy is in a much better shape than it has ever been. And still improving. Best regards, Janpeter van Dijk ----- Oorspronkelijk bericht ----- Van: "Fabrizio Carnevalini fabrizio58it@... Hi Janpeter ,
Thank you for your compliments. Unfortunately codes and RDS keep changing , but your catches are very useful, and often doesn't take much to find the solution. Near each radio now appears a small green square, which " certifies" the source of the information (radio, Inspectorate, Arpa). Unfortunately, the data to be processed are lot and will take some time..
Let's say I work until retirement...

I see you edited the log Tim. I can understand you being embarrassed about this but I am equally embarrassed about not recognising German when I heard it. We all make mistakes. You shouldn't worry - I am the one who usually makes drops clangers of biblical proportions.

From: John Faulkner, Skegness
Topic: 37917 Message: 37917

Also some auroral activity now on band 2 here.

Good DX!

37918. Tropo 1-3 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-07 17:13:42 UTC
From: nick gilly
Topic: 37918 Message: 37918

Well, after a frustrating first half of the week, with high pressure well and truly in control and the forecasts of good tropo not materialising I had begun to lose hope in this high ever delivering the goods. However, on the evening of Thursday, 1st of October, it happened, and how! The band opened up to northern Germany, Denmark, Sweden and Norway. Previously I had only ever heard Sweden on a couple of channels over the years via tropo, and I had never heard Norway. Amazingly NRK Petre on 95.0 even produced 3 bars and RDS for a while from Lyngdal during the late evening. My previous tropo distance record of 1116 km (SR P1 on 87.7 from Halmstad) was well and truly shattered during this tropo, with several transmitters heard at >1200 km.

The lift probably peaked on Friday 2nd October. I didn't log Norway on the 2nd but there was still plenty of activity from Sweden, Denmark and northern Germany. The most distant log of the opening was heard this morning, a very weak SR P1 on 87.6, almost certainly from Visby at 1451 km:

https://app.box.com/s/ocl0hzz8ft2uxj93u5zdu38u9s42u5za
By the time I had returned home from work early on Friday afternoon, conditions were sparser, but started to intensify again towards the late afternoon. Finally, at around tea time on the Friday, I had my first ever loggings of Poland via tropo, and not just to the nearest part, like Szczecin. The first signal IDed turned out to be Radio ZET on 105.0 from Gdańsk at 1371 km!

https://app.box.com/s/t4h9l7de0a5xbyd1sup4h2eig7as320q

Over the next hour or two I heard a handful of Polish tropo signals, from Gdańsk or Koszalin, peaking with RMF FM on 98.4 from Gdańsk at 2 bars/solid stereo:
https://app.box.com/s/fe3zhbks6hxepro5f9fmr7b1khu5pm8n

Poland was around on & off until maybe 1930 UTC (8.30 pm local).
The conditions to Sweden and Denmark continued to be good for the rest of the evening of the 2nd.
By the morning of the 3rd October (Saturday) There were still a few signals from Denmark and Sweden but they were mostly weak. Norway also popped up briefly on 87.8 too. By late morning the long-distance DX had gone.
The entire folder of DX recordings from this tropo can be found here for those that are interested: https://app.box.com/s/gjrwvguroyd1xbzdba1qlgjnax6wngtq If you want to go through them in chronological order go the View Options (up-down arrow icon) and 'Sort By Date' - point the arrow upwards.

Some more highlights:
87.9 SR P1, probably Örebro at 1374 km, judging by the other Swedish txes coming in at the time: https://app.box.com/s/y69if8qkho8e76ob2im9uzn15pimtl4j
87.8 NRK P1 Hovdefjell 1046 km: https://app.box.com/s/6n4w2uy83hs2zbuzay3dnz4brg1kyppb
88.3 NRK P2 Lyngdal 938 km: https://app.box.com/s/n7fwyap4f80tbh1bgc3gxdh4b96xg84w
88.9 SR P1 Skövde 1252 km: https://app.box.com/s/bi2gpm0l13rn8uyqltzxk1fszqax4ahy
97.0 SR P3 Hörby 1115 km over Heart Reading:

https://app.box.com/s/xiczsngb5a3twxexir1mxo58ifv41u20
92.7 SR P1 Bäckefors (Mellerud) 1203 km:
https://app.box.com/s/mfsfd1ifndrcs1mkxxvyccooteavoekw
95.0 NRK Petre Lyngdal (reaches RDS levels):
https://app.box.com/s/myp8gcj5y8j8x61z8d88sg9gow6fv2yi
97.6 NRK P1 Lyngdal 938 km: https://app.box.com/s/o61j3598f9nq1sdvpoxlsx43kwvl3v6c
90.4 SR P1 Varberg 1104 km: https://app.box.com/s/2tbjn82a2dt4ygusrk9a1bw8idi6tzdc
97.4 PR 3 Koszalin 1255 km: https://app.box.com/s/fds68kp8f9m4mdpt2kvmnu7y5blf9whf
107.9 PR 1 Koszalin 1255 km: https://app.box.com/s/dg1xeyv33lnmrgq0etrzocpi8ywcrgzn

95.7 PR 1 Gdańsk 1371 km: https://app.box.com/s/fhwv52a2zqemodjimy984fap41mcbyzd
Another recording of Radio ZET Gdańsk 1371 km:
https://app.box.com/s/x1qdjacy4ql93s29bps1f5ya8cr22c59
What an amazing tropo, the likes of which we probably won't see again for a long while.

Good DX.

Nick, Whitchurch, Hampshire.

A surprise Es opening to Sweden during the very early hours of July 3rd,
also producing some very short skip to Germany and even Denmark at only
836 km.

The opening to Sweden was very wide, with large parts of the country coming through. This made the identification of individual transmitters very difficult, so many "multi-tx" loggings resulted. Even Germany was present and I'm sure some of the stations were received via Es.

It was also impossible to know if some of the weak classical music stations were the Swedish P2 network or BBC Radio 3 as both had the same classical music programme.

The Swedish P1 programme were carrying an interesting news item which included a recording of MP Jeremy Hunt talking about how the UK taxpayer is paying for many aspects of immigration, including NHS treatment of our millions of immigrants. Something which I think was 'buried' in our own news programmes at the time as I don't recall anything about this. Oooops - getting slightly political now. It's just that I know local people who have serious illnesses and are being ignored and see immigrants being given preferential NHS treatment and that's not f***ing on when my wife has been diagnosed with a suspected brain tumour and is being totally ignored! Nothing against immigrants, or sensibly controlled immigration, only against our governments and their no-questions-asked open door policies - let's get these evil shats out at the next election.

Good DX!

92.5 is PR Radio Koszalin from Bialogard.

That's interesting. I checked my sporadic E log as I felt sure I'd received the Szczecin transmitter via Es, but there wasn't a single logging! There were other PR Radio Szczecin's loggings but from other transmitters.

From: Tim Bucknall
Topic: 37926 Message: 37926

sorry to be a broken record
but this is getting ridiculous
if you look at my original post on the skywaves forum i listened to
Johns file and logged a very weak Polish Om talking on 92.5

I also logged German Kids px on 92.0

i have not edited my original post on the forum

I spent so long analysing Johns files that i was in absolute agony
from so much computer use, I was unable to sleep from the back neck
and shoulder pain for 2 nights so I didn't log back on for 2 days and
didn't see what John had done

yes I'm furious with the way John has handled this , especially that
patronising "we all make mistakes" post

analyse your own files from now on

this has always confused me, i can see no difference between the asia
and europe modes except that it disables long wave
does it make any difference on FM, i could understand if "asia"
allowed reception of 76-87.5 but it doesn't - at least on our car
radio

and Thailand? well the mind boggles

On 05/10/2015, Andrew Webster radioredcat@... [SkywavesDX]

bingo!
yes that's it
they use 250khz spacing like Cambodia 96.5, 96.75 etc (according to wrth)

Topic: 37227 Message: 37937

As I understand, my problem seems to be either Intermodulation or Overload... Are the new Blaupunkt radios known to have this??? Could it be a factory defect?

The whole band is distorted near transmitters which means most of the city and it only works several Kilometers away or near the sea...

37938. Re: [SkywavesDX] FM BAND SCAN - TRIPOLI (LIBYA)

This helps a lot Sigfrid. Little is known about the Libyan FM scene, of which many transmitters have been received in Europe during the Es season. This will help many of us with ID-ing some of our UNID's.

Thanks a lot!

73, Janpeter

37942. WARNING - SDR# ONLY WORKS WITH AIRSPY AND RTL-DONGLES

Yahoo group: SkywavesDX (2015)
Date: 2015-10-11 07:39:40 UTC
From: davebunyan@...
Topic: 37942 Message: 37942

SDR# released six new builds over the last 24 hours and with build 1408 they withdrew support for everything except their airspy and RTl-dongles. It may just be a coincidence that this was very shortly after SDRPlay released a new interface to restore functionality or it may be that they haven't quite got the NET 4.6 version up and running in a fully stable and aren't prepared to sort out what's needed to keep their native interface open during the development stage and we may see support for other hardware return soon. BUT they haven't told people so if you blindly download the latest update and overwrite any existing one you are stuck. The Russian web-site (rtl-sdr.ru) carries the following warning - so if they can provide the warning - why can't airspy?

"Currently (version 1408) SDR # only works with Airspy and RTL tuners. Support for other tuners may be added in the future."

Rgds

David

Why the capital letters?

Not sure what this scaremongering is about? Do you work for the Daily Mail? ;)

SDRsharp no longer downloads via install.bat (install.bat is now only for the RTL dongles)
SDRsharp does not actually install on your computer
The latest version of SDRsharp is a zip file downloadable from the Airspy website. It unzips a folder called "SDRsharp X86", with everything inside that folder. How can it over-write anything?

Make a copy of the folder containing your favourite version of SDR# and keep it on a flash drive under your pillow.

Regards

Peter

PS why can't you type "regards"?

37947. Re:: WARNING - SDR# ONLY WORKS WITH AIRSPY AND RTL-DONGLES

From: davebunyan@...
Topic: 37942 Message: 37947

What you say is true as to how it unzips to a folder of your choice - but don't you think it is possible that users will just unzip to the SDRSharp folder they already have? If you look at the comments flying around you will find people have over-written and lost SDR# functionality and been left high and dry.

Fortunately for me I nearly always ran the install.bat file from the download folder on my PC and not from the sdrsharp folder - not least because of broken plug-ins in the past. I never expected a broken core program.

As for the PS - call it a personal affectation if you wish - apart from it being quicker it became common usage at work and 20 years of habit is hard to break. My boss always used to sign his e-mail "Cheers"

So just for once

Regards

David

PS that was a hard combination of keys to pick out

You are hopelessly confused and trying to confuse others.

Today I went to the Airspy website, clicked on the download button to the right of "SDR# rev 1410 & ADSBSpy (Change log http://airspy.com/downloads/changelog.txt) ", a zip file called "sdrsharp-x86 zip" was downloaded. My browser downloads to the Downloads folder. I double clicked the sdrsharpx-86 zip file, and a folder called "SDRsharp-x86" appeared in my downloads folder. I did not choose anything. Try it yourself.

37950. Re:: WARNING - SDR# ONLY WORKS WITH AIRSPY AND RTL-DONGLES

Yahoo group: SkywavesDX (2015)
Date: 2015-10-12 11:20:05 UTC
From: davebunyan@...
Topic: 37942 Message: 37950

No Peter I'm not confused - how do you think I got versions 1404 and 1409? But it is a ZIP file. You need an unzip program to extract the files. I don't know how your unzip program works - but this is what I am presented with in Express Zip - hopefully the jpeg will be clear enough.

https://app.box.com/s/l50m7l5y1z6vh9wja4medl3ph04utrzd
https://app.box.com/s/l50m7l5y1z6vh9wja4medl3ph04utrzd

Key point is that the folder into which the files are extracted will be the last folder you accessed using Windows. So if you haven't used file explorer or opened/saved a file since you last did an SDR# update it will offer you the same folder as your previous install. And note - my Express zip program defaults to "overwrite files" and "do not write to a new folder".

So if I 'did nothing' and just clicked "Extract" then the files in C:\Sharp1409 will be overwritten - which I have verified as I'm not bothering with new builds of SDR# until the releases drop to less than one a day and I only downloade 1409 to prove that support for othe hardware had gone.

So no I'm not hopelessly confused nor am I trying to confuse others and I think you are doing a dis-service to those who might need to know. But maybe we have to 'agree to disagree'.

And changing the subject - have you noticed how much sharper the IF filter is under zoom FFT in the newer builds? Your tip on using the ability to pull one side of the notch filter in to improve RDS decoding works really well - especially on M-S signals.

David

Hi Tim,

Yahoo threw me out (again), so I can't respond to Skywaves now, but here's a quick answer (you can copy this if you like).

Markku Sollo had these on July 4th, 2014 (translated from our online-log). The same guy also heard India two summers ago - some guys have all the luck!
91.800 4.7.2014 0401- + CHN:
Xinjiang 738 Zonghe Guangbo (XJ). Verified by Mauno Ritola's Chinese contact who said, "Xinjiang PBS General News Service on 738 KHz, and relayed via FM 91.8 somewhere."
92.900 4.7.2014 0526-
CHN: Tentative: 929 Private Car Radio, Urumqi. Mauno's contact verified an ad for a hospital in Urumqi.
93.100 4.7.2014 0526-
CHN: UNID. In Mandarin Chinese about University exams.

37957. Unid ID 105.1, Belgium

Yahoo group: SkywavesDX (2015)
Date: 2015-10-12 13:38:17 UTC
From: John Faulkner, Skegness
Topic: 37957 Message: 37957

Can anybody help with this ID please?

It's a Belgian station on 105.1 with an ID jingle after the news, recorded about half an hour ago.

105.1 unid ID 1301 12-10-15
https://app.box.com/s/covhcp0b3tairdligubmv3hiulql0shj

There are very weak announcements from the start, then at 13 seconds there is a mention of "100% your muziek" followed by an echoey YL, sounds like a train station announcer. Then at 34 seconds there is a clear (not to me, sadly) ID, sounds like "Mextu Radio, The Hits".

Thanks

John

105.1 unid ID 1301 12-10-15
https://app.box.com/s/covhcp0b3tairdligubmv3hiulql0shj

There are very weak announcements from the start, then at 13 seconds there is a mention of "100% your muziek" followed by an echoey YL, sounds like a train station announcer. Then at 34 seconds there is a clear (not to me, sadly) ID, sounds like "Mextu Radio, The Hits".

Thanks

John

Pressed SEND too soon.

There's mention of Oostende and an ad for Breakout with Jessica Heyreman - see http://kmoinfo.typepad.com/kneistiradio/

Can anybody help with this ID please?

It's a Belgian station on 105.1 with an ID jingle after the news, recorded about half an hour ago.

105.1 unid ID 1301 12-10-15
https://app.box.com/s/covhcp0b3tairdligubmv3hiulql0shj

There are very weak announcements from the start, then at 13 seconds there is a mention of "100% your muziek" followed by an echoey YL, sounds like a train station announcer. Then at 34 seconds there is a clear (not to me, sadly) ID, sounds like "Mextu Radio, The Hits".

So it is! .... and I had to check several times because my ears kept telling me it was /Mextu/ Radio. But I checked the web stream (which I couldn't find) and heard the same jingle sequences after the news.

"Knokke-Heist .... Kneisti Radio ... Mega Hits"

Thank you Stuart!

37962. UNID Spanish 104.7

Yahoo group: SkywavesDX (2015)
Date: 2015-10-14 18:23:12 UTC
From: John Faulkner, Skegness
Topic: 37962 Message: 37962

I am enjoying some more catch-ups from my summer Es files and I am now part way through the madness of July 7th.

Here is a recording of a Spanish radio station I received at 0936 on that morning on 104.7:

104.7 unid advert 0936 07-07-15
https://app.box.com/s/3zby4swhcvc2ma3st3f2q66hhhi1wl56

There is an advert for a Mexican restaurant and I managed to collect a few words and Googled them successfully "restaurante orale compadre parco commercial alcobendas". To my amazement I learnt that my spelling was quite reasonable and the search revealed a small chain of restaurants of the same name in Madrid. I assume this is probably a Madrid station, but FM List says the station in Madrid on 104.7, Vicious Radio, is inactive and the AER website says the same.

Are there any members in Madrid who can confirm Vicious Radio, or something esle, is back on the air in Madrid? Also, what are the chances that it is a Madrid station which is carrying this advert. Could it be a station outside Madrid carrying an advert for a Madrid restaurant?

Thinking this might be another long shot, but I hope it will be of interest.

Thanks

John

> Radio, is inactive and the AER website says the same.

The station has been set to inactive in September 2015 by FMLIST E editors. See the field remarks: " inact (09/15)", and the history:
http://www.fmlist.org/fm_view_history.php?lfd=2209653
So it may well have been active on July 7th.

73,
Günter

Hello from Madrid.I understand Restaurante Mexicano "Orale Compadre" en parque comercial Rio Norte, Alcobendas.This shopping area is situated 15 km north Madrid, your station could be Vicious Radio, that station is on/off intermittently, and a FM list, not 100% reliable say that Vicious Radio is in Alcobendas.This typt of advertising is common in Latin stations. I'll try to confirm station last week.
And your Spanish is much better than my
English. ----------Juan Antonio Arranz Sanz

Thank you Günter and Juan Antonio.

This is the first time somebody has complimented me on my Spanish. Thank you Juan Antonio. I only know a few words of Spanish and could not possibly hold a conversation. I know a little more French, having worked for a company where it was part of my job, but my French is not so good either and I am very much out of practice these days.

Thanks again.

Tropo was excellent in the last couple of days... Many signals yesterday from south eastern Sicily & Malta... Greece was probably there too, but Italy has to weaken a bit to get.

37973. UNID Jingle ID 107.3, Presumed Spain

Yahoo group: SkywavesDX (2015)
Date: 2015-10-15 23:46:23 UTC
From: John Faulkner, Skegness
Topic: 37973 Message: 37973

Another one from July 7th.

107.3 unid jingle ID 1000 07-07-15
https://app.box.com/s/obvl9vix4tocbj44wrdpb5l0qzox7nh5

It's a sung ID, just before the top of the hour at 1000, sounding like
Radio Golett ("go let") to me.

I'm sure the answer is staring me in the face but I cannot see a station
with a similar name.

Again, any help really appreciated.

Thank you

John

Thank you Reijo.

I hear this now - "Desde ....., para todo Uribe costa" =" From .....,
for all Uribe coast". Not sure what the missing word is. It sounds like
"hornis" which would be "ovens" in Spanish - according to Google
Translate. That's Spanish though. Maybe the language is Basque. This
also perfectly matches the area received at the time.

Best regards.

John

37980. RDS Radiotext Plus

Yahoo group: SkywavesDX (2015)
Date: 2015-10-17 13:26:18 UTC
From: Günter Lorenz (FMLIST)
Topic: 37980 Message: 37980

Radiotext Plus is a special extension of RDS, however, it seems only few broadcasters use it. I would like to get an overview of its usage, and add this information to FMLIST.
You can help if you are using RDS Spy, see this image for details:
http://www.fmlist.org/public/rtplus.png
I'm not interested in the content of RT+, a simple YES/NO information together with PI code and frequency is sufficient.
Thanks for your help,

73,
Günter

37981. Digitalbitrate.com

Yahoo group: SkywavesDX (2015)

From: nick gilly
Topic: 37981 Message: 37981

This looks like a very useful website, mostly DVB-based, but it includes a bit on DAB, e.g. London:
DIGITALBITRATE : Digital channels bitrate Satellite, Dtt and more - -
| |
| | | | | |
| DIGITALBITRATE : Digital channels bitrate Satellite, Dtt and more - -Infos Chane (SDT) Fournisseur : Pays : Info : |
| |

| |
| |

These are apparently live scans using an SDR.

It's an interesting (if depressing) exercise comparing London with Paris.
 Good DX.

Nick, Whitchurch, Hampshire.

Hello ,
Does anyone know what is the unit of signal strength that Sprint Fm application represents in upper left of the screen dbµV, dbf, or dbm ? in particular image it is 34.
I think its accurate, thanks

No problem Pedro. It was a difficult one. I could hear phrases which sounded like they might have been top of the hour identifications. Another of my 'long-shots' :)

I am up to 1020 UTC on July 7th now and conditions have moved away from Catalunya / central southern France and into Andalucia, where reception is a lot more predictable. It was very good while it lasted.

Thanks again!

John

In the UK we are familiar with 'scrolling text' on pirate stations and via e-dx, but scrolling is not permitted under the UK licences. This is for reasons of road safety. I suppose Radiotext Plus is similarly prohibited

From: sigfrid105
Topic: 37999 Message: 37999

Can the Es received in Britain be the same received in North Africa?

Today I was driving the car in Tripoli (Libya) I heard an Italian station on 87.6 and a French on 87.7 (No RDS)..... The 87.6 was received in East Sussex via Es and identified as Radio Italia from around Naples, Italy at around the same time.

This is all very interesting: I have also received a report from a DXer in Slovenia who received signals from Portugal today.

So it seems today was one of the rare days with SpE in October.

Please try to enter your logs in FMLIST, so we can get a complete picture of the situation …

Ehm … just checked http://www.fmlist.org/fm_logmap.php?datum=2015-10-21&band=Es

Seems there was a lot of Es around!

73,

Günter

Thanks. I understand that it has to be religious radio from the speakers mood.
And now I wonder how much KW this hi power radio could be :-)

20KW? - 40KW? - 60KW? or maybe around 120KW.

Thats why Lybian radios are the king of DXing.

38020. UNID Spanish 101.7 in today's tropo

Yahoo group: SkywavesDX (2015)
Date: 2015-10-23 11:57:18 UTC
From: John Faulkner, Skegness
Topic: 38020 Message: 38020

Excellent tropo here today. Stations from Spain through southern France and into Switzerland. Santis is RDSing. Chasseral and Rigi are also at good levels.

I just received this Spanish talk station on 101.7 on the vertical 9.2. Maybe somebody knows who this is. Please excuse the web stream drop-ins. None of them matched my reception though.

101.7 unid Spanish 1147 23-10-15
https://app.box.com/s/ogdw4b836fv3bp98pxw6141uql1zrg2q

Thanks and good DX!

I noted yesterday that Google has removed all compatibility and requires a precise (new) syntax for the map links.
No prior notice, of course. They are Google, and we have to obey. After all, their stuff is free (not really, but that's another story).
I'm fixing this asap.

Günter

38028. Mega Tropo

Yahoo group: SkywavesDX (2015)
Date: 2015-10-23 14:45:52 UTC
From: John Faulkner, Skegness
Topic: 38028 Message: 38028

Another BIG tropo has been steadily building all day, with some very good signals from Switzerland, southern Germany - Feldberg is good, France - around Ussel, Gex and Chambery and even Toulouse. The Czech Republic briefly appeared too.

Signals are still increasing as I type.

Good DX!

John

38029. FM DX Log: Vera, Almeria, Spain: 21 Oct 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-23 15:50:00 UTC
From: Grant Williams
Topic: 38029 Message: 38029

DX LOG: 21 OCTOBER 2015

Time(GMT)/Frequency/Station/Location/Country/RDS/Distance

1335 88.4 MDR Figaro, Leipzig Wiederau, Germany 1926km
1400 88.4 Bayern 2, Pfaffenberg or Munchen, Germany 1714 or 1630km
1320 88.6 France Culture, Ussel-Meymac/Mont Bessou (?), France _CULTURE 983km
1300 88.8 CRo Sever, Usti nad Labern/Bukova, Czech Republic R-SEVER_ 1886km
1310 88.8 SWR2, Heidelburg/Konigstuhl, Germany __SWR2__ 1594km
1337 88.8 ?,? RDS=KRYSTOF_
1340 88.8 ?,? RDS=KRAJINA_ [Krajina in Serbia? pirate?]
1415 90.5 CRo Hradec Kralove, Trutnov/Cerna hora, Czech Republic R-HK____ 2044km *
1422 90.7 Bayern 1, Grunten (?), Germany Bayern_1 1517km
1423 90.8 [no 90.8 tx, must be 90.7 or 90.9?] RadioZurnal, ?, Czech Republic R-ZURNAL
1432 91.4 Radio Impuls, Plzen/Krasov, Czech Republic _IMPULS_ 1849km
1426 91.6 Bayern 2, Hoher Bogen, Germany Bayern_2 1788km
1444 93.5 Frekvence 1, Uti nad Laben/Bukova hora, Czech Republic RADIO_F1 1886km
1448 94.7 Bayern 3, Hoher Bogen, Germany BAYERN_3 1788km

RDS photos: https://www.flickr.com/photos/grantdx/
* = new personal FM Band II record distance

The list is about a third of the stations heard during the two-hour opening and represents those that I could ID. There was so much to listen to (multiple stations on each frequency) that I did not get further than 94.7 progressing up the FM band.

The two unidentified RDS codes may be second/third windows of R-SEVER's RDS encoding. I don't know.

R-SEVER was particularly strong with a stereo RDS signal for almost two hours continuously. Crazy DX! And the sky was very cloudy from a terrible storm that had passed through the region (floods killed two people) earlier in the day.

Yours,
Grant

Now, John,

Just make sure, you leave some for us in the north.
These forecasts by Hepburn and F5LEN, they just so vary. Anyway,
hoping for some.

Reckon, many of us hope for some tropo towards Norway, taking in
account their plans for 2017.

They vary very much, but usually give us a good idea. Hepburn was wide
of the mark today though.

The Czech Republic is still pretty good here with Plzen at RDS levels.
Also Liberec, Ceske Budejovice and Usti Nad Labem and Brno in today.
From Austria it's been mostly Bregenz, but also with fair signals from
Salzburg.

Even as I type, central France and Switzerland are still coming in well.
These kinds of tropo are rare. I'm sure it will be your turn soon.

Good DX!

John

Some fantastic tropo today with the following countries heard: Germany, Switzerland, France, Spain (earlier in the day) and more recently Austria and (a first for me via tropo) the Czech Republic! Specifically Plzen on 91.4, 95.6 (with RDS!) and 101.7. Also Usti nad Labelm earlier on 90.9 and 104.5 but much weaker.

There will be lots of recordings to go through again lol. Good DX.

Nick, Whitchurch, Hampshire.

38034. Band II Tropospheric Loggings for 23 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-24 07:39:05 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38034

Hi All,

Now where did that come from? Granted, some tropospheric propagation was forecasted for yesterday, but nothing even close to what we got. A very nice positive surprise for a change! And what about this. When beaming south in the afternoon, I was receiving stations from deeper and deeper into France. Until I suddenly heard Spanish language loud and clear. Giving me the well known light and very nice 'DX-shock'. Just for a short while though, until I saw a strong fading pattern and the RDS appearing. And I realised that, of course, it is end of October, so this must be Sporadic E! Another, maybe even bigger surprise. Very unusual, but I decided to ignore the Es, which lasted maybe 10 minutes, to further concentrate on the tropo DX.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

38037. Tropo > Marseille

Yahoo group: SkywavesDX (2015)
Date: 2015-10-24 11:04:02 UTC
From: John Faulkner, Skegness
Topic: 38037 Message: 38037

As per my log of a few minutes ago:

"I was convinced I heard this yesterday but assumed it was something else. Choppy signal but clear. As 98.0 in Hoher Meissner fade."

No question. Very weak but clear. Hopefully others will hear this.

Good DX!

John

38038. Re: [SkywavesDX] Tropo > Marseille

Yahoo group: SkywavesDX (2015)
Date: 2015-10-24 11:21:10 UTC
From: John Faulkner, Skegness
Topic: 38037 Message: 38038

I keep checking 99.0 as I am still in disbelief that Marseille has been coming though when the rest of the DX seems be on its way out, but it's still there, returning every now and again, but often struggling against HR1 from Hoher Meissner.

94.2 France Inter Marseille was less convincing. In fact it was almost certainly meteor scatter. I wondered about 99.0 being meteor scatter, but the signal is too stable, though still slightly choppy, and it keep returning. Then France Bleu Perigord from Bergerac returned to 99.0 for about half a minute.

Weird conditions!

Good DX!

John

38040. Re-Post. UNID Spain and Germany from yesterday

Yahoo group: SkywavesDX (2015)
Date: 2015-10-24 17:19:03 UTC
From: John Faulkner, Skegness
Topic: 38040 Message: 38040

Hopefully this won't seem too impatient of me. I am compiling yesterday's log and I wondered if anybody can help with these two mysteries.

Firstly, the Spanish station which appeared on 101.7 during yesterday's tropo ...

101.7 unid Spanish 1147 23-10-15
https://app.box.com/s/ogdw4b836fv3bp98pxw6141uql1zrg2q

The conditions and antenna bearing would suggest this is more likely from the Catalunya area. As you will hear, it's definitely tropo and nothing to do with the Es which materialised at the bottom of the band here shortly afterwards. You will hear me bringing in various web streams during the recording, none of which matched my reception.

To save you going through all the recording, the signal peaks between 0' 00" to 0' 50", 02' 36" to 04' 10" and 04' 40" to 05' 50". I wondered if this was Catalunya Informacio.

Nick suggested this might be RNE Radio Nacional from, O Páramo, but the signal was best at 160 degrees (SSE).

Secondly, here's an unusual German station which appeared on 107.4 MHz last night when the rest of the German DX was on their night service. This was a station playing punk style German pops. Again, checking web parallels proved futile. I only heard these ads when the signal was fading. There is a jingle at the beginning of the recording which somebody may recognise.

107.4 UNID German Station 2329 23-10-15
https://app.box.com/s/meyix6yujf2r5t17be49c4ialov5wcmt

Thank you again.

John

Hello.

The Spanish clip on 101.7 seems to be from the Cantabria region, Bilbao area. There was an advert in the clip, with the announcer saying "Producha" @ 0:29. Website is here & the map of their business areas shown...http://producha.es/contacto/
Onda CERO is said to be transmitting from there according to FM List. Later on I heard a discussion in Spanish talking about Edith Piaf's "Non, je ne regrette nien" when the signal peaked at its best if it was the same station as before. It sounded more like a national network station, so maybe it could be Onda CERO after all. I cannot hear any ID so this is all I can go by.

Happy DXing, sleeper77, Southampton.

38043. AW: [SkywavesDX] UNID German station 107.4

Yahoo group: SkywavesDX (2015)
Date: 2015-10-24 19:13:18 UTC
From: Günter Lorenz (FMLIST)
Topic: 38033 Message: 38043

Hi John,

definitely German, a short musical tune, then traffic info mentioning A1 and Euskirchen. If 23:29 is the UTC time of your clip, things are more complicated, as there is this common ARD night program, and I'm not familiar with who airs what. Looking at possible tx candidates, my money would go on Koblenz.

73,
Günter

Thank you Arvid, Sleeper and Günter for your detailed assessments.

Regarding 101.7: Cantabria may have been possible at the time, it was such a widespread tropo. My initial thoughts were Radio Nacional Galicia from O Paramo but I assumed that would have been too far off-beam. It's another one which got away, but perhaps Onda Cero, as you say.

Regarding 107.4: Another one which has got away I guess. I checked as many web streams as I could but I probably didn't check all the local NRW stations in time. I definitely checked SWR4 and it wasn't that. Wouldn't SWR4 have had a common overnight service at At 2329? Not to worry. There's not enough to go on. Radio Euskirchen is listed on 107.4 from Bad Munstereifel but conditions were not particularly enhanced to that area.

Thanks again for listening.

John

Hi Peter. This was another 'mega-tropo' opening, just 3 weeks after the previous one! Very unusual. Countries heard in this opening: Spain, France, Switzerland, Austria, Germany and, for the first time, the Czech Republic, with RDS! Lots of signals from Bayern yesterday evening too, with some such as Ochsenkopf and Wendelstein being strong.
I have a LOT of recordings to go through and upload from this lift.
 Good DX.

Nick, Whitchurch, Hampshire.

38047. Band II Tropospheric Loggings for 24 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-24 21:34:33 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38047

Hi All,

Today was another almost full day with very good Band II tropospheric propagation. Again while nothing was showing on the Hepburn maps.
I can't remember to have ever seen a fight for 91.4 MHz between Plzen and Büttelberg. While, when both stations had a simultaneous dip, the frequency was being taken over by Berlin. Crazy DX stuff!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

** Personal 'First'

Another excellent and mind-boggling tropo and I think the most
widespread tropo I have ever known. The propagation path spread from
northern Spain, right through to northern Germany, with these and all
areas between coming through simultaneously! Complete madness!

I was expecting Poland to make an appearance when conditions spread into
northern parts of the Czech Republic, but it didn't materialise.

The Swiss tropo was the strongest I have known but, unlike the last time
I had good levels from Switzerland (September 23rd 2013), going vertical
did not bring in any low power transmitters. All signals peaked
mid-evening, bringing Bavarian transmitters up to 61dB. The Czech
Republic reached a whopping 54dB too. Again, bear in mind that I am
using a 20dB pre-amp so subtract 20dB from these figures for reality.

And this was the tropo which wasn't forecast! Luckily there were
countless alerts flying around the Skywaves groups. How did they get it
so wrong? Switzerland and the Czech Republic were received from as far
as north-western England!

Good DX!

** Personal 'First'

I am so glad I made several top of the hour recordings overnight. Had I not done this I would not have logged two new Bavarian sites: Gelbelsee and Bamberg.

Plzen was still instantly RDSing at 0300 and 0400. Austria also peaked nicely at 0400. There were still plenty of few strong signals around, but my biggest surprise was the reception of France Culture, Marseille, on 99.0! I was so sure I heard this yesterday but for some reason I couldn't log it. I thought it was my imagination or some tropo-like meteor burst. The signal returned three times this morning and for about 30 seconds each time. Clearly not meteor scatter at all. The tropo maps did not suggest this path would be available to me, but then this was the super-tropo which nobody forecast! Even more surprising was the return of France Bleu Perigord from Bergerac, also on 99.0, which came back to dominate 99.0 shortly afterwards.

May we have another tropo like this very soon!

Good DX!

Hi Ced

When SDR# stabilises (too many changes at the moment) I'll look to upgrade the plugin.

Hi All

Another ‘special’ tropo DX day, the highlight for me was receiving Czechoslovakia, on the following video you can just make out the radio impuls jingle
http://www.apritch.myby.co.uk/TropoCZE1254Km.AVI from the České Budjovice TX

http://www.fmlist.org/fm_logmap.php?datum=2015-10-23&omid=1419&band=Tropo

Congrats John

I logged that one myself via Tropo back in 2012 and I was in similar disbelief at the time, albeit it is 400KW!

Andy.

Subject: Re: [SkywavesDX] Tropo > Marseille

I keep checking 99.0 as I am still in disbelief that Marseille has been coming though when the rest of the DX seems be on its way out, but it's still there, returning every now and again, but often struggling against HR1 from Hoher Meissner.

94.2 France Inter Marseille was less convincing. In fact it was almost certainly meteor scatter. I wondered about 99.0 being meteor scatter, but the signal is too stable, though still slightly choppy, and it keep returning. Then France Bleu Perigord from Bergerac returned to 99.0 for about half a minute.

Weird conditions!

Good DX!

John

A fantastic logbook Andy, congratulations with all those catches.

I have a question. As being shown in the logbook, it appears you got all of them with full RDS. Is that indeed the case? I have some doubts, after seeing your video of 102.9 Radio Impuls, which is also listed with full RDS.

I would prefer everyone only listing the RDS information in case being received and as being received. It is an indicator of the strength of the signals received.

Best regards,
Janpeter

Thanks Andy.

Wow! Well done!

It's easy to think "I'll never receive that". Then one day the impossible happens. We always assume that it's better to live on the coast as reception 'must therefore be better'. In some way perhaps, but what about the times when those ducts have skipped right over our heads and gone way inland? It's happened many times to me this season. It's the luck of the draw. We can never assume anything. Then there's James' amazing duct from Devon to the Azores at more than 2200 km! What on earth is happening? :)

October has been exceptional this year. I missed the first two of the month's Es openings (did I really just say that?) but caught today's, thanks to an alert on the Skywaves Skype chat. I have a few more files to go through and I will post the log later.

Good DX!

John

An unexpected Es opening to Spain and Morocco! I understand this is the
third Es opening this week. I was by the receiver during one of the
other openings and I did not receive anything. The other I was out.
Unusual to have so many Es openings so far away from the main season.

Good DX!

Hi Janpeter

Its just the way I log no signal strength is implied by the ID's, for example:

CZE on 102.9 was weak and 91.4 was borderline stereo. I did have Grünten in RDS see http://www.apritch.myby.co.uk/TropoGermany1078Km.png

Andy.

Subject: Re: [SkywavesDX] 23-Oct-2015 Tropo CZE

A fantastic logbook Andy, congratulations with all those catches.

I have a question. As being shown in the logbook, it appears you got all of them with full RDS. Is that indeed the case? I have some doubts, after seeing your video of 102.9 Radio Impuls, which is also listed with full RDS.

I would prefer everyone only listing the RDS information in case being received and as being received. It is an indicator of the strength of the signals received.

Best regards,

Janpeter

Hi John

An amazing log! This month's landfall of former Hurricane Joaquin (the strongest Atlantic hurricane since Igor in 2010) across Spain has resulted in very strange weather conditions here in Andalusia: huge variations in temperature, massive cloud formations, torrential rains, enormous electrical storms. The regional TV news here has lately been dominated by numerous weather-related disasters and deaths. Maybe this has impacted the Sporadic E occurrences unusually. Certainly, radio reception here has been very unusual in recent weeks. On Saturday night, I could hear RNE Radio Clasica 88.6 from Confrides, Alicante (212 km away) clearly for hours on end in perfect stereo, a phenomenon noted by another DXer here (see http://elchetv.gatovolador.net/foro/viewtopic.php?f=8&t=3229&sid=48c7c8c2e957b9ee456083e8d36835d4).

While you were logging these stations local to me, it was unusually cold, very dark and pouring with rain all day here (a typical British autumn day!), so I could not venture out onto the roof terrace with my little portable radio yesterday and missed the opening. Maybe there will be another soon.

Yours,
Grant

An amazing log indeed!

I did have a quick listen and the MUF was up to 106Mhz here at one time, but I was concentrating on the CQWW HF contest, so didn't stop for long.

It's not that unusual to get Es at this time of year – my experience on 6m is that some Es will pop up on 6m in the last week of October perhaps one year in two… but unusual to have ES this intense, granted.

Amazing to think that this week has probably been better for Es than the first week of June was…..

Hi Grant.

Sounds like you have been having severe weather. I've never witnessed a really bad electrical storm in my life, but I know some parts of the UK, not far from here, Cambridge, etc., have had some big ones towards the end of summer. We haven't really had a storm since moving here just over five years ago. We get tiny ones which brush past us out at sea or to the south of here, a mini thunderstorm alley. The Lincolnshire Wolds take most of them. This is the driest and sunniest side of he UK though. Not boasting at all - I'd love to see a good storm.

With the hurricane which has just battered Mexico and the huge typhoon out in the Philippines, you wonder what is happening. As current weather forecasts project, we may be seeing generally stable conditions here for the next month and beyond, hopefully with more tropos.

The weather is often settled during our autumns though with extensions of the Azores high. The big frosts don't usually arrive until November or December. December has traditionally been our wild season in recent years with gale force winds and above so no tropo then. As for snow? We don't usually get it along the east coast. If we do it's melted after a few hours. The winter nuisance here is north-easterly winds which can be so bitter it becomes painful to to go outdoors. And our national weather forecasts don't usually take the 'Wolds' Effect into account. It's often warm and sunny here when it's cooler and cloudy only a few miles inland.

Anyway, there you have a breakdown of the east coast weather. :) Great in the summer, generally 'mild' at all other times, but winter can have big problems.

Cheers

John

Attachments: 1 described; binary payloads are missing from this source WARC

No one knows what is the unit? It seems that no one uses mobile phone for emergency Dxing. Well i have some news for you, it has a sensitive receiver but not as much selective, good for emergency Dx situations.
Yesterday I received with my mobile phone, (nothing special just a Sony Xperia ST15i) an Italian station Located 475km away from here at 89.5Mhz. The insane thing is that I only used headphones as an antenna and charging cord fitting micro-usb also, to act as an antenna (away from the Charger).

When the signal from Italy got strong after 24-25 of this represent units, came up RDS INFO . I took the picture that I publish. So the conclusion is It has to be dbf not dbμV nor dbm. I have seen other tuners above the 24 dbf barrier, came up the RDS INFO so I suspect that the unit is dbf. Feel free anyone to correct me if I'm wrong.

Thanks.

Hi Panos. Not sure who else uses Spirit FM here.

I used to use it on my rooted Samsung Galaxy S3. I'm not sure what measurement of signal strength the app uses. However, it's a useful little app, as it shows PI codes, as well as PS names. Unfortunately, the FM radio itself in the S3 is rather poor and not up to DXing. I'd love to try it on another Android phone, I remember reading that some phones have some very good radios on board for DXing (can anyone make any recommendations again?). I did find it useful one day in the summer in London for doing a bandscan of London FM pirates, and getting their RDS data.

In built FM radios seem to be becoming more of a rarity on phones now. I pensioned off my S3, as it was too slow to multitask, but its replacement the Samsung Galaxy S4 does not have an FM radio chip on board at all.

It occurs to me that you should contact the writer of the app, Mike Reid, who might be able to give the information you need as to the unit of measurement used for the signal reading. There's a thread on the XDA developers forum concerning Spirit FM, which might be a good starting point. http://forum.xda-developers.com/showthread.php?t=1059296

Aye - and when you fix it - it will only work if you have an AirSpy, an RTL-dongle, a Funcube, or an RFSpace as SDR# has been set so that only "approved" hardware platforms will be able to access the plug-ins.

From the airspy.com website "Also supports radios from our partners: RFSPACE USB and Networked Radios and the Funcube Dongles. Other hardware might work with a minimalist feature set, but we do not offer any support of any kind for it."

Hi John,

Crazy to see such a logging list this time of year.

I have one suggestion:

97.2 1144 E SER, Vielha/Eth Aro (CAT-L) EA39 1163km
I think this may have been SER Noroeste from Caravaca de la Cruz/Pico del Buitre (MUR). It has this PI and matches the reception area better.

On a separate note, this evening I finally had some time to go through your loggings of 2 October. Which was another incredible list. Even more when listening to your recordings, with some very distant stations coming through in fully quieting stereo. We may be in for a tropo threepeat this coming weekend.

73, Janpeter

As always, a very big thank you for your help.

Yes, I overlooked this. It fits the conditions much better and I will
update the log shortly.

I hope so, but probably more for you than for the UK. We might just be
too far off the edge of an opening, if it happens.

The weather looks generally settled here over the next few weeks. if the
long-range forecasts are anything to go by. They will probably change to
some degree. The air is very warm here, quite still too, but I haven't
been checking band 2 a lot. Conditions have been average/normal when I
have checked. Medium wave has taken the driving seat for the last few
days with Beverage experiments.

Back to the Es again, I feel quite uncomfortable posting summer logs
several months late. It's not at all how I would like things to be, but
I knew something like this would happen. I have almost finished my files
from July 7th. It's a monster and my largest logbook ever. I will feel
like a mega-geek when I eventually post it. There are dozens of
recordings of rare catches too, but I am determined to complete all all
my Es files and post logs in the usual fashion - for now. Things will
have to change next season as this is quite ridiculous, but great fun,
and I have learnt a few things about the propagation paths in the
process. I have probably already said this, but I hope I will have
completed my Es files before the next E season begins :)

Good DX!

John

38082. Tropo October 22-24 2015

Yahoo group: SkywavesDX (2015)

From: nick gilly
Topic: 38082 Message: 38082

Well, that was a surprise. Exactly 3 weeks after the phenomenal tropo to northern Europe at the beginning of the month, comes another belter, the likes of which you would normally have to wait several years for. This time it was more widespread, affecting a large part of Europe.

I first noticed that something interesting was brewing on returning home from work on the Thursday, the 22nd. Turning the XDR on revealed plenty of signals from eastern and central France, SW Germany and Luxembourg. We had to go to Andover shopping though and by the time we got back the tropo to E/SE had fizzled. However, there were still some signals from quite deep into France, as well as a mostly weak RNE Radio Clásica on 91.6 from Culleredo. As the evening wore on Pic du Midi came up nicely on 87.9, reaching RDS levels:

https://app.box.com/s/ikbm7pykz4xxvyk8g73arb6jt032w46r

A few other signals from Spain also started to come in too including RNE 5 on 105.0. The tropo area was actually widespread as a few signals from Germany were also in.

By the following morning there was a good lift to the south with several stations in from the Basque region of Spain as well as as an RDS level signal from France Bleu Gascogne on 100.5:

https://app.box.com/s/mr5i9o3ly1qywvd5ek4xjzyar9cwvxns

A little later, swinging the beam round to the SE brought in Säntis in Switzerland, including a decent signal from RSI Rete Uno on 107.8:

https://app.box.com/s/2id79908t8hcqrmzvnhvtnq1uc73oipm

Italian sounds a lot more exotic on FM than German

Then, after returning home from work at about 2.20 pm local the band was wide open from southern and central France, Switzerland, and southern Germany, and even a Spaniard on 90.9! A very large area coming in simultaneously. As the afternoon wore on the signals from Germany got better. By the evening they were joined by my first ever reception of the Czech Republic via tropo, mainly Plzen on 91.4, 95.6 and 101.7 but also a couple of frequencies from Liberec. Amazingly, Plzen even reached full RDS levels on 95.6:

https://app.box.com/s/7ppewkys2p08huz369nta54bfjmxr98s

https://app.box.com/s/10gg055jfsb1n0onbx6ft2jlu2rioto5

Austria also joined the party in the evening, from Bregenz and latterly Salzburg. So by this time the band was full with signals from southern and central Germany, Austria, Switzerland and the Czech Republic!

The lift was still ongoing the next morning but with generally fewer signals and on average weaker. Switzerland and Austria had gone. However, Plzen was still in on 91.4 and stayed hanging around until after 10.30 am local. The main lift dropped out at around 11 am, but a

handful of weak signals could be heard as if by scatter until well into the afternoon.

Well that's enough waffle from me, so here are some more highlights from this tropo:

91.6 RNE Radio Clásica Culleredo 1036 km:
https://app.box.com/s/6415i5i1ef8g22ixttqanacoyygpv07n

100.5 France Bleu Gascogne Bayonne 881 km:
https://app.box.com/s/mr5i9o3ly1qywvd5ek4xjzyar9cwvxns

105.1 RTL Bayonne 881 km (next to local Wave 105.2):
https://app.box.com/s/muj0wmyc83trnvdxkay5pft43ezwytz7

94.7 Gaztea Bilbao 899 km: https://app.box.com/s/vvln4snxcggznwk2rj66ro4bco6wwk72

87.7 Euskadi Irratia Azkoitia 901 km:
https://app.box.com/s/xu85k5k5a7zqwe0d7u6tydlpgria0hcp

95.7 RNE Radio 5 Monreal 949 km (presumed):
https://app.box.com/s/wp6ud01g61vsrqge2hsddese0ayx0ojo

103.8 Radio SRF 3 Rigi 851 km: https://app.box.com/s/07qhbwq7mcgqni4116maglbengvgezbi

90.9 France Musique Carcassonne 914 km:

Ofcom has today published a statement approving Format changes to both Radio City 2 and City Talk in Liverpool:
"Radio City 2 (AM) will now broadcast ☐rock hits with news, local sport and information programming☐, and be renamed Radio City Talk."
"City Talk (FM) will now broadcast ☐classic soft pop music☐, and be renamed Radio City 2."

Can anyone please let us know when the format/name change has been effected.

Thanks and 73,
Günter

  Well, that was a surprise. Exactly 3 weeks after the phenomenal tropo to northern Europe at the beginning of the month, comes another belter, the likes of which you would normally have to wait several years for. This time it was more widespread, affecting a large part of Europe.

I first noticed that something interesting was brewing on returning home from work on the Thursday, the 22nd. Turning the XDR on revealed plenty of signals from eastern and central France, SW Germany and Luxembourg. We had to go to Andover shopping though and by the time we got back the tropo to E/SE had fizzled. However, there were still some signals from quite deep into France, as well as a mostly weak RNE Radio Clásica on 91.6 from Culleredo. As the evening wore on Pic du Midi came up nicely on 87.9, reaching RDS levels:

https://app.box.com/s/ikbm7pykz4xxvyk8g73arb6jt032w46r

A few other signals from Spain also started to come in too including RNE 5 on 105.0. The tropo area was actually widespread as a few signals from Germany were also in.

By the following morning there was a good lift to the south with several stations in from the Basque region of Spain as well as as an RDS level signal from France Bleu Gascogne on 100.5:

https://app.box.com/s/mr5i9o3ly1qywvd5ek4xjzyar9cwvxns

A little later, swinging the beam round to the SE brought in Säntis in Switzerland, including a decent signal from RSI Rete Uno on 107.8:

https://app.box.com/s/2id79908t8hcqrmzvnhvtnq1uc73oipm

Italian sounds a lot more exotic on FM than German

Then, after returning home from work at about 2.20 pm local the band was wide open from southern and central France, Switzerland, and southern Germany, and even a Spaniard on 90.9! A very large area coming in simultaneously. As the afternoon wore on the signals from Germany got better. By the evening they were joined by my first ever reception of the Czech Republic via tropo, mainly Plzen on 91.4, 95.6 and 101.7 but also a couple of frequencies from Liberec. Amazingly, Plzen even reached full RDS levels on 95.6:

https://app.box.com/s/7ppewkys2p08huz369nta54bfjmxr98s

https://app.box.com/s/10gg055jfsb1n0onbx6ft2jlu2rioto5

Austria also joined the party in the evening, from Bregenz and latterly Salzburg. So by this time the band was full with signals from southern and central Germany, Austria, Switzerland and the Czech Republic!

The lift was still ongoing the next morning but with generally fewer signals and on average weaker. Switzerland and Austria had gone. However, Plzen was still in on 91.4 and stayed hanging around until after 10.30 am local. The main lift dropped out at around 11 am, but a handful of weak signals could be heard as if by scatter until well into the afternoon.

Well that's enough waffle from me, so here are some more highlights from this tropo:

Well, that was a surprise. Exactly 3 weeks after the phenomenal tropo to northern Europe at the beginning of the month, comes another belter, the likes of which you would normally have to wait several years for. This time it was more widespread, affecting a large part of Europe.

I first noticed that something interesting was brewing on returning home from work on the Thursday, the 22nd. Turning the XDR on revealed plenty of signals from eastern and central France, SW Germany and Luxembourg. We had to go to Andover shopping though and by the time we got back the tropo to E/SE had fizzled. However, there were still some signals from quite deep into France, as well as a mostly weak RNE Radio Clásica on 91.6 from Culleredo. As the evening wore on Pic du Midi came up nicely on 87.9, reaching RDS levels:

https://app.box.com/s/ikbm7pykz4xxvyk8g73arb6jt032w46r

A few other signals from Spain also started to come in too including RNE 5 on 105.0. The tropo area was actually widespread as a few signals from Germany were also in.

By the following morning there was a good lift to the south with several stations in from the Basque region of Spain as well as as an RDS level signal from France Bleu Gascogne on 100.5:

https://app.box.com/s/mr5i9o3ly1qywvd5ek4xjzyar9cwvxns

A little later, swinging the beam round to the SE brought in Säntis in Switzerland, including a decent signal from RSI Rete Uno on 107.8:

https://app.box.com/s/2id79908t8hcqrmzvnhvtnq1uc73oipm

Italian sounds a lot more exotic on FM than German

Then, after returning home from work at about 2.20 pm local the band was wide open from southern and central France, Switzerland, and southern Germany, and even a Spaniard on 90.9! A very large area coming in simultaneously. As the afternoon wore on the signals from Germany got better. By the evening they were joined by my first ever reception of the Czech Republic via tropo, mainly Plzen on 91.4, 95.6 and 101.7 but also a couple of frequencies from Liberec. Amazingly, Plzen even reached full RDS levels on 95.6:

https://app.box.com/s/7ppewkys2p08huz369nta54bfjmxr98s

https://app.box.com/s/10gg055jfsb1n0onbx6ft2jlu2rioto5

Austria also joined the party in the evening, from Bregenz and latterly Salzburg. So by this time the band was full with signals from southern and central Germany, Austria, Switzerland and the Czech Republic!

The lift was still ongoing the next morning but with generally fewer signals and on average weaker. Switzerland and Austria had gone. However, Plzen was still in on 91.4 and stayed hanging around until after 10.30 am local. The main lift dropped out at around 11 am, but a handful of weak signals could be heard as if by scatter until well into the afternoon.

> Then, after returning home from work at about 2.20 pm local the band was wide open from southern and central France, Switzerland, and southern Germany, and even a Spaniard on 90.9! A very large area coming in simultaneously. As the afternoon wore on the signals from Germany got better. By the evening they were joined by my first ever reception of the Czech Republic via tropo, mainly Plzen on 91.4, 95.6 and 101.7 but also a couple of frequencies from Liberec. Amazingly, Plzen even reached full RDS levels on 95.6:

> Austria also joined the party in the evening, from Bregenz and latterly Salzburg. So by this time the band was full with signals from southern and central Germany, Austria, Switzerland and the Czech Republic!
>
> The lift was still ongoing the next morning but with generally fewer signals and on average weaker. Switzerland and Austria had gone. However, Plzen was still in on 91.4 and stayed hanging around until after 10.30 am local. The main lift dropped out at around 11 am, but a handful of weak signals could be heard as if by scatter until well into the afternoon.

Thanks Andy and Patrick. October 2015 will be a month to remember.
Patrick, did you log anything interesting during the tropo?
 Good DX.

Nick, Whitchurch, Hampshire.

  Well, that was a surprise. Exactly 3 weeks after the phenomenal tropo to northern Europe at the beginning of the month, comes another belter, the likes of which you would normally have to wait several years for. This time it was more widespread, affecting a large part of Europe.

I first noticed that something interesting was brewing on returning home from work on the Thursday, the 22nd. Turning the XDR on revealed plenty of signals from eastern and central France, SW Germany and Luxembourg. We had to go to Andover shopping though and by the time we got back the tropo to E/SE had fizzled. However, there were still some signals from quite deep into France, as well as a mostly weak RNE Radio Clásica on 91.6 from Culleredo. As the evening wore on Pic du Midi came up nicely on 87.9, reaching RDS levels:

https://app.box.com/s/ikbm7pykz4xxvyk8g73arb6jt032w46r

A few other signals from Spain also started to come in too including RNE 5 on 105.0. The tropo area was actually widespread as a few signals from Germany were also in.

By the following morning there was a good lift to the south with several stations in from the Basque region of Spain as well as as an RDS level signal from France Bleu Gascogne on 100.5:

https://app.box.com/s/mr5i9o3ly1qywvd5ek4xjzyar9cwvxns

A little later, swinging the beam round to the SE brought in Säntis in Switzerland, including a decent signal from RSI Rete Uno on 107.8:

https://app.box.com/s/2id79908t8hcqrmzvnhvtnq1uc73oipm

Italian sounds a lot more exotic on FM than German

Then, after returning home from work at about 2.20 pm local the band was wide open from southern and central France, Switzerland, and southern Germany, and even a Spaniard on 90.9! A very large area coming in simultaneously. As the afternoon wore on the signals from Germany got better. By the evening they were joined by my first ever reception of the Czech Republic via tropo, mainly Plzen on 91.4, 95.6 and 101.7 but also a couple of frequencies from Liberec. Amazingly, Plzen even reached full RDS levels on 95.6:

https://app.box.com/s/7ppewkys2p08huz369nta54bfjmxr98s

https://app.box.com/s/10gg055jfsb1n0onbx6ft2jlu2rioto5

Austria also joined the party in the evening, from Bregenz and latterly Salzburg. So by this time the band was full with signals from southern and central Germany, Austria, Switzerland and the Czech Republic!

The lift was still ongoing the next morning but with generally fewer signals and on average weaker. Switzerland and Austria had gone. However, Plzen was still in on 91.4 and stayed hanging around until after 10.30 am local. The main lift dropped out at around 11 am, but a handful of weak signals could be heard as if by scatter until well into the afternoon.

Well that's enough waffle from me, so here are some more highlights from this tropo:

91.6 RNE Radio Clásica Culleredo 1036 km:
https://app.box.com/s/6415i5i1ef8g22ixttqanacoyygpv07n

100.5 France Bleu Gascogne Bayonne 881 km:

38090. Unidentified loggers

Yahoo group: SkywavesDX (2015)
Date: 2015-10-30 22:08:12 UTC
From: ilkka suni
Topic: 38090 Message: 38090

Seems to be a habit, there is unidentified loggers to FMLIST logbase,
as well as to DXmaps.

I just don't see the point. I find it very useful to know who the
logger is, to comprehend the equipment and the skills of the logger.

If one is too shy to reveal one's identity, why log at all?

Happy Halloween!

38091. Aircraft Scatter of exceptional duration

Yahoo group: SkywavesDX (2015)
Date: 2015-10-30 23:06:51 UTC
From: ilkka suni
Topic: 38091 Message: 38091

Now, one must take in consideration, current conditions for this very day. Climate such, too.

I am not sure whether I find this just a trivial anedcote, or an unusual occasion. But, take this very day, I have had numerous Aircraft Scatters up to duration of even 10 minutes, by just single aircrafts. As I recall, AS usually lasts for some, say from 30 up to 120 sec.

Considering the forthcoming tropo conditions, I am having my 8-el. horizontal beamed towards 60 kW, 600 km Stockholm tx. My usual, for expected tropo from the SW.

The Aircraft Scatter of the passing day, I find somewhat exceptional. In the last say two years, I cannot remember whether I can recall similar. Then again, I admit to be demented, having a lousy memory capability since I was cursed to born.

Just a sample, for the day oopsalreadypassedinfinland. This one is only up to 4 minutes,
I missed recording the longer ones:
https://app.box.com/s/qnfv9qzeic030kyavd8dxv2aipzceojd

Any which way, the nature of:
A] duration.
B] white noise and
C] audio distortion, during say the last 12 hours, has been... Amuzing?

I agree Ilkka. But it may just be how they set up their logbook, so quite innocently done.

One thing I think we should bear in mind is that some people don't like to give away their exact location. I myself have used a point very close to where I live, just around the corner, but not exactly spot on. It's just a privacy thing I suppose, and like the Cadbury Creme Egg question, it's a question of How do you eat yours?

I noticed yesterday that one of my own FM List logbooks didn't include my name. I need to spend some time checking through these things.

I wish people would use their real names too instead of made-up usernames, but it's a personal thing again and we must respect privacy.

John

38093. Band II Tropospheric Loggings for 30 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-30 23:55:42 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38093

Hi All,

The third big Band II tropo event for this month kicked-in today. I do not recall to have ever experienced something like this before.
The skip area is very similar to where things left off just six days ago. I wonder what the next 3 - 4 days are going to produce. It may very well be very good.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

38094. Who carries SWR2 and WDR2 Popnacht on 88.4?

Yahoo group: SkywavesDX (2015)
Date: 2015-10-31 01:38:28 UTC
From: John Faulkner, Skegness
Topic: 38094 Message: 38094

I currently have a very weak NDR2 / WDR2 overnight service on 88.4. I presume only WDR2 from Bergheim would be carrying this. Can somebody confirm this is correct please?

Thanks

John

38098. Band II Tropospheric Loggings for 31 October 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-10-31 21:13:01 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38098

Hi All,

Another BIG day today with many hours of wide spread Band II tropospheric propagation. We are getting spoiled big time. And it doesn't seem to be over any time soon.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Saturday 31 October 2015
Band II Tropospheric Loggings:

38099. ** Intense Tropo

Yahoo group: SkywavesDX (2015)
Date: 2015-11-01 01:22:32 UTC
From: John Faulkner, Skegness
Topic: 38099 Message: 38099

Tropo conditions are intense here. Lille and Egem are 70dB+ with widespread German transmitters strong and at full RDS levels, including lower powered sites like Olsberg and Ederkopf. Some Dutch stations are over 70dB in spite of my antenna being horizontal. Even French vertical 'locals' were over 60dB earlier.

The XDR is suffering intermodulation products with stations appearing on the wrong frequency. A good example would be BBC Radio 2 on 87.5, mixing with something else - a German station I think.

The fact is, I cannot see the DX for the DX! This must be similar to Mediterranean tropo. The tropo charts should have a big splodge of red or grey over the North Sea!

John

38100. Re: [SkywavesDX] ** Intense Tropo Continues

I have total burnout here. My radio is still telling me I am living in Germany. Or the Netherlands if I put the antenna vertical. Signals are still reaching the low 70s on the XDR dBf scale (Konrad mod). I am concentrating on locals from the Netherlands at the top of the band at the moment.

Good DX!

38101. Re: [SkywavesDX] FM radio bandscan in Vera, Almeria, Spain

Yahoo group: SkywavesDX (2015)
Date: 2015-11-01 12:08:56 UTC
From: Grant Williams
Topic: 37667 Message: 38101

Hello

Updated FM bandscan from SE Spain.

* This lists only stations heard during the past month
* Station names sourced from listening or RDS
* Station locations sourced from listening or RDS or the AER database at
http://www.fmlist.org/aer_fm.php?smode=S ['?'=location unknown]
* Station RDS sourced from observations.

Yours,
Grant

38102. EITB Irratia on 90.9?

Yahoo group: SkywavesDX (2015)
Date: 2015-11-01 14:56:03 UTC
From: nick gilly
Topic: 38102 Message: 38102

This was recorded during 'mega-tropo' day, on October 23rd, on 90.9:
https://app.box.com/s/zzbp9d5udn9cwawqxp4hluuxsrgprht5
There is a clear 'EITB Irratia' ID on the recording, but FMLIST has it (for the Zaldiaran site) as 'EITB Musika, ex EITB Irratia'. Has it changed back?
Thanks for any help. Good DX.

Nick, Whitchurch, Hampshire.

38103. Band II Tropospheric Loggings for 1 November 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-11-01 23:20:10 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38103

Hi All,

Yet another good day for tropospheric Band II conditions, allbeit on slightly reduced 'power'. For a while in the afternoon there was rare short skip from the northern parts of Holland, producing several first time catches of low power stations. Due to the relatively short distances, I have not included those loggings in the logbook. They can be found in my Zoetermeer bandscan.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Sunday 1 November 2015

Nice work Janpeter,
yesterday afternoon I found Dutch tropo at the bottom of a local
valley- a place called Woodhouse Green between Biddulph & Leek,
staffordshire

(lelystad 103.0, 87.7 and some Eastern English stuff that's rare for me)
when I climbed higher the dx was blocked by local stuff!

Heart 102.4 from Norwich was a nice surprise
rx was a tecsun 380

back at home there was a mega weak signal from 87.7 and nothing else

On 01/11/2015, Janpeter van Dijk janpeter_van_dijk@...

Thank you Tim. Yes, sometimes it is best not to have a high elevated antenna.

This evening the tropo towards the UK is much stronger than yesterday. I see that you are getting some of my locals.

Good DX!
Janpeter

Onderwerp: Re: [SkywavesDX] Band II Tropospheric Loggings for 1 November 2015

Nice work Janpeter,
yesterday afternoon I found Dutch tropo at the bottom of a local
valley- a place called Woodhouse Green between Biddulph & Leek,
staffordshire

(lelystad 103.0, 87.7 and some Eastern English stuff that's rare for me)
when I climbed higher the dx was blocked by local stuff!

Heart 102.4 from Norwich was a nice surprise
rx was a tecsun 380

back at home there was a mega weak signal from 87.7 and nothing else

Rangstrup in here on 97.2, 99.9 and 102.1, up to 1 bar and almost noise-free. It's been fading up & down for the last 45 minutes or so. Belgium was very strong earlier.
Good DX.

Nick, Whitchurch, Hampshire.

38109. Band II Tropospheric Loggings for 2 November 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-11-02 23:53:28 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38109

Hi All,

It lasted until well into the afternoon for conditions to develop today. But when it took off, things got really intens, particularly into the UK. Getting Sutton and Wenvoe with instant RDS was a very long time ago since it last happened. Some lovely lower power catches also. Joy to the max these days :-)

My total number of loggings, both Es and tropo, has reached an unprecedented high. If this continues, I will be getting the double amount of loggings compared to the previous personal record.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

agreed, logs without locations are meaningless

if I said I just logged the Tyne Tunnel relay that is either the best
dx ever or the worst depending on whether i'm in the tunnel or not!
:-)

38115. Band II Tropospheric Loggings for 3 November 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-11-03 22:59:54 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38115

Hi All,

The last loggings lot for this great tropospheric spell, which started on Friday. Assuming that tomorrow Band II will have returned to normal. I am still hearing Hörby though, as I type this. This is now the only (!) DX station left on the band, pretty odd.

Now I need a vacation, to recover from a DX overdose :-)

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Tuesday 3 November 2015

> Assuming that tomorrow Band II will have returned to normal.

Well, not yet!
When checking this morning before driving to work, the tropo levels here are still very high with Berlin frequencies beating our local powerhouses, e.g. on 88.8 I hear Stadtradio Berlin and not SR P1 from Hörby, and on 91.4 there is 91.4 BRF and not Nova FM from Copenhagen. The FM band is simply filled with German stations!

Another one of those mirror-in-the-sky DX experiences!

  This was recorded during 'mega-tropo' day, on October 23rd, on 90.9:
https://app.box.com/s/zzbp9d5udn9cwawqxp4hluuxsrgprht5
There is a clear 'EITB Irratia' ID on the recording, but FMLIST has it (for the Zaldiaran site) as 'EITB Musika, ex EITB Irratia'. Has it changed back?
Thanks for any help. Good DX.

Nick, Whitchurch, Hampshire.

** Personal First

The second day of the tropo and conditons are becoming quite widespread, jumping quickly from one area to another. Sometimes the conditions will die away quite suddenly, only to return a few minutes later. I wonder if this has something to do with the variable amounts of mist and fog we have experienced today.

Good DX!

505km

** Personal First

Day three of the current tropo spell and no signs of it abating! If anything, signals are increasing, with some German transmitters reaching high strengths, strong enough to be audible on the car radio in town!

The log of DLR Kultur on 89.0 from Jever was interesting and it took me many minutes to realise what was happening. At first, I couldn't find anything on the web which matched the radio play I was hearing, yet this seemed to be the same radio play I could hear on DLR Kultur 97.4 (Brocken) and 96.5 (Langenberg). After a while, I realised that it 'was' the same play, but 89.0 was almost TEN MINUTES AHEAD! Presumably some audio distribution problem.

Many more regular continental tropo catches were received but I have not included them in the log.

Good DX!

and ID 630km

** Personal First

Welcome to day four of what is turning into one of the strongest tropos
I have ever experienced! Lille and Egem have been peaking in the low 70s
dBf (Konrad XDR-GTK software).

As with last week's tropo, the band is unrecognisable as being from
anywhere within the UK. What has also become apparent is that, during
the late evening, signals were so strong that my XDR-F1HD has been
experiencing intermodulation products. I have never experienced this
kind of thing before with tropospheric activity and it looks like
Tacolneston is to blame as I received a mixture of BBC Radio 2 and
something else (BBC Radio 3?) on 87.5. This is likely 89.7 & 91.9 mixing.

Subtract 17 dB from my figures to get a more accurate signal reading.
(-20 dB for pre-amp, plus 3 dB for antenna splitter).

I have avoided repetition here, ignoring the more regular DX or recently
logged entries.

Good DX!

** Personal First

Will this tropo ever end? We're into day five now. While most of the DX has fizzled away this morning, some Germans remain, but my attention has been drawn to Sweden, which is now occupying many frequencies. At least 16 Swedish transmitters were heard around the midday period and a few new transmitters too, the furthest being the Norrköping at 1174 km, very close to the on the eastern Swedish coast. You begin to realise that Finland is actually a good contender for band 2 reception one day.

Just before the tropospheric activity disappeared, I managed to hear a very weak Koszalin on 97.4. I followed this for ten minutes, hearing music, an OM and commercials, well down into the noise and barely audible, but unmistakably there.

This is the conclusion of yet another amazing spell of band 2 tropospheric activity!

Good DX!

Hello nick.
The only one transmitter on 90.9 is "Radio Euskadi" that belongs from EITB <https://en.wikipedia.org/wiki/EITB> group.
If you scroll down on this link <http://www.eitb.eus/es/radio/radio-euskadi/frecuencias/> until Álava, you can see the 90.9 transmitter on Zaldiaran <https://en.wikipedia.org/wiki/Zaldiaran> with coverage to Vitoria-Gasteiz area.
I hope this can help you.
Regards

38127. Re: [SkywavesDX] EITB Irratia on 90.9?

Yahoo group: SkywavesDX (2015)
Date: 2015-11-06 07:39:34 UTC
From: nick gilly
Topic: 38102 Message: 38127

Thanks Pedro & Sequeyo.
The Wikipedia page you linked to Sequeyo describes EITB Irratia as a "cultural and soft music radio station in Basque and Spanish" which would make sense with the music being played. Furthermore, according to EITB Musika's website, EITB Musika is on 103.4 from Zaldiaran:
Eitb Musikako frekuentziak | EiTB Irratia

| |
| | | | | | | |
| Eitb Musikako frekuentziak | EiTB IrratiaEITB Musikako frekuentzia emisioak eitb.com-en |
| |
| View on www.eitb.eus | Preview by Yahoo |
| |
| |

So I think it is definitely EITB Irratia being broadcast from Zaldiaran.

Good DX.

Nick, Whitchurch, Hampshire.

Topic: 1695 Message: 38129

Quite a few signals on the band from the central belt. Sackpfeife/Biedenkopf is particularly good (up to 3 bars with quick RDS) but also Inselsberg, Rimberg, Barbelkreuz, Ederkopf, Ochenkopf, and probably a few others about. The more distant txes are weak, apart from Inselsberg which is up to 2 bars. Good DX.

Nick, Whitchurch, Hampshire.

38130. Band II Tropospheric Loggings for 8 November 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-11-08 15:02:29 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38130

Hi All,

This is starting to become an exceptional DX year with yet another BIG tropospferic Band II opening, the fourth in just over a one month time period.
Some very big signals from Germany this time and CZE and POL made an appearance again also.

This must also be said. Although I did not really believe in the tropo forecast because of the bad weather yesterday, this time the predictions were spot-on.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi Dave,

Great to see your reception of out-of-season SP-E. My pictures were less sharp as the bandwidth was restricted through my D-100. Perhaps I should have tried receiving directly on Band I.

I never expected to see Belarus on Band I again. Isn't it due to go off air/DSO this year?

Chris (Lincoln, UK).

Hi Chris yes I was quite chuffed to get anything and with a good signal for a change...This was direct from the JVC btw. A good find for £17...

As for analogue switch off end of the year maybe ? Not sure myself

Hi Dave,

I was very lucky, someone at my local Amateur Radio club (LSWC) was going to throw away his JVC 610, so I said I would have it, rather than him throw it away. I always wanted one in the 1980s, but couldn't afford it.

So far noted Besançon, Troyes, Bourges, Chartres, Ussel (99.7), Lyon (up to 2 bars), Guéret, 99.3 France Inter Le Puy-en-Velay, and an UNID France Musique on 97.2 that is peaking SSE (probably Argenton-sur-Creuse). Hopefully this won't fizzle as the evening goes on. Good DX.

Nick, Whitchurch, Hampshire.

Kenwood L-1000T, Yamaha T-2, Sony ST-SA5ES, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

Slow deep fading with me from a few France Bleu's etc, one moment it's RDS signal quality then some minutes later zero then back up again !

WDR, SWR, HR and MDR regions. Signals mostly weak to fair, although I think this has fizzled since I turned the tuner on nearly an hour ago.

I noticed that signals were coming in from Belgium at good levels last night after midnight and by 12.30 am I also had Radio SALU 101.7 and WDR Eins Live 105.5 (Barbelkreuz). Good DX.

Nick, Whitchurch, Hampshire.

38157. what countries still use VHF for TV

Yahoo group: SkywavesDX (2015)
Date: 2015-11-14 14:58:09 UTC
From: stuartbarnes460@...
Topic: 38157 Message: 38157

Hi all, I am getting back into wireless after a while out of it all, just wondering which European and Middle eastern countries still use VHF for TV ? and is it only Band 3 now. We are in mid Cornwall after moving from Hertfordshire, used to get some good results in late 80's early 90's Russia, Arabic as well as the more common Western Europe.

Thanks in advance, Stuart

Hi Stuart,

I'm still into TVDX. All countries of western Europe have now switched off their analogue Band I & Band III transmitters.
As I understand it, only Russia will be within a single-hop range next for summer's Sporadic E season.
At the moment Belarus and Ukraine are also still transmitting on Band I, but they are due to be switched off and go digital on UHF by the end of 2015.

I believe that Jordan (on E3) will still be on air for next summer's SP-E season. This is double-hop from the UK, so reception is pretty rare and weak.

Best of luck,

Chris. (Lincoln, UK).

Hi Stuart
Sadly you've missed the 2015 E skip season and this years logs are no guarantee of what will still be on next year but have a look at this years logs:

http://skywavesdx.org/viewforum.php?f=81

Basically theres the Former USSR, Jordan & China, Afghanistan left to see

we did have some unexpected TV signals via F2 Props last winter but don't get your hopes up for a repeat

I recommend this wonderful site which lists the remaining transmitters
http://www.fmlist.org/ul_login.php?sprache=en

if next summer is like this summer.. then brush up your Cyrillic skills :-)

Topic: 38162 Message: 38163

Well screw Yahoo for:

1. Being responsible for a massive increase in spam emails recently.
2. Truncating my message on the group home page. At least the forwarded email arrived in full. I have no idea why it was necessary to truncate it on the group home page. Good old Yahoo once again!

My full log is on the new Skywaves group here.
http://skywavesdx.org/viewtopic.php?f=72&t=1904 where it won't be truncated.

I won't be posting to this forum again until I change my registered email address. Yahoo have gone too far this time.

John

Hi John,

Sorry to read about your inconvenience.

I have been subscribing to this group since 9/2013. I gather, I have
received not a single spam mail, due to this yahoo group.

Overall, I have not had any problem whatsoever, mailing to this group
nor reading postings by others. Only occasional delays with my
postings, and a couple of questionable moderation actions.

Would not know of problems, others in this group have encountered.
Free meals, I never digested one.

Right John,

I still recall some fuss in Sep. 2013. Unusually high MS, wonder how
far one catches via tropo etc. I was just testing being anonymous,
while having my band scan completed.

Anyways, I prefer people would come forward with their actual
experience and equipment. Not so long ago, under a tropo condition, I
wondered whether the logger was a DXcamp of many, or what.

Topic: 38162 Message: 38166

Congratulations Ilkka! You must be the only person who has not experienced some sort of difficulties with Yahoo. :)

I am not knocking the group here. It's a fantastic community and I would not wish to unsubscribe, but Yahoo has always been behind a lot of the spam emails I receive. I haven't had any for a while, then suddenly I have a new influx of them.

I suppose I can't knock a system is free. We exploit them and they exploit us - one way of looking at it, but always advisable to use a safe/unimportant email address.

Now, to see if I can still change my username.

John

Hi John,

You keep amazing me with your dedication to the hobby. And you are also scaring me. While I am considering embarking on an SDR receiver, I should realise that there is also a live outside of the hobby. Knowing myself a little bit, I am almost sure that like you, I would be listening endlessly to all of the recordings. And that does not combine well with the other live. So I am pretty much in doubt now.

Anyhow, here's some suggestions for your UNID's.

99.4 0943 E UNID, ? E061

Radio Intereconomía, Palma de Mallorca. This tx is now on 99.5 MHz.

106.5 0959 E UNID, ? E917

esRadio, Guadalajara

107.1 1001 E UNID, ? E090

Possibly Radio Litoral from Sant Pol de Mar. This is listed on 107.1 MHz though.

93.6 1046 POR UNID, ? 8060

Rádio Cultural de Cerveira, Vila Nova de Cerveira

91.3 1051 ? UNID site, ? E62D FORMUL__ __HIT___

Fórmula Hit, presumably from A Coruña, ex Radio María.

Best regards,
Janpeter

Thank you Janpeter. It scares me too.

At risk of repeating myself (again) ... As you know, for this season only I wanted to make the effort to check ALL the recordings I made. When i bought my Perseus SDR, it opened up a new world. Those brief, rare and exotic west coast North American openings were suddenly available to me. I had never experienced this before. It was as if I had moved to a better location for medium wave DX. I wondered if I would have the same experience on band 2 with the FDM-S2. It looks like it's going to be a very similar experience.

I wrote about this on my blog - the problems doing this are obvious. Not enough free time, hence such big logs taking several weeks to compile. It's more than worth it, but at what cost? I think I have the work/free time/married life balance just right, admittedly, with a fairly obvious tilt in favour of radio. I need to be careful.

So I am learning a lot. I anticipated what was going to happen and I think I got it about right. It's not difficult to work out that you're going to need a lot more free time to follow it through. Now I am seeing a few ways where I can save a lot of time. Mainly this is with my compulsion to make a note of personal firsts. This time it took about two weeks to assess these, doing that little bit by bit, day by day and with a few days off completely. I can find ways to eradicate this fairly boring procedure. I like to keep a list of everything I've heard and there are much better methods than those I use now.

Don't be deterred in buying an SDR for band 2. As long as you can be disciplined about how you go about it. I will be limiting my recordings next year and probably targeting specific areas, assuming a reasonable season of course and that those areas are received.

Posting a log several months after the event is just wrong in some ways and and I need to rectify this if possible.

This has also made me realise that it's only a matter of time before somebody posts a 1000+ entry log, if they are keen.

Anyway, some thoughts here for those who haven't already considered buying an SDR for band 2. "DISCIPLINE" is needed, but if you have the time, then great! It DOES get boring after a while though. Then I take a break and come back to it a few days later.

Thank you for the help with my loggings Janpeter and please all excuse my rant about Yahoo.

Good DX to all.

John

Thank you John and also Jürgen for sharing your experiences with using SDR radio technology. It is indeed an extremely interesting development, which shows how much DX we all have missed in the pre-SDR times.

I am not sure that I will be able to have the discipline to limit myself with the number of recordings. And I am sure that I will be going through all recordings made. On the other hand, knowing what will be missed without having an SDR makes not buying one also not really an option. A way could be not to invest in a lot of hard disk capacity. And then to make TOH recordings only.

It is anyhow an interesting dilemma. And there are still a couple of months left until the next season for taking a sensible decision.

Be advised though that I very much enjoy going through all of your loggings. If only it was to find new PI codes.

Hello all,

After my experience going through JF's Elad FM files I decided to get a Funcube Dongle Pro + (bw 192kHz) in order to enjoy DXing without it seeming an endless chore going through 6/8/10 MHz files.

I can quickly tune around using a scroll mouse in SDR♯, and I can make IQ recordings of interesting catches (and/or screen recordings). I can very the bandwidth, use scanner functions, use the Zoom FFT IF filter, IF noise reduction etc.

I only have one really strong signal here, so can't comment about the FCD Pro + in more testing environments but I've had no problems from 96.5 Radio Wave, except a very weak image on 101.5 MHz. The FCD Pro+ has a 200 kHz IF filter ("Roofing Filter"), which keeps the crud out of the 192 kHz bw.

I find it useful to trigger recordings remotely. Working full time, I obviously miss a lot of openings during the working week, but I can quickly check conditions and trigger a recording if things look promising,

I don't routinely record openings if I am at home and catching them live, as I know I will simply not have the time to go through them – but I will if there is something of interest, i.e. an unusual opening, possibility of Turkey or something like that.

The software I use will keep a buffer of up to 30 seconds for IQ recordings so I can grab something if I am quick!

Has SDR opened up FM in the way it did MW?
for analysing meteor trains yes absolutely 110 %
some amazing logs from JF filling in that difficult dead patch between
tropo & e skip

but for other modes I don't know yet I've not yet seen anything that
has blown me away

Johns amazing Cape Verde catch was before he got SDR iirc

the fm capture effect Is a problem even thought we know its not 100%,
you can't keep relistening to the same channel winkling out weaker
and weaker stns under a dominant station like on mw

if I'm wrong please tell me, I hope I am
I genuinely want to know

what about our Finnish friends Xinjiang reception, was that using sdr?

I could imagine that recording a band during e skip might record a
fleeting multi-multi-hop e's link up, but I've not found any in the
sdr e skp files of Peer Axel, JF etc
because the closest hop produces so many stns the band is full
if anything I've been reassured that I don't miss much during e skip

maybe we just haven't had decent e seasons since fm spectrum recording
became common

not trying to be controversial or have a fight
I just imagined all sorts of amazing things would be revealed when
we could record the fm band, and IMO thats only really true for meteor
scatter which, admittedly has been a revelation

what does the panel think? :-)

Hi Peter,

I have an RTL dongle, which is unusable on my crowded FM band. I use it with pleasure on the OIRT band though. So for band II I would need a better SDR radio. Which brings me to the question if anyone has experience with the new AirSpy R2?

Hello all,

After my experience going through JF's Elad FM files I decided to get a Funcube Dongle Pro + (bw 192kHz) in order to enjoy DXing without it seeming an endless chore going through 6/8/10 MHz files.

I can quickly tune around using a scroll mouse in SDR#, and I can make IQ recordings of interesting catches (and/or screen recordings). I can very the bandwidth, use scanner functions, use the Zoom FFT IF filter, IF noise reduction etc.

I only have one really strong signal here, so can't comment about the FCD Pro + in more testing environments but I've had no problems from 96.5 Radio Wave, except a very weak image on 101.5 MHz. The FCD Pro+ has a 200 kHz IF filter ("Roofing Filter"), which keeps the crud out of the 192 kHz bw.

Hampered by a combination of awful RFI in the lower part of the band, and it being too windy to raise the antennas to mitigate it.

Spain and southern France in here too nearer the top end of the band though.

Janpeter,

The SDR Play is similar in spec, (12 bit) – it depends on how strong your locals are.

I have four 70db signals here (from Rowridge and Chillerton Down) and a few others a little less strong, and only the Elad doesn’t overload or produce spuria.

Thank you Jim. Yes, my two preferred options, when only looking at performance, would be either the AirSpy or SDRPlay. With AirSpy I have been reading too many negative reports though. AirSpy R2 supposedly has most issues addressed.

The Elad most likely performs better than the above two, but has a significant higher price and less recording bandwidth.

Before purchasing anything, the plan is to first test Dave Onley's AirSpy at my location. I have many more 70db signals on my local band, so have to be careful.

Hello Janpeter,

The Funcube Dongle Pro + (FCD Pro +) is much better than the cheap RTL-SDR dongle. (Do not be confused by the fact the two devices are both dongles. The FCD Pro+ has 200 components and a much more solid feel. It is made in the UK)
RTL dongles are only 8 bit with no filters, and the FCD Pro+ is 16 bit (same as the Elad FDM-S2) with several filters. I also have some RTL-SDR dongles and the FCD Pro+ blows them out of the water!

Jim Smith is the best equipped to talk about the performance of SDRs near strong signals, and indeed I note from his reply below, that he finds the Elad can cope best with strong signals in his location. He seems to have every SDR!

Indeed Peter.. the Funcube Dongle blows the RTLs out of the water. Shame it is only 192khz bandwidth. It can overload a little but it is easy to tweak the gain settings to stop that happening.

You're right, Peter – I have amassed a bit of a collection over recent years! The RTL was dirt cheap, but is useless here.

I don't have the Airspy, but from the specs it does seem broadly similar to the SDR Play with I do have. I use that for airband and general VHF listening these days, connected to a 6m/2m/70cm amateur vertical.

is the FCD+ easier to install than the RTL dongles?

I bought an rtl knowing it was a gamble but a cheap gamble!
never did get it working as an sdr but had fun dxing DAB from local
hilltops , watching local DTV in Warsaw last year , watching Irish DTV
from the Lleyn Peninsular etc

when my old laptop died and I upgraded to windows 8 it wouldn't even
run as a dab/dtv stick anymore, so I passed it on to JH for use in his
planned remote dab dx site

can't complain for £5, I def had £5 worth of fun :-)

From: pe1etr@...
Topic: 38184 Message: 38184

Four different British Isles Nations received on the same FM frequency on my FM Omni in the loft. These stations fade in and out of the noise- sometimes separately sometimes more than one at a time.
The Funcube Dongle clips were monitored "live", the JVC car stereo clips were unattended recordings captured overnight.

Hi Tim,

I use Win7 x64 bit, and have also owned an RTL dongle for about 2 years. Same as you, I couldn't get it to work, other than a TV receiver. Then I saw this advertised http://www.hamgoodies.co.uk/sdr-receiver and wondered what would happen if I followed the installation instructions to the letter. Well, I printed and followed the instructions (there are only 2 pages), and sure enough, my RTL dongle now works as an SDR radio! Here's the link to the installation instructions http://www.hamgoodies.co.uk/RTL%20SDR%20Receiver%20Installation%20Guide.pdf I could never have remembered all that.

Pity you got rid of your RTL dongle, but as you say, you got your money's worth out of it, before doing so.

Luckily for me, I live in an area with practically no overload/image problems. The only spurious signal seems to be on 92.7 MHz, I get a mixture of BBC Lincolnshire (94.9 MHz) and another BBC station (I can't remember what).

Best 73,

Chris (2E0NDT)

yes Tim, the FCD Pro+ uses Windows native drivers. You just plug it in and wait. That is why the bw is limited to 192 kHz because Windows "thinks" it is a soundcard, and 192 kHz is the maximum sampling rate for a soundcard with Windows drivers.

I've tried the FCD Pro+ on Windows 10 and Windows XP so far. I'll try it on other versions soon.

SDR♯ has full built-in full support for the Funcube. HDSDR has almost full support!

Okay Peter, thanks. 16 bit versus 8 bit is a big difference indeed. A shame its bandwidth is only 192 kHz. Still I might consider buying one, as I use the dongle also for low VHF monitoring. And I am having many spurious signals in the 25 - 50 MHz range.

I have an RTL dongle and of course it's useless on band 2 here being a crowded band and plenty 70 db + signals here it was no surprise.I tried the dongle for Band 1/6M/OIRT monitoring and it works fine as long as no local ham fires up on 6M.
Now a recent thing is DAB using DABplayer and the stick picked up some Dutch muxes and seems ok.As for DTT well it's not good during a long powercut I installed the software that came with the stick on my laptop it received all but one mux the one I wanted tried attenuating the signal as our local TX is strong here but to no avail.
As for other SDR's I could not justify the cost for a potential doorstop so will stick to the good old tuners.
Andy

Hello Nick

Did 88.9 improve ? When you say weak how does it compare with my sample I got I wonder :-

https://www.youtube.com/watch?v=FJz712WYGJY&feature=player_detailpage

At 27 secs it was quite good, hanged around for a hour or so then went, nothing else heard with me, were you receiving on your T2 ?

38203. Band II Tropospheric Loggings for 15 November 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-11-16 15:58:52 UTC
From: Janpeter van Dijk
Topic: 35847 Message: 38203

Hi All,

A late submission of my loggings for yesterday, because I wanted to take some time to paint the picture of the amazing Band II tropo event as it took place yesterday.

The tropo forecast for yesterday showed a short period with some enhancement that was expected to develop during the day. All that happened was gale force winds and battering rain until late in the afternoon. So I did not expect any tropo to develop and took this for another inaccurate forecast.
Despite of this, I decided to check Band II in the early evening and... after carful listening found nothing. Except for some interference on 98.3 MHz, under a pretty strong Vivacité signal. I stayed on this channel and after a while with nothing happening I wanted to switch everything off. But then came a short drop of the Vivacité signal and I heard a very weak France Culture. So this was Rennes, which is at a good distance from my location. So I decided to make one more scan of the whole band. This all of a sudden brought in a nice selection of DX signals. Nothing spectacular and all signals very weak. Then I did another scan and I found more DX and also from further afield. Some signals had increased in strength.
To make a long story short, the tropo intensity continued to increase throughout the evening, with stations at bigger distances becoming audible. All in all this developed into the best Band II tropo opening towards the south-southwest that I have known. Getting Spain with tropo is extremely rare since the path is mainly over land, getting Spain on eight frequencies is unprecedented. Again, with this opening I had several first time catches.

So this was Band II tropo opening number six in a series of very good to best ever openings over the last six weeks (I missed number five last week). On average one big event per week! I do not know what is causing this, but if it is global warming then I am a fan of global warming from now on. And we will be seeing more of these intense events.

These are for FMLIST: the Euskadi Irratia transmitter on 87.7 MHz must be radiating the licensed 2 kW. I can't believe it has only the 400 Watts as per FMLIST E. The France Bleu transmitter from Limoges must be with h-pol or mixed pol. Otherwise I would not have received the station on my horizontal antenna.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

"I do not know what is causing this, but if it is global warming then I am a fan of global warming from now on." Jan - have you forgotten where you live?

Spain didn't appear here - I was outside the zone - and conditions have to be exceptional. Plenty of mid-range signals in two groupings - France and South-west Germany.

From my RDSSpy log ovrnight I could see the tropo faded to below RDS levels by 0300 or so UTC but a couple of the German stations hung around for a bit longer.

David

Hello,

Some bursts from the Leonids this morning. (My overnight RTL-SDR recordings yielded zilch).

I'm pretty sure this recording was from 87.7 MHz.

I've edited a longer recording (unattended) but I left short lead in and lead out with each burst.

https://app.box.com/s/2uy088egswlxgktpft83wy1ovmxm2plh
https://app.box.com/s/2uy088egswlxgktpft83wy1ovmxm2plh

A YL very brief
B YL longer Swedish?
C Music only (matches above?)
D longer distorted burst OM French?

Topic: 38208 Message: 38208

The MCX plug > PAL socket adapters arrived from China today and at last I could test the Nooelec on more than just the included telescopic antenna. (It has both the FCC and CE marks).

Performs really well on the FM Omni. A lot less noise and more gain than the Noxon DAB stick (FC0013 tuner).
I'll edit an audio quality compilation. In the meantime the link below is to a clip which is remarkably similar to a clip post yesterday recorded from the JVC car stereo with the same FM Omni.

I think the 94.3 BBC R Scotland Black Hill >> BBC R4 Wenvoe is aircraft scatter. I receive this combo too often on various receivers for it to be random troposcatter.

Mike ..first of all im brazilian..in spite of my uncommon brazilian personal name. Ive been fm radio dxer since 1990 and using simple radio and analogic TV sets. My major área of interest regards to antenna and propagation at VHF Like F spread and Sporadic E within the equatorial anomaly área.Actually my receiver is a car panasonic cqrx 400 L with small 5 elem yagi which had brought me African FM stations for the first time in south America back in 2011 here in northeastern Brazil!!(4000 km +). The TV set is quite simple too ..An analogic Philco 60 channels and dipole..Planning by next december to buy a pocket tecsun pl310et for dxing when traveling...thats it..quite simple ..not that much
Regards
George

I'd probably say SR P1. I'm listening to the audio and what I know MixMegapol is transmitting only music at that time of the day. And the audio hasn't the typical compressed sound the commercial stations are using.

really not sure, Portugese?

very impressed by your lack of groundwave on ur 93.5 recordings, 93.5
isn't even free for meteor scatter monitoring here
(llandrindod/Wrotham/Ireland mess is unshiftable)

your aerial seems to be attenuating ground wave but still giving
enough gain for meteor scatter.
mind you I've not dxed with a serious set up from Blackpool so maybe
its a great spot for clear channels

the nearest I've dxed from is southport and 93.5 was a soup of
Conway/kippure/wrotham

Sounds like Portuguese to me, too. On 87.7 there is the 20 kW RDP
Antena 1 non-directional tx, supposedly well within say 1.400-mile range.

Not forgetting selectivity of car radios, the lack of ground-wave
partially might be thanks to the antenna positioned low enough? It's
about the symptom, there was discussion, was it in Jan. 2014 when
David and John launched their ground-level experiments for the Triax
FM5 and MS reception.

Hello a meteor burst at 13:45 UTC, today 18th Nov 2015 including classical music on 105.050 (I was using an SDR so I'm sure of the frequency).

There was also Italian pops on 104.7 in at the same time.

FMlist lists the following (There might be more now but I can't d/l the latest listing).

105.050 I San Giuliano Milanese/Zona Industriale-v... mi it Radio Vita v 09e16/45n24 100 35
105.050 I Codevilla/Frazione Mondondone-Via della ... pv it Pavia Piu v 09e04/44n54
PAVIAPIU 50FF Ex
Radio Voghera, Ex Voghera II rete
105.050 I Cecima/Serra del Monte pv it Pavia Piu v 09e04/44n50 30 PAVIAPIU 50FF Ex Radio
Voghera,
Voghera II rete

Any ideas?

Thanks

To: vhfskip@yahoogroups.com, udxf@yahoogroups.com

As anyone who has tried to listen to marine Ch0 in a built up area will
know there's a good chance it will be masked by carriers from numerous
Sky routers within the vicinity. Such is Sky's popularity it's likely
that one house in five uses them for net access so it's not good news to
see an announcement that their new routers and STBs have been designed
to automatically choose (based on signal quality) either WiFi or PLT to
communicate with each other.

38239. Re: [SkywavesDX] Aircraft Scatter of exceptional duration

Yahoo group: SkywavesDX (2015)
Date: 2015-11-18 19:46:17 UTC
From: ilkka suni
Topic: 38091 Message: 38239

After having paid some extra attention to Aircraft Scatter, for a few weeks, today at 1300 hours UT I finally got another 10-minute Aircraft Scatter produced by one single aircraft. Not from my regular long-range checkpoint 92.4 MHz Stockholm [60 kW, 600 km], but from the mid-range checkpoint lately, 91.7 Raadio Elmar, Koeru Estonia [7.45 kW, 270 km].

The Raadio Elmar tx being in my 211 degrees and my horizontal pointing roughly at 230 degrees, the Aeroflot Airbus A330 flew right over, heading my 130 degrees. That is to say, the jet crossed my antenna beam sideways.

The jet was doing some 450 kt, in 37.000 ft. The temperature reading in 11.000 metres was around -55 Celsius.
https://app.box.com/s/1kjavcglh2zvjsqnltb03gol8s72huew

This reflection is not nearly as sharp and powerful as those reflections having lasted up to 10 minutes, I got nearly three weeks ago from the 60 kW Stockholm transmitter 600 km away. Still, it has been rather convenient to monitor AS for the last few days, as over here in S-E Finland there has been no tropo conditions to any direction.

It appears, the Boeing 777 equipped with the GE90 turbines, by far is the most guaranteed scatter producer. The Airbus A380 likely is the next best, followed by the Boeing 787 and with reservations Boeing 747.

38272. Tropo 15th November 2015 with recordings

Yahoo group: SkywavesDX (2015)
Date: 2015-11-20 20:06:22 UTC
From: nick gilly
Topic: 38272 Message: 38272

This was yet another excellent tropo lift on November 15th, the last in a series that started at the beginning of October. This time the main area was France and northern Spain.

The first signs something interesting was brewing was discovering RNE 5 on 105.0 just after midnight on the 15th just before going to bed. By daylight on the 15th France Inter was in on 87.9 from Pic du Midi at fairly weak levels, battling it out with co-channel France Culture from Parthenay. Spain reappeared again a little after 9 am (Euskadi Irratia on 87.7 and 88.9). These two were off & on for the rest of the day. Other frequencies came up such as Gaztea 91.2 and 94.7, and RNE 5 also returned on 105.0. I also heard Euskadi Irratia battling it out with another Spaniard on 94.4 at around 11 am.

The French reception started in the SW with Bayonne reaching good levels by 10 am. Niort also got strong by mid/late morning. On discovering France Bleu Périgord from Bergerac at RDS levels on 99.0 at 11.20 am I decided to record the DX as I discovered a 'cake' with some CD-Rs. From then on the lift really got going with plenty of good signals from SW, west and central France and at various times Spain from the Bilbao/San Sebastián area.

Highlights include receiving Bergerac as a solid signal with RDS for hours on end, Bordeaux on 89.7 and 97.7 also for long periods, Rire et Chansons on 103.8 from Guéret (vertical and 500 watts!) and a couple of new Spaniards that I'd not had here before:

92.2 Radio Popular Herri Irratia Bilbao
95.9 Europa FM San Sebastián
100.8 Onda Cero Santander (presumed)
102.0 SER Radio San Sebastián

At 7.20 pm Euskadi Irratia on 87.7 was giving full RDS with Radiotext. The band at the height of the tropo was full of strong signals from SW, west, and central France.

After 8 pm the tropo also started shifting towards the east as I noticed WDR 2 on 100.8 and this was followed by Classic 21 on 99.1 at RDS levels and 87.6, which reached RDS levels at one point later in the evening. Grosser Feldberg also came up in the evening too. The tropo also shifted more and more towards eastern France (although the SW continued to come in) and by late evening after 11 pm Strasbourg was coming in along with Autun, Bar-le-Duc, Chaumont, Arnay-le-Duc and Auxerre.

I switched off at about 12.30 am, and by the following morning (16th) all the tropo had gone.

There are plenty of recordings of this tropo, which can be accessed here:

https://app.box.com/s/hmcx43npyfi02t7jt52091yq553njzp6 Good DX.

From: ilkka suni
Topic: 38274 Message: 38274

Hi folks,

Anyone inspired taking part, in a musical Season's quiz? This would be recognizing popular tracks from the 60's to the 90's, by short MS bursts. There might be prizes, too.

It takes me some time to compile the quiz, and I will not do it if there is no place for such a quiz.

73, ilkka

Trying to set up a different email in yahoo. Not as easy as it seems. Make sure you opt out of the ZIP4 marketing - which they opt you into automatically. How very nice of them! Check in marketing preferences, it's tucked away nicely at the bottom of the page.

John Faulkner (AKA Reginald Ganderpoke, should that name appear)

I've heard that some CB rigs have this option
does anyone know the exact allocation, step, mode etc?

no chance of hearing this on F2, but could be possible on E skip

So Reginald Ganderpoke was from Round The Horne? I honestly didn't know that. (It was one of Tim's, your Majesty).

I know I ought to re-register with a different email address, etc., but I cut off my last email address because of the spam I have been getting - I'm fairly certain thanks to yahoo. The problem was it took me EIGHT, let me repeat that ... *E I G H T* attempts to re-join. I tried yahoo and hotmail registrations but there were problems, plus I am not giving my phone number out to these spam-inducing global corporations. You have to receive a text message and confirmation code in order to enrol with some of them. So I created one under my g1vvp domain, that was promptly banned for some reason. Then it was just trying one email after another until one worked. I had run out of email address ideas and so I started to get a bit fed up. Anyway. Sorry about the undercrackers email address. I forgot that our email addresses now have to be visible, otherwise you can't post to the group! How I detest yahoo. I'm not registering again. This actually works for the moment.

By the way, I like the idea of the Christmas quiz. If such a quiz were compiled, I am guessing it would need to be radio related. Just thinking about how easy it is to get answers from a Google search. Sounds like a bit of good seasonal fun. I used to enjoy regular pub quizzes with a friend in Ashover and Kelham Island. I suggest a high-end DX receiver with a high-spec, future-proofed laptop power it. ;)

Good DX

Reggie

great work Peter, wish I'd kept my Denon tuner now

I'm still in the habit of thinking I don't have enough space and
getting rid of stuff i shouldn't even though I've had bigger place
since 2007

tuners are the main victim of this stupid habit I can't seem to break

Hello tim,

It doesn't need to be the same tuner :)

Peter

Hi folks,

I've just looked at the display of my radio which is tuned to 98.0 MHz under "flat" conditions (as they are now).
I am normally able to hear France Culture from Lille. The display is now showing

This means that at some time this morning "MEGASTAR FM" has been received, presumably via SP-E.

Chris (Lincoln, UK).

Could easily have been an MS burst, Chris.

Not too much evidence of short skip on 10m which would definitely show up, as activity is high with the CQWW contest going on. Just normal F layer today.

38306. UNID France Bleu station 101.2

Yahoo group: SkywavesDX (2015)
Date: 2015-12-01 19:58:05 UTC
From: nick gilly
Topic: 38306 Message: 38306

Heard about 10 minutes ago, unfortunately with networked France Bleu programming. It's a puzzle because I can only find two candidates of FMLIST:
France Bleu Drôme Ardèche La Chapelle-en-Vercors 859 km 0.27 kW
France Bleu Provence Pignans 1054 km 0.2 kW
both of which seem unlikely. Am I missing an unlisted site?
Any help most appreciated. Good DX.

Nick, Whitchurch, Hampshire.

I also received this on 101.2 earlier. It would be nice to learn which transmitter this was. I also had France Musique on 92.6, again from a low powered site. But which one?

Replying directly in the Yahoo Group page now as my emails are clearly not getting through.

Good DX!

John

38308. Marseille in Skegness

  I also received this on 101.2 earlier. It would be nice to learn which transmitter this was. I also had France Musique on 92.6, again from a low powered site. But which one?

Replying directly in the Yahoo Group page now as my emails are clearly not getting through.

Thank you Peter.

This could be the one It would be nice to be 100% about these sites as they are low powered.

What an amazing tropo last night though! I never expected to hear Carcasonne here. I can even imagine Marseille RDSing at some future time after hearing it so well last night. What is happening? So many excellent tropos lately!

Good DX!

Thanks for commenting, Tim.

I suppose, far more of tropo reception within say some 300...400 mile radius, is due to Aircraft Scatter [AS] than one might imagine. Take for instance this Raadio Elmar indicator of mine, some days there is almost constant reception by passenger jet convoys flying in their spesified corridors, no matter the altitude them jets fly, no matter what type of a jet. Then again, days are very unlike with each other. Some days, there is almost no AIrcraft Scatter propagation at all [nor tropo scatter].

I have not quite figured out yet, what makes the big differences in daily AS conditions, as temperatures, say in 30.000 to 40.000 feet pretty much keep the same, around -50...-55 Celsius. Must be about relative humidity, I suppose.

Very interesting Ilkka.

There is more than one aircraft reflection in your recording. It's not just one long reflection, but I am sure ten minutes is very possible. It depends on the passage of the aircraft.

Longest single A/S I have heard would be around five or six minutes. These longer peaks give more time to check for other stations along the path.

George, there is a website called Flight Radar 24 where you can see the flight paths of aircraft. Flightradar24.com - Live flight tracker!
https://www.flightradar24.com/52.11,0.5/7 I see this works for Brazil too!

Hope you have many hours of fun trying this mode. I might also recommend meteor scatter as another fascinating propagation mode.

Good DX!

John

my jet scatter reception seems to have dropped off lately

whichever year it was when I first got my Icom R9500 the jet scatter
was amazing, London pirates, low power Scottish relays, Holland.. you
name it!
then the band got too full

but this is a good time of year to get back into it, I have improved
filtering now

As the FM band turns to DAB in years to come, Aircraft Scatter just migt be of big value. Already now, AS probably is of importance to you guys in the U.K, as I gather southern and south-eastern Norway is within the reach of AS, for you. We all know, Norway shuts down the FM band in 2017.

Speaking of which, just this morning I rigged my Triax FM5 in 5 metres agl, to face west i.e. Norway. Remains to be seen whether the antenna stands low enough, to sufficiently avoid ground-wave and still get the best out of the Geminids. With my 8-el. horizontal VKN, 10 metres agl, the band is simply sheer pain, now that the trees are bare and the local 30-kW tx bashes in, filling the band with birdies.

Still being reluctant to utilize the SDRplay, I bought last spring...

I feel there is some negativity in your voice, Ilkka. I was not 'having a go'. While I am far from being an expert on any of these things, I hear peaks and troughs. Maybe the same aircraft is peaking the signal as it enters some kind of harmonic states across the path length. I have no idea, but the various peaks and fade outs would indicate several aircraft to me. These things are never usually black or white anyway, but maybe somebody else could give a technically accurate explanation as to what is happening in your recording.

I won't participate in any further conversation with you if you feel I am being objectionable in any way. I was only trying to help. It's one opinion.

38345. Tropo 1-2 December 2015

Yahoo group: SkywavesDX (2015)
Date: 2015-12-07 20:45:31 UTC
From: nick gilly
Topic: 38345 Message: 38345

Yet another fantastic opening here, with the best day being Tuesday 1st of December. Luckily I had the day off work, and noticed that something was brewing when I heard RNE 5 on 105.0 at about 11.30 am. This was soon joined by other signals from SW France and the Bilbao area of Spain.

When I noticed France Culture on 99.8 from Perpignan (!) I started recording the lift. The rest of the day was really quite superb, with many signals from southern SW and central France along with the Spaniards. After a while though Perpignan on 99.8 got blocked by France Inter Lyon on the same channel. Another first was receiving the Marseille tx via tropo, at fair levels on 103.6!

The real highlights appeared in the evening though with a couple of low-powered relays. A France Musique was received on 92.6 on a couple of occasions when France Inter was fading. This is a tentative log of the Monestier-de-Clermont transmitter at 871 km (just 250 watts!). Also a France Bleu turned up on 101.2 at weak levels, another low-power relay, tentatively France Bleu Drôme Ardèche La Chapelle-en-Vercors at 859 km and 270 watts. Difficult to be sure as it was on networked France Bleu programming but seems the most likely of the two low-powered candidates.

I also received Europe 1 on 106.8 which peaked south. There are two txes listed here, Niort and Pau, both listed as 1 kW vertical. I strongly suspect the latter, because the main Radio France nationals from Niort were only weak at best. Pau is right in the zone that was propagating.

By the morning of the 2nd there were a handful of signals on the band from central France, Switzerland (Säntis and Rigi) and SW Germany (Hornisgrinde), mostly weak. On returning home from work at 5.30 pm I caught the tail-end of the tropo as it fizzled out, with Hochries, Wendelstein, Bregenz (AUT), Raichberg, Iberger and Hornsigrinde being logged.

List of stations recorded:

87.7 Euskadi Irratia Azkoitia 901 km
87.9 France Inter Pic du Midi 929 km
88.2 France Culture Ussel-Meymac 679 km
88.3 France Inter Carcassonne 914 km
https://app.box.com/s/pukr4iqnl2lg1v2tdggxdmr3chrm08e3
88.8 France Culture Lyon 784 km
88.9 France Musique Millau 851 km https://app.box.com/s/16poq4qre3xev203lpyz4e23sg8ifsxu
89.3 France Culture Le Puy-en-Velay 776 km
89.6 France Musique Gex 763 km
90.4 France Inter Clermont-Ferrand 684 km
90.9 France Musique Carcassonne 914 km
https://app.box.com/s/61f48x2dhqwqy8pw9pjxg6ybt92dy28d
90.9 Radio SRF 1 Innerschweiz Rigi 851 km
91.2 Gaztea Monte Oiz 895 km
91.9 France Musique Aurillac 756 km

92.4 France Musique Lyon 784 km
92.6 France Inter Le Mans 404 km
92.6 France Musique Monestier-de-Clermont 871 km (250 watts, tentative)
https://app.box.com/s/fo9766nbr7tnv8qbvysa04eixazcpvmo
92.8 France Musique Le Puy-en-Velay 776 km
93.7 France Musique Mende 817 km
94.2 France Musique Marseille 1010 km
94.3 France Bleu Creuse Guéret 610 km
94.4 Euskadi Irratia Jaizkibel 878 km
94.7 Gaztea Bilbao 899 km
95.5 France Musique Clermont-Ferrand 684 km
95.7 France Culture Pic du Midi 929 km
96.2 SWR 2 Baden-Wrttemberg Hornisgrinde 742 km
96.9 France Culture Mende 817 km
97.2 Los 40 Principales San Sebastián San Sebastián=Donostia 884 km likely
98.4 France Culture Clermont-Ferrand 684 km
98.4 SWR 3 Baden/Kurpfalz Hornisgrinde
98.6 France Musique Chambéry 813 km
99.0 France Bleu Périgord Bergerac 726 km
99.0 France Culture Marseille 1010 km
https://app.box.com/s/dup65o2dh4m0n0hqljh8fshhasmi2a7m
99.2 France Culture Millau 851 km
99.3 France Inter Le Puy-en-Velay 776 km
99.7 France Musique Ussel-Meymac 679 km
99.8 France Culture Perpignan 1025 km
https://app.box.com/s/lrvoyzpve0cv05uls4y6fga0km1og7rg
99.8 France Inter Lyon 784 km
99.9 RTS La Première Säntis 892 km
100.4 Radio Regenbogen Karlsruhe Hornisgrinde 742 km
100.5 France Bleu Gascogne Bayonne 881 km
100.7 Radio 100,7 Dudelange 563 km
101.2 France Bleu Drôme Ardèche La Chapelle-en-Vercors 859 km (270 watts, tentative)
https://app.box.com/s/e71h5a8z0jzv7wzb4j3jggvrdxjv4byw
101.4 suspect France Bleu Limousin Ussel-Meymac 679 km
101.5 Radio SRF 1 Ostschweiz Säntis 892 km
101.8 France Bleu Isère Lyon 784 km likely
101.8 Virgin Radio Normandie Le Havre 218 km
102.0 Sud Radio Pic du Midi 929 km
102.1 ORF FM4 Bregenz 904 km
102.5 France Bleu Pays d'Auvergne Clermont-Ferrand 684 km
103.4 ANTENNE 1 Reutlingen Raichberg 809 km
103.4 France Info Lyon 784 km
103.5 Gaztea Jaizkibel 878 km
103.5 Rire et Chansons Le Havre 219 km
103.6 Cadena 100 Asturias (Oviedo) Gijón 923 km
103.6 France Bleu Provence Marseille 1010 km
https://app.box.com/s/gdc5f90ap4ex8h7y2idruqdepok3j6j8
103.9 RFM Le Havre 218 km
103.9 Sud Radio Bayonne 881 km
104.4 Euskadi Irratia Monte Oiz 895 km

104.7 Sud Radio Carcassonne 914 km
104.9 France Bleu Gard Lozère Mende 817 km
105.0 Radio 7 Ravensburg Iberger Kugel 916 km
105.0 RNE Radio 5 Todo Noticias Santander Liérganes
105.7 B5 Aktuell Wendelstein 1040 km
105.7 EITB Musika Bergara 903 km
106.3 Deutschlandfunk Hornisgrinde 742 km
106.8 Europe 1 Pau 886 km likely (1 kW vertical!)
https://app.box.com/s/ctivdhthd632nbibjjvf42irwojjiswr
106.9 Fun Radio Le Havre 219 km
107.3 SWR 4 Baden-Württemberg Radio Tübingen Raichberg 809 km
107.7 Antenne Bayern Hochries 1053 km

Great catches!

I managed a 956 Km from Le Puy-en-Velay so was clearly on the very edge of the duct:

Thanks Andy.
I think your France Inter on 99.8 was Lyon/Mont Pilat as this was strong here, particularly in the evening
Good DX.

Very well done yet again Nick! Indeed, another fantastic opening. Which I had to miss completely, being far away on a business trip.

I think that we are close to being able to say that this is a record breaking DX year. With a fair to good Es season and very good if not best ever autumnal tropo.

Last time I wrote that I hoped for one or two more of these extreme openings before this years end. So now I would say, one more to go. Which might happen already on Thursday.

73, Janpeter

Thanks Andy.

I think your France Inter on 99.8 was Lyon/Mont Pilat as this was strong here, particularly in the evening

Good DX.

Subject: [SkywavesDX] Tropo 1-2 December 2015

Yet another fantastic opening here, with the best day being Tuesday 1st of December. Luckily I had the day off work, and noticed that something was brewing when I heard RNE 5 on 105.0 at about 11.30 am. This was soon joined by other signals from SW France and the Bilbao area of Spain.

When I noticed France Culture on 99.8 from Perpignan (!) I started recording the lift. The rest of the day was really quite superb, with many signals from southern SW and central

France along with the Spaniards. After a while though Perpignan on 99.8 got blocked by France Inter Lyon on the same channel. Another first was receiving the Marseille tx via tropo, at fair levels on 103.6!

The real highlights appeared in the evening though with a couple of low-powered relays. A France Musique was received on 92.6 on a couple of occasions when France Inter was fading. This is a tentative log of the Monestier-de-Clermont transmitter at 871 km (just 250 watts!). Also a France Bleu turned up on 101.2 at weak levels, another low-power relay, tentatively France Bleu Drôme Ardèche La Chapelle-en-Vercors at 859 km and 270 watts. Difficult to be sure as it was on networked France Bleu programming but seems the most likely of the two low-powered candidates.

I also received Europe 1 on 106.8 which peaked south. There are two txes listed here, Niort and Pau, both listed as 1 kW vertical. I strongly suspect the latter, because the main Radio France nationals from Niort were only weak at best. Pau is right in the zone that was propagating.

By the morning of the 2nd there were a handful of signals on the band from central France, Switzerland (Säntis and Rigi) and SW Germany (Hornisgrinde), mostly weak. On returning home from work at 5.30 pm I caught the tail-end of the tropo as it fizzled out, with Hochries, Wendelstein, Bregenz (AUT), Raichberg, Iberger and Hornsigrinde being logged.

[snip]

Thanks Janpeter.
I'm not optimistic about Thursday as the weather forecast is for heavy rain here, but we shall see.
My wife and I were away in Exeter over the last weekend and I can't help thinking that I may have missed another good lift on Saturday.
 Good DX.

  Very well done yet again Nick! Indeed, another fantastic opening. Which I had to miss completely, being far away on a business trip.

I think that we are close to being able to say that this is a record breaking DX year. With a fair to good Es season and very good if not best ever autumnal tropo.

Last time I wrote that I hoped for one or two more of these extreme openings before this years end. So now I would say, one more to go. Which might happen already on Thursday.

Hello Guenter,

More info:

http://www.northwestradio.info/news/radio-city-2-and-radio-city-talk/

"From Monday 7th December Radio City 2 and Radio City Talk will swap frequencies.
Radio City 2 will move and broadcast on 105.9 FM – Playing Greatest Hits
Radio City Talk will move and broadcast on 1548 AM – Local News, Sport, Talk and Rock Music
Both stations will continue to be available on DAB".

Tony Blackburn mentioned on Sunday 6th that his old chart show will be available in Liverpool on FM from next week.(He seemed quite pleased). You can hear this announcement in my video:

https://youtu.be/kKiHv3lWIJU https://youtu.be/kKiHv3lWIJU

When I'm tuned to the sister station 999 Rock FM 2 (Preston)

Terve NAH!

My guesses woul be: 98.0 Radio Cittanova, Cremona (maybe with some new inBlu tx), 97.6 R.Ticino, Pavia (as with PI exactly the same they have). Both these are with religious (endless story..) format.

Hilsen!

Ciao Niels and Hannu,

On 98.0 MHz there is also a Radio Città Nuova from Francavilla Fontana (BR). Without knowing the skip area it is difficult to guess.

73, Janpeter

38357. Unid [Germany], help appreciated

Yahoo group: SkywavesDX (2015)
Date: 2015-12-12 15:02:11 UTC
From: ilkka suni
Topic: 38357 Message: 38357

95.7 MHz Dec. 11th, 1119 hours UTC.

https://app.box.com/s/89k5g7bvqtqekdf5pzhyqi6hlfxar50m

Can anybody pick up any reference to a location, or a brand advertised?

I was not able to sit by the radio, thus missing
the opportunity for proper live stream comparison.
I had the Landeswelle Thüringen stream running,
as that is the most common MS pinger from Germany for me,
on 95.7 MHz. Yet the station in my clip is not Landeswelle Thüringen.

Naturally, it is not NDR Kultur either.

Thank you for any help.

Probably Radio Chlef from ALG. I've heard several Arabic pings here this morning on 87.7 along with the more frequent Spanish and Euskara suspects.
 Good DX.

Nick, Whitchurch, Hampshire.

Yes, I thought of that one, but I've never had ALG via MS here before, so I was suspicious it was a station in France broadcasting in Arabic. I was hoping an Arabic-speaker could confirm.

Hello Ilkka.

I couldn't help with your last recording, and I can only guess with this one, but I thought the three note jingle is in the same style of the jingles used by Radio PSR. There is a 100 kW Rado PSR on 100.0 so possibly that.

http://livestream.radiopsr.de/ http://livestream.radiopsr.de/

I took a quick listen but missed the top of the hour. Nothing on YouTube either. Maybe it's the jingle they use with their verkehr or wetter announcements.

Good DX!

John

Hello Ilkka,

The name of the presenter is Phillips Rössler presenting news for i.e.
Radio PSR / R.SH. But which one is on your clip ?

See txt below:
30. Oktober 2015 von Philipp Rößler
After three years at the Saxon local radio stations and Hitradio RTL I go now occupationally new ways. From 1 November you hear me among the customers of newscloud.fm. Here is the news suppliers of Regiocast GmbH & Co. KG.
Now you hear me in the news among others, Radio PSR, R.SA, R.SH, delta radio, Radio Nora, Radio BOB, aerial MV, Energy, Sunshine Live, Classic Radio and ego.fm.

unquote.

Thak you, John.

Yes, it is Radio PSR. I placed my question poorly. John Marsyla from Holland read my question right, also solving the case. What I was looking for, was the presenter's name.

My previous unid of 95.7 MHz appears to be a tricky one. The audio clip has been listened to, for some 50 times, yet no suggestions so far. Supposedly, the MS burst and the clip just lack the crucial phrases.

It's perfectly possible. A few minutes ago I had a clear burst from Radio Laghouat on 87.6 at 1922 km which was in parallel with their web stream. Other Arabic sounding bursts popping up every so often, possibly the same station (the audio quality of their stream is appalling).
 Good DX.

38374. Re: [SkywavesDX] Unid RDS from Italy

Yahoo group: SkywavesDX (2015)
Date: 2015-12-15 15:10:34 UTC
From: Hannu Piirainen
Topic: 38352 Message: 38374

Ciao Fabrizio! Interesting, so a new station this R.51, from Sabbio Chiese (BS) where studios are. Born 2014. Nice catch NAH! They seem to have quite a bunch of frequencies around this area, some in the province of Trento. Mountains and valleys all around.

Interesting article about this area's FM radiohistory:

http://www.vallesabbianews.it/notizie-it/%28Valsabbia%29-E-le-radio-private-18909.html

Hannu

Hi Hannu,
thanks, is an interesting article about the history of radio in the
Brescia area
Fabrizio

Was DFF 1 (former DDR F1) taken over by ARD at 19.58h

SECAM to PAL.

The times flies away!

38380. Re: [SkywavesDX] Skegness Log: 14-12-15

Yahoo group: SkywavesDX (2015)
Date: 2015-12-15 23:36:56 UTC
From: John Faulkner, Skegness
Topic: 38371 Message: 38380

Aha! So that's your local! It's not exactly a regular, but it has been received here on a number of occasions via meteor scatter. I'm sure I have received it on sporadic E too. I wonder if you have received my local transmitter - Belmont.

The Geminids have been good this year. I only wish I'd had more time as I wish I had been able to record more.

Good DX!

John

38381. Lanzarote query

Yahoo group: SkywavesDX (2015)
Date: 2015-12-16 14:06:34 UTC
From: g1mxp@...
Topic: 38381 Message: 38381

Hi

No.... not a report on Lanzarote DX but a request. Does any member have a list of DX heard from Lanzarote. I will be travelling down there at end of December and it would be useful to know what frequencies to monitor.
Many thanks and a Merry Christmas to all.

Edward Baker

38387. Hörby and Sölvesborg album #89

Yahoo group: SkywavesDX (2015)
Date: 2015-12-18 20:44:16 UTC
From: Christian Stödberg
Topic: 38386 Message: 38387

Hello!

I’ve a uploaded some pictures to album #89 Hörby and Sölvesborg. Some pictures are dated late 1930’s when the medium wave TX was inaugurated. In 1952 the first short wave transmitters were bought and installed in Hörby. 20 years later two new Thomson- SW TX were installed and was in use until 1993 when they became prohibited to use due to PCB in the insulation. And from 1993 until 30th October 2010 3x ABB/Thales.

Regarding to the MW TX in Hörby, it was so torn at the end so the technicians prayed every morning for it would start…. And that’s a true story.

38388. Can't log onto FMList

Yahoo group: SkywavesDX (2015)
Date: 2015-12-18 22:16:05 UTC
From: davebunyan@...
Topic: 38388 Message: 38388

Problem with logging into FMList from just before 2200 UTC. POrogram became un-responsive and then couldn't log on again although the front page came up quickly enough. (Busy catching up on my Geminids log)

Anyone else have the same problem?

David

Chris - I'm sorry the images did not appear in the posts, and now, forgive me, I have deleted them from the files section, because
a) This is the wrong forum for LW/SW topics, SkywavesMW would be better

b) I'm not sure how many images we are permitted on Yahoo Groups, and anyway I feel one of the image-sharing sites might be the right place for so many uploads; maybe dropbox, or seafile or owncloud would be a better place

- Julian

38390. Re: [SkywavesDX] Re:: Hörby and Sölvesborg a lbum #89

From: Christian Stödberg
Topic: 38386 Message: 38390

Hello!

I think you have a limit on 100GB or maybe more in pictures so it's a lot of space left. In all 1GB is used so far.

Maybe onedrive or dropbox are alternatives but then the pictures won't be visible in a common album together with other related pictures. Ofcourse I can use my onedrive but the pictures can be deleted anytime when I need the space for other purposals.

Regarding to Motala and Göteborg, I tried to create albums under SkywavesDX. It becam only empty folders. I don't know why.

/Chris

Hi Christian,

I FOUND YOUR PHOTOS very interesting, and of such high quality, too.
I would not worry about this forum being right for these photos.
After all, many FM-DXers know Hoerby for the FM transmitter.
Furthermore, I believe many of us FM listeners have done AM listening, too.

I suppose, just about every Finnish DXer has listened to Hoerby
1178//1179 kHz, in the past. From the 70's I recall, there was this
weekly comedy show hosted by two guys, was it every Thursday night.
That very comedy hour was a must every week. I sometimes had the
programme recorded if I was not at home to listen live. Sadly though,
I no more remember the programme title, let alone recall whether the
programme was in English or Swedish.
.

WHEN I SHARE PHOTOS in a message body, or as e-mail attachments, I
always reduce the resolution and the file size. I suppose, 800...1000
pixels in maximum height or width, is enough for most cases. Also, I
always limit the file size to 200 kB max, per each photo.

If you have more of those fine looking transmitter site photos, do
please share them. Yet preferably a bit smaller files, or via some
cloud server? Actually, your photos made my incoming mail server
alert for overloading ;-)

Also, hold on to the copyrights, especially if they are photos
originally taken by you.

For videos with music, I created a Vimeo account. It works slightly differently to YouTube in that you have to wait for around 40 minutes, AFTER your video has uploaded, before it becomes available for viewing, although you may be able to see it in your own account before this, but I have not had a single problem with Vimeo. It seems to be quite versatile too. All my speech-only videos still go on YouTube.

I see a few other DXers are opting to use Vimeo now. Maybe there are other alternatives worth knowing about?

John

38423. Auroral Sporadic E propagation

Yahoo group: SkywavesDX (2015)
Date: 2015-12-22 10:59:08 UTC
From: Paul
Topic: 38423 Message: 38423

In view of the recent Auroral Sporadic E propagation that has been
observed this may be of interest to some:

JOURNAL OF RESEARCH of the National Bureau of Standards-D. Radio Propagation
Vol. 66D, No.5, September- October 1962
Auroral Sporadic-E Ionization
Robert D. Hunsucker and Leif Owren

http://nvlpubs.nist.gov/nistpubs/jres/66D/jresv66Dn5p581_A1b.pdf

It's a 14 megabyte file so it will be quicker to download the file
before opening it.

38424. More AuEs audio files mp3

Date: 2015-12-22 12:36:57 UTC
From: pe1etr@...
Topic: 38424 Message: 38424

Any help appreciated

Please refer to the file number as there are several clips from some frequencies.
I'm no longer confident I know S from NOR so many files have vague filenames!
Most clips are short, some are very clear others a bit weak. All clips recorded on Sunday 20 December 2015.

Thanks!

** Personal First via the respective mode

I probably missed the peak of the Auroral Es, which appeared to peak a few minutes before I became aware of them, as indicated by the number of

loggings of UK stations made in Finland. Sveriges Radio P1 was also heard on 87.6 and 90.3 via Auroral Es.

A further burst of Auroral Es appeared briefly around midnight, but nothing came up to RDS levels.

Radio 10 from Lelystad on 87.7 was received via aurora. Interesting to monitor this signal while I rotated the antenna from the north-north-east, where Radio 10 peaked, through east where the signal faded completely, then almost to the south-east where it returned via regular scatter. The auroral signal was there when the scatter wasn't. Also, the auroral version of Radio 10 was distorted, whereas the regular scatter version was clean.

Good DX!

OK thanks Chris.
There are a lot of low power stations in Norway on 90.6 but no high power stations. The highest power is only 198 W (Toke).
Maybe a Norwegian can comment?

Using my advance language skills <cough> I managed to negotiate the NRK website to find at the time of my recording (22:32 UTC 20-12-2015), NRK P1 was re-broadcasting Radioteatret: "Kirkenes".

So it means I heard a station using 198 W or less!

Hello all,

Any ideas for this on 87.6 MHz received at 06:16 UTC today (23/12/2015)?

https://app.box.com/s/ncyo3z3j0i3myrrgmax4fkjdloe4ikw9
https://app.box.com/s/ncyo3z3j0i3myrrgmax4fkjdloe4ikw9

Thanks
Peter

Congrats Peter,

You possibly have managed to pick up an extraterrestrial radio
show... Some alien language. Or maybe it is Santa's little helpers,
desperate in last minute rush?

00:05...00:07:
"...fresh water, a real sure help..."
00:09....00:13 :
"....anybody... look down for us, into heaven...". ;-)

But seriously, 00:00...00:03, by the intonation I would suggest it's
Norwegian or Swedish. From there on, to me it is pure Elfish.

I hope you get this one solved, I am curious about the language.

73, ilkka

38437. C4GP (Grand Picasso) manual radio tuning. HOW??

Yahoo group: SkywavesDX (2015)
Date: 2015-12-23 17:40:04 UTC
From: John Faulkner, Skegness
Topic: 38437 Message: 38437

I am trying to make a concerted effort into find a way to enable manual tuning on the C4GP car radio.

I began by writing to the C4GP Owner's Club Forum. No reply so far! So I wrote to ask who makes the radio. Maybe somebody will be able to answer this. In the meantime, I thought I would ask here in case somebody has a C4GP and has been able to achieve this. Also to keep us all posted for future reference.

What would traditional ways be to enable manual tuning?

Both myself, and Ian Kelly, when he visited in July, tried all kinds of things. Nothing we tried would allow us to manually tune this radio. There didn't appear to be an engineering mode.

To fill you in: The auto-scan only ever stops on the absolute strongest signals. The direct keypad frequency entry is useful, but buried three layers deep in the menu, making it unusable for general DXing purposes. You certainly wouldn't use direct frequency entry while you were driving.

So, any suggestions would be welcome. But also, a brand name would be good, then maybe I can contact an engineer at the factory.

Thanks.

John.

Thanks for the links, Ilkka.

... and thank you for your good wishes for Christmas. Personally, I avoid Christmas at all costs and I am glad when the nonsense is over. It's a nice time of year though and has religious significance. Nothing wrong with that, but I detest the commercial aspect - that's virtually all it is these days here. If they banned it I would be ecstatic! But that's probably not a good idea and for a number of good reasons.

I have already conducted extensive searches over recent months to find out if manual tuning is available on this radio. I guess it is simply not possible anymore. Manufacturers do not want people to tune radios anymore. I assume safety plays the major role in this thinking, but I wouldn't be surprised if DAB radio has influenced this too. Who tunes anything anymore, apart from DXers and radio hams?

This radio is so good regarding sensitivity, selectivity and front end performance, that I just have to find a way to enable manual tuning, if it is possible at all.

Thank you and a very happy Christmas to you and everybody who celebrates it. :)

I have just received some information that the car radio in our C4GP could be a Blaupunkt "RD3" or "RD4". I am not sure if this is correct, but I cannot locate any manuals for these.

I think I am going to need some help with this. Anytime you try to locate a manual for something, usually given as a free pdf file by the manufacturer, you only ever find sites which want to cash in on the act. I don't see an RD3 or RD4 on Blaupunkt's website and I suspect that these could be an extension to the name, i.e. Blaupunkt Boston RD4, etc. So I appear to have drawn a blank again.

Hi John, You may have gone this path already, but just in case you haven't. Why not go to the Citroen dealer and demand information from them? When they do car maintenance, they will be switching those car radios to engineering mode every now and then. Coincidentally, the way you describe the manual tuning on your car radio is exactly the same as with my car radio. As is the performance. And like you, I have no clue as to the make of my radio. The car brand is different though. 73, Janpeter ----- Oorspronkelijk bericht ----- Van: "'John Faulkner, Skegness' notmyregularemailaddress@g1vvp.co.uk [SkywavesDX]" Aan: SkywavesDX@yahoogroups.co.uk Verzonden: Woensdag 23 december 2015 20:49:52 Onderwerp: Re: [SkywavesDX] C4GP (Grand Picasso) manual radio tuning. Hi Janpeter.

I didn't want to contact the dealer on the basis that they probably wouldn't know anyway. But their engineers may know of the brand of radios. Since I am a member of a large C4GP forum, whose membership includes many engineers and dealers, it seemed a good place to start. But their help has been a little thin.

I will probably still try your suggestion anyway, but I thought some clever DXer here will have found a way. Picassos are among the most popular cars on the roads here these days, so it was worth asking.

To pin it down to an actual model would be useful for us to know anyway, but only if manual tuning is actually possible.

Thanks.

John

38443. Re: [SkywavesDX] FM radio bandscan in Vera, Almeria, Spain

Yahoo group: SkywavesDX (2015)
Date: 2015-12-24 15:13:38 UTC
From: Grant Williams
Topic: 37667 Message: 38443

Hello

Updated FM bandscan from SE Spain.

* This lists only stations heard during the month (excluding one-off DX)
* Station names sourced from listening or RDS
* Station locations sourced from listening or RDS or the AER database at
http://www.fmlist.org/aer_fm.php?smode=S ['?'=unknown]
* Station RDS sourced from observations.

Yours,
Grant

Hi,
today I've checked these frequencies:

87.60 1554.27 ALG Chaine 3,Kef El Akhal (25)|low signal
91.60 1556.50 ALG Chaine 1,Filfila (21)|no rds
93.90 1557.44 ALG Radio Constantine,Kef El Akhal (25)|strong signal. No RDS
97.20 1559.05 ALG Chaine 2,Kef El Akhal (25)|very strong signal. No RDS
105.40 1602.04 ALG Chaine 3,Akfadou (6)|strong signal. No RDS

Unfortunately 88.40 is covered by a local station.
Merry Christmas

I wonder if it could be "Radioteatret", a radio play by the NRK. At least, it sounds like a radio play.

Supposedly, this one requires some norwegian or swedish ears.

Hi John,

I SINCERELY HOPE, you find the answers.

As I recall, a couple of years ago there was this finnish DXer struggling with a similar dilemma, with his brand [was it?] Grundig car radio. If I remember it right, he had this car radio at his summer villa, the radio connected to a Triax FM5.

He had very good results with the car radio, yet the radio stubbornly kept stuck to automated functions, making scannig the dial difficult
.

SPEAKING OF CAR radios.

There are some items from the past, I have found worthy saving. One of those things is my car radio of late 80's,
the Sony XR-7300.

The very model was Sony's top-of-the-line car radio, equipped with a separate 4x30W amplifier, and a separate CD charger, and the unit' s tape deck had frequency response up to 18 kHz, exceeding the performance of many cassette tape decks of the era. Above all, the XR-7300 was an excellent FM receiver.

Many were the occasions, I was on the road having my Grundig Satellit 600 along. The Sony car radio beat the GS 600. Yet the Satellit 600 is known to be a good performer, also on FM.
.

I SAVED THE SONY XR-7300, in order to attach the unit to my car, in the future.

Came late 90's, I no more could enjoy the XR-7300, in my car. The dashboards and center consoles, as well as the connectors and their cables turned into riddles. Just about nothing to do, unless one got a diagram by the car manufacturer.

Up until early 90's, all you needed to know was tell a positive from a negative cable, and that was it to car radios.
.

I ALSO SAVED these Sony XS-880 car speakers of mid-80's. They can only handle 30//60 watts, but the sound is something no car speaker of mine, later on met. The speakers weigh some 3 kilograms [?] each.

I am beginning to have this urge, to dig up the Sonys, come up with a 12-volt power source feeding enough amperes, and start enjoying them indoors. I bet the XR-7300's FM tuner can cope with the nearby 30 kW

transmitter around. And the amplifier unit has RCA line in-outs, so I can connect the FM tuner to a recorder device, or a PC.

I even have these Pioneer bookshelf loudspeakers of late 70's, the bass element mounting I know the Sony XS-880 car speakers fit perfectly.

73, ilkka

This isn't a new problem, years ago I was bewildered as to how to put a Blaupunkt Luxembourg C30 car radio cassette (radio was FM/MW/LW) into manual tuning. The manual DID NOT say how!

Anyway you had to do the following:
(1) Turn off RDS autotuning (AF) - press the RDS button so that RDS disappears from the display
(2) then press-and-hold the GEO button for 8 SECONDS until a beep is heard. The up/down tuning buttons now does manual tuning (with 50kHz FM steps) instead of Scan tuning (it goes back to scan tuning if you turn the radio off and on again or repeat holding 'GEO' for 8 seconds)

(step 1 of course does not concern you if tuning on MW/LW)

why did they make this (selecting manual tuning) so difficult?
It would have made life easier if perhaps just holding the up/down buttons for a few seconds (when in scan mode) would put it in manual tuning mode - it would be easily discovered.

BTW the same radio (which I still have) is unable to display the "." symbol if its in the RDS station name (RDS PS). But instead of a blank space in place of it, it displays another character instead, which looks like "-D". (I receive two single-frequency stations which include their exact frequency with the RDS station name, so have this symbol looking like "-D" instead of the decimal point on the PS name.

I'd imagine the manual tuning mystery surely did cause bewilderment for many consumers (not just DXers) look at this message-board post as an example:

Hello!

Tomorrow is the last day for Bandit Rock on 104,8MHz in Göteborg (SE).

It will be replaced on January 1:st with "Lugna Favoriter".

The reason is economical. Bandit Rock began their transmissions over Göteborg September 1:st 2008.

/Chris

Thank you Janpeter, Ilkka and "kpc".

All points noted.

I have had another long play with this radio but I still haven't found a solution. I think the main problem is that the radio is only operable from the touch screen and so certain functions may simply not accessible. I switched off all the radiotext, RDS, traffic announcements, etc. you name it, I think I tried it, but nothing made any difference.

When I eventually summon the enthusiasm to make a video of this, I will do so, but I am losing faith. It is such a shame to have such a superb performer of a car radio, but not be able to do much with it with any ease of operation.

Rather frustrated here at the moment. I will keep playing.

Thanks again.

John
